One of the seminal texts of graphic design, Paul Rand's *Thoughts on Design* is now available for the first time since the 1970s. Writing at the height of his career, Rand articulated in his slender volume the pioneering vision that all design should seamlessly integrate form

and function. This facsimile edition preserves Rand's original 1947 essay with the adjustments he made to its text and imagery for a revised printing in 1970, and adds only an informative and inspiring new foreword by design luminary Michael Bierut. As relevant today as it was when first published, this classic treatise is an indispensable addition to the library of every designer. **A Grand Strategy-Countering China, Taming Technology, and Restoring the Media** Routledge

Born and raised Jewish, Stephen B. Shepard ceased to be observant by the time he entered college. He simply retreated into his own private diaspora: a Jew in name only, a non-religious member of the tribe, linked only tenuously to the heritage, culture, and social values of Judaism. Yet he was aware that there was a flowering of Jewish writing in post-war America: and that many of the authors he was reading were Jewish. What, he wondered, did it mean to be a Jewish-American writer? Was there such a thing as a Jewish novel? Why did he care so much about these books? In this literary memoir, Shepard explores his encounters with a few writers who influenced his sense of Jewish identity: and his ultimate return to the fold. He describes the anti-

Semitism directed at Saul Bellow; details the literary feud between Philip Roth and Bernard Malamud; muses about the "Jewish" John Updike; and contemplates anew the horror of the Holocaust in the work of Cynthia Ozick. Shepard writes as an enthusiastic reader, a fan watching his team play.

**Ethnodrama** McGraw-Hill Companies  
This long-awaited new edition of the 1986 AJN Book of the Year Award Winner has been completely revised and updated. It preserves the format of the original and adds new material on case study methods, study proposals and formats, ethical considerations, institutional review concerns, and the dialect of qualitative and quantitative methods. This book is essential for courses on nursing research, and

indispensable for researchers conducting qualitative studies.

**The Shadow of Kamakhya** Oxford University Press  
NATIONAL BESTSELLER • With stark poignancy and political dispassion Tightrope addresses the crisis in working-class America while focusing on solutions to mend a half century of governmental failure. This must-read book from the authors of *Half the Sky* “shows how we can and must do better” (Katie Couric). “A deft and uniquely credible exploration of rural America, and of other left-behind pockets of our country. One of the most important books I’ve read on the state of our disunion.”—Tara Westover, author of *Educated* Drawing us deep into an “other America,” the authors tell this

story, in part, through the lives of some of the people with whom Kristof grew up, in rural Yamhill, Oregon. It’s an area that prospered for much of the twentieth century but has been devastated in the last few decades as blue-collar jobs disappeared. About a quarter of the children on Kristof’s old school bus died in adulthood from drugs, alcohol, suicide, or reckless accidents. While these particular stories unfolded in one corner of the country, they are representative of many places the authors write about, ranging from the Dakotas and Oklahoma to New York and Virginia. With their superb, nuanced reportage, Kristof and WuDunn have given us a book that is both riveting and impossible to ignore. [Touching Eternity](#) Raintree  
“Bill Holstein nails it. This is exactly the

right book at the right time. Holstein knows because he has spent decades observing events closely around the world and interpreting them especially in terms of what they mean for real people in America. His observations are deeply insightful and U.S. leaders need to pay attention to his suggestions. The book is also a fun read." -Clyde Prestowitz, veteran trade negotiator and author, *The World Turned Upside Down: America, China, and the Struggle for Global Leadership*. The rapid spread of the coronavirus demonstrated how deeply interwoven our societies have become, yet we have failed to understand the Chinese Communist system and its values. The Chinese Communist Party have taken advantage of the worldwide pandemic to push their agenda and their

interests far more aggressively than at any point in the "engagement" we have had with them for some forty years. I was there in southern China when it started.

Duty and Desire Book Club Edition

Chronicle Books

Memoir: A young woman is left behind with slim chances of survival under the Khmer Rouge. A young reporter comes of age in a world of war in Vietnam and Cambodia.

*A Literary Journey to Jewish Identity*

Humanities Press International

A "moving and memorable" novel about a cafe where everyone has a story to tell from the award-winning author of *The Women of Brewster Place* (The Boston Globe). In post-World War II Brooklyn, on a quiet backstreet, there's a little place

that draws people from all over—not for the food, and definitely not for the coffee. An in-between place that’s only there when you need it, Bailey’s Cafe is a crossroads where patrons stay for a while before making a choice: Move on or check out? In this novel, National Book Award-winning author Gloria Naylor’s expertly crafted characters experience a journey full of beauty and heartbreak. Touching on gender, race, and the African American experience, Bailey’s Cafe is “a sublime achievement” about the resilience of the human spirit (People).

