My First Book of Chinese Words introduces young children to basic words and concepts in the Chinese language through colorful rhymes and beautiful imagery. It is a book that parents and young children will enjoy reading together. The Chinese words in the book are all common, everyday items, and the rhymes are informative and fun for children. The goal of My First Book of Chinese Words is to familiarize children with the basic sounds and written characters of Chinese, to introduce core concepts of Chinese culture and to illustrate the ways in which Chinese sounds differ from English ones. Teachers and parents will welcome the cultural notes at the back of the book and appreciate how the book is organized using a familiar ABC structure.

Each word is presented in Chinese characters (both Simplified and Traditional) as well as Romanized Pinyin for easy pronunciation. With the help of this book, we hope more children (and adults) will soon join the more than one billion people worldwide who speak Chinese!

The Syntax of Chinese Routledge
Approaching the topic from a diachronic perspective, this volume is the first book-length work to chart the developmental trajectory, features, functions, and categories of loanwords into Chinese, drawing on both long standing examples as well as the many new loanwords that have entered the Chinese language in the 21st century.
Kuaile Hanyu 1 Tuttle Publishing
Grounded in analysis of Chinese and

international educational concepts and classroom techniques currently used to teach Chinese as a Second Language, and a thorough review of recent research in the field, this volume identifies the learning challenges of the language for native English speakers. Orton and Scrimgeour assess the gap in knowledge and skills between learners' initial and future proficiency levels as L2 Chinese speakers, map their needs as learners towards achieving a high language proficiency, and set out an informed, integrated teaching orientation and practice for the Chinese classroom that responds to those needs. Chapters in the volume address curriculum design, teaching diverse learners and levels, the learning challenges of Chinese oral and literacy

skills, grammar and vocabulary, discourse development, cultural understanding, and the affordances of a visit to China. Filled with original and engaging teaching and learning tools and techniques, this book is an essential and rich content resource for primary and secondary teachers, and teacher candidates and educators in Chinese as a Second Language education.

China has experienced rapid changes in the past two decades. A New China, written from the perspective of a foreign student who has just arrived in China, has been designed to provide up-to-date material on the changing face of China. The text compares contemporary China with its pre-reform era and emphasizes improvements in Chinese society. As in

previous textbooks, A New China aims to provide a solid foundation in grammar and pronunciation rather than teach vocabulary geared toward specific usage. As a new feature, the textbook includes vocabulary words on the same page as the lesson text, making comprehension of new reading passages easier for students. A New China is appropriate for intermediate-level students and includes both traditional and simplified characters.

This book presents recent advances in foreign language education as well as recent work on Chinese language education and CFL teacher development in international contexts. It also reports the results of three qualitative studies on the experiences and beliefs of teachers of the Chinese language in in Denmark.

There are rising concerns over quality issues in both Chinese language education and teacher development in Scandinavian countries and worldwide, broadly due to China's rapid growth and the increasing worldwide popularity of Chinese. What CFL (Chinese as a Foreign Language) teachers believe in teaching and experience in the intercultural context have proposed new questions and issues. The book addresses issues and topics such as teacher beliefs about Chinese language teaching, factors shaping teacher beliefs, the teaching of Chinese by both native and non-native teachers, Chinese language and culture teaching, intercultural encounters and challenges, etc. It provides both macro- and micro-level insights into the key issues and challenges in the

development of Chinese language teachers in Denmark and the Scandinavian region. Taking the perspectives of Chinese language teachers' beliefs and experiences, this book reveals teachers' beliefs about their roles, objectives, and ways of teaching at the micro level. It also discusses the macro-level factors that promote or impede the adaptation of native-speaking teachers of Chinese and the development of Chinese-language education in this Nordic country. It will be of interest to teachers, teacher educators, administrators of Chinese as a foreign language, and researchers concerned with foreign language education in an intercultural context.

university dormitories. The revised edition includes new lessons on daily life, such as doing laundry and getting a haircut, as well as visiting the zoo, night markets, and the Great Wall. Later lessons discuss recent social and political issues in China, including divorce, Beijing traffic, and the college entrance examination. This user-friendly book is aimed at helping students of Mandarin Chinese learn and remember Chinese characters. At last--there is a truly effective and enjoyable way to learn Chinese characters! This book helps students to learn and remember both the meanings and the pronunciations of over 800 characters. This otherwise daunting task is made easier by the use of techniques based on the psychology of learning and memory. key principles include the use of visual imagery, the visualization of short "stories," and the systematic building up of more complicated characters from basic building blocks. Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by

anyone with interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China), but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and effective, reducing the need for rote learning to the absolute minimum. The emphasis throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to

learning the most common characters first. Modern, simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a practical guide with a clear, concise and appealing layout, and it is well-indexed with easy lookup methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered. *Corvette Black Book* Princeton University Press

The Amoy-dialect film industry emerged in the 1950s, producing cheap, B-grade films in Hong Kong for direct export to the theatres of Manila Chinatown, southern Taiwan and Singapore. Films made in Amoy dialect - a dialect of

Chinese - reflected a particular period in the history of the Chinese diaspora, and have been little studied due to their ambiguous place within the wider realm of Chinese and East Asian film history. This book represents the first full length, critical study of the origin, significant rise and rapid decline of the Amoy-dialect film industry. Rather than examining the industry for its own sake, however, this book focuses on its broader cultural, political and economic significance in the region. It questions many of the assumptions currently made about the 'recentness' of transnationalism in Chinese cultural production, particularly when addressing Chinese cinema in the Cold War years, as well as the prominence given to 'the nation' and 'transnationalism' in studies

of Chinese cinemas and of the Chinese Diaspora. By examining a cinema that did not fit many of the scholarly models of 'transnationalism', that was not grounded in any particular national tradition of filmmaking and that was largely unconcerned with 'nation-building' in post-war Southeast Asia, this book challenges the ways in which the history of Chinese cinemas has been studied in the recent past.

Behind the acupuncture, herbal remedies and sophisticated diagnostics of Chinese medicine lies a "congenial system of healing that embodies unification of body and mind, spirit and matter, nature and man, philosophy and reality." In this comprehensive and ground-breaking presentation, based on long experience as physician, psychiatrist, and practitioner of Chinese medicine, Leon Hammer offers a new model for appreciating the traditional healer's effective and profound respect for individual integrity and energetic balance. Explaining, and moving beyond, the five phase (element) system, he shows that this Eastern practice is as much a spiritual science as a physical one. Accessible to the layman, yet a resource for the professional in any

healing art, this book examines the natural energy functions of the human organism as a key to mental, emotional and spiritual health. It offers new insight into disease, showing how it is not

merely an invasion from the outside, but rather a byproduct of a person's unsuccessful attempt to restore one's own balance.