**Psychology for Occupational Therapists** Routledge

The startling and sensational true story of the most famous unsolved heist in American history: the theft of \$28 million

in jewels from the Pierre Hotel. New York City, 1972. Bobby Comfort and Sammy “the Arab” Nalo were highly skilled jewel thieves who specialized in robbing luxury Manhattan hotels. (They once robbed Sophia Loren’s suite, relieving the Italian actress of over \$1 million in gems.) With the blessing of the Lucchese crime family, their next plot targeted the posh Pierre Hotel—host to kings and queens, presidents and aldermen, and the wealthiest of the wealthy. Attired in tuxedos and driven in a limousine, this band of thieves arrived at the Pierre and with perfect timing, they seized the security guards and, in systematically choreographed moves, they swiftly took the night staff—and several unfortunate guests who happened to be roaming around the lobby—as hostages. The

deposit boxes inside the vault chamber are plundered and, after the intruders have held the Pierre under siege for almost two hours, the gentlemanly thieves depart in their limousine with a haul of \$28 million. But then matters begin to deteriorate. Comfort, Nalo, and their partners begin to double and triple cross one another—two absconding to Europe with the bulk of the booty while three are murdered by their former associates. The authorities immediately suspect Comfort and Nalo of masterminding the Pierre ambush and arrest them, but these veteran criminals keep their mouths shut. To ensure that they are not prosecuted, the Lucchese Family funnels a \$500,000 bribe to the presiding judge to quash the charges—and to this day The Pierre

Hotel caper remains unsolved. A suspenseful narrative of Mafia intrigue, police corruption, and personal betrayal—which concludes with a poignant love affair—this is the true story of the most famous hotel robbery in American history.

*The Last Helicopter* Teachers College Press

If you want to discover the Next Big Thing in technology... ENTER THE DRAGON. You already know that China is the most populated nation on the planet. You already know about the rapid growth of its Internet and the recent development of its technologies. But did you realize that China has... The world's largest number of mobile phone users (500 million) Three times as many engineering students as the United

States? A dozen more billion-dollar tech firms than the United States? The fastest growing venture capital market in the world? It's time to face the facts: China is catching up to the United States as a global leader of technology--and, within a few years, may surpass every nation in the world. By modeling their new technology-based companies on successful American ones like Google and Yahoo, a new breed of entrepreneur is leading China through a second Industrial Revolution. Financial journalist Rebecca A. Fannin traveled from Shanghai to Beijing and beyond to speak face-to-face with China's hottest up-and-comers. For some of these young entrepreneurs, it's their first interview with the Western press--and their first chance to introduce their companies before the stocks hit

Nasdaq. You'll meet smart and savvy self-starters like Robin Li, who made his company Baidu in the image of Google. You'll meet inventors and innovators like Liu Yingkui, who developed software for selling goods over cell phones, not PCs. You'll also meet the American venture capitalists who are searching for deals every day in every corner of China. Whether you're an investor, entrepreneur, techno whiz, or dot-com mogul, you can make peace with the dragon--and profits, too.

Tightrope Jim Laurie

Written in Johnny Saldaña's elegant and accessible style, *Thinking Qualitatively: Methods of Mind* boldly pursues the challenge of teaching students not just how to collect and analyze data, but how to actively think about them. Each

chapter presents one "method of mind" (thinking analytically, realistically, symbolically, ethically, multidisciplinary, artistically, summarily, interpretively, and narratively), together with applications, a vignette or story related to the thinking modality, points to remember, and exercises. Designed to help researchers "rise above the data," the book explores how qualitative research designs, data collection, data analyses, and write-ups can be enriched through over 60 different lenses, filters, and angles on social life. Venturing into more evocative and multidimensional ways to examine the complex patterns of daily living, the book reveals how the researcher's mind thinks heuristically to transcend the descriptive and develop

"highdeep" insights about the human condition.

Teachers Investigate Their Work Edward Elgar Publishing

This practical text addresses a gap in the literature by mapping the links between philosophy, research method and practice in an accessible, readable way. It offers guidance to allied health professionals - increasingly involved in research as the emphasis grows on evidence-based practice - on how to engage in meaningful, good quality qualitative research. To help researchers take on this challenge, the book: highlights some of the choices involved in carrying out qualitative research offers a wide range of practical examples to show how different ways of doing qualitative research can be managed

critically examines a variety of qualitative research methodologies of particular interest to allied health professionals clarifies the links between epistemology, methodology and method. The book is structured in three parts. Part I sensitises readers to the complex issues which challenge qualitative researchers at the planning stage of their projects. In Part II, the challenge of using different methodologies is critically explored by fifteen authors, who describe their individual research experiences. Part III examines the choices researchers make when they evaluate and present research.

*A Life Less Ordinary* David R. Godine  
Publisher

"The supreme art of war is to subdue the enemy without fighting. --Sun Tzu,

author, *The Art of War* The challenge is this: how can America's fractured democracy and diverse society respond to a centrally orchestrated strategy from China that ultimately may challenge our interests and our values? Some Chinese-Americans and Chinese residents--perhaps only a relative handful--have cooperated in obtaining technology for China. And many Chinese nationals who obtained years of experience working at American companies have returned to China to help competitors there. The Chinese have a nickname for these individuals, haigui, or returning sea turtles who come ashore once a year to lay their eggs. This book outlines the contemporary issues and offers solutions.

**Telegraph Pa** Yale University Press

Designed to be used as both a class text and a resource for researchers and practitioners, Arts Based Research provides a framework for those who seek to broaden the domain of qualitative inquiry in the social sciences by incorporating the arts as forms that represent human knowing.

Bayberry Books

The untold story of how restrictive

policies are preventing China from becoming the world's largest economy  
 Dexter Roberts lived in Beijing for two decades working as a reporter on economics, business and politics for Bloomberg Businessweek. In *The Myth of Chinese Capitalism*, Roberts explores the reality behind today's financially-ascendant China and pulls the curtain back on how the Chinese manufacturing machine is actually powered. He focuses on two places: the village of Binghuacun in the province of Guizhou, one of China's poorest regions that sends the highest proportion of its youth away to become migrants; and Dongguan, China's most infamous factory town located in Guangdong, home to both the largest number of migrant workers and the country's biggest manufacturing

base. Within these two towns and the people that move between them, Roberts focuses on the story of the Mo family, former farmers-turned-migrant-workers who are struggling to make a living in a fast-changing country that relegates one-half of its people to second-class status via household registration, land tenure policies and inequality in education and health care systems. In *The Myth of Chinese Capitalism*, Dexter Roberts brings to life the problems that China and its people face today as they attempt to overcome a divisive system that poses a serious challenge to the country's future development. In so doing, Roberts paints a boot-on-the-ground cautionary picture of China for a world now held in its financial thrall. Dexter Roberts is an

award-winning journalist and a regular commentator on the U.S.-China trade and political relationship. His prior speaking engagements include traditional news media outlets (NPR, Fox News, CNN International) as well as universities and institutes (George Washington University, Council on Foreign Relations, and the Overseas Press Club). He is available for virtual classroom visits to courses that adopt *The Myth of Chinese Capitalism*. Please contact [academic@macmillan.com](mailto:academic@macmillan.com) for more information.

*Rapid Assessment Process* SAGE

Duoethnography is a collaborative research methodology in which two or more researchers engage in a dialogue on their disparate histories in a given phenomenon. Their goal is to interrogate

and re-conceptualize existing beliefs through a conversation that is written in a play-script format. The methodology of duoethnography serves as the focus of this book. Duoethnography facilitates stratified, nested, auto-ethnographic accounts of a given research context or question, designed to emphasize the complex, reflexive, and aesthetic aspects of both the work in process and the product. As a curriculum and a research method, duoethnography explores two seminal issues: representation in qualitative research (how to represent findings when findings are created within a dynamic phenomenological text), and praxis (how research contributes to a sense of personal change). Duoethnography allows researchers to explore their

hybrid identities and to see how their lives have been situated socially and culturally. Recent duoethnographic studies have examined a range of topics, including forms of institutionalized racism, beauty, post-colonialism, multicultural identity construction, and professional boundaries between patient and practitioner in mental health professions.

*Diego Rivera & Frida Kahlo in Detroit*  
Open Road Media

This comprehensive Handbook explores both traditional and contemporary interpretations of qualitative research in the workplace, examining a variety of foundational and innovative qualitative methodological approaches.

**Badenheim Nineteen-thirty-nine**  
Simon and Schuster

A tale of Europe in the days just before the war. It tells of a small group of Jewish holiday makers in the resort of Badenheim in the Spring of 1939. Hitler's war looms, but Badenheim and its summer residents go about life as normal."

*A Red Line in the Sand* Rowman Altamira  
Seven ethnodramas illustrate this emerging genre of arts-based research, a burgeoning but evident trend in the field of theatre production itself. With their focus on the personal, immediate and contextual, these plays about marginalized identities, abortion, street

life and oppression manage a unique balance between theoretical research and everyday realism.

Qualitative Research for Allied Health Professionals Vintage

Audience development is a strategic, dynamic and interactive process of making the arts widely accessible. It aims at engaging individuals and communities in experiencing, enjoying, participating in and valuing the arts through various means available today for cultural operators, from digital tools to volunteering, from co-creation to partnerships.
