A flashlight with fun sounds and a pop-up storybook, too! Go on an adventure and learn shadow play along the way. Written in charming rhyme, a firefly flies at night, casting its glow on various nighttime creatures. Each spread features a large pop-up of a different animal or insect, which the reader can light up with the

flashlight, to cast shadows. Some spreads contain directions for making hand shadows. When the firefly is ready for bed, who will light up the sky instead? The moon! Shine the flashlight on the die-cut shapes to create shadows with the flashlights LED light. Real working flashlight with ON/OFF light switch, and 5 sound buttons; book includes elastic band for flashlight module safekeeping

Two movie-theater projectionists become addicted to "fixing" blockbuster films. An aged woman claims squatter's rights at a Congo-themed mini-golf park. An eleven-toed breakfast food designer tries to save a doomed relationship by attempting a foolish stunt. Nickalus Rupert's stories unearth humor and tenderness within the most trying aspects of being human. Bosses of Light and Sound will make you uncomfortable in the best way as characters struggle to negotiate circumstances that range from ridiculous, to excruciating, to improbably sublime.

"The seven tones of the great scale, with the wonderful rhythms of the fire, resound in the entire universe." - Samael Aun Weor
 Wherever there is motion, there is sound. At every level of the universe, creation is movement, sound, a vibration of energy. That is why all the ancient scriptures exclaim that creation begins with a sound, symbolized by the Word of God that says, "Let there be Light." Spiritual light-insight, understanding, and personal experience of the Divine-is also created by means of sound, by the motion of energy within us. Spiritual elevation depends upon laws of nature that humanity ignores. Learn how the forces of creation flow in all of nature, especially within us. By conscious use of the energy that pulses within us, we can open our spiritual eyes and ears to the creative power of sound. This leads us to personal experience of the truth: genuine spiritual experience. • Explains the practical steps towards acquiring personal experience of the truth • Rooted in ancient scriptures and long-protected knowledge • Useful for students of any religion or mysticism

For use in schools and libraries only. This book explains the basic principles of sound and light through looking at everyday experiences and direct observation. Topics include: how sounds are created; how food is related to sunlight; why some sounds are loud and some are soft; why you can still see when it's dark outside; and, how day turns into night.

What Sound Is Morning? Teacher Created Materials

This undergraduate textbook aids readers in studying music and color, which involve nearly the entire gamut of the fundamental laws of classical as well as atomic physics. The objective bases for these two subjects are, respectively, sound and light. Their corresponding underlying physical principles overlap greatly: Both music and color are manifestations of wave phenomena. As a result, commonalities exist as to the production, transmission, and detection of sound and light. Whereas traditional introductory physics textbooks are styled so that the basic principles are introduced first and are then applied, this book is based on a motivational approach: It

introduces a subject with a set of related phenomena, challenging readers by calling for a physical basis for what is observed. A novel topic in the first edition and this second edition is a non-mathematical study of electric and magnetic fields and how they provide the basis for the propagation of electromagnetic waves, of light in particular. The book provides details for the calculation of color coordinates and luminosity from the spectral intensity of a beam of light as well as the relationship between these coordinates and the color coordinates of a color monitor. The second edition contains corrections to the first edition, the addition of more than ten new topics, new color figures, as well as more than forty new sample problems and end-of-chapter problems. The most notable additional topics are: the identification of two distinct spectral intensities and how they are related, beats in the sound from a Tibetan bell, AM and FM radio, the spectrogram, the short-time Fourier transform and its relation to the perception of a changing pitch, a detailed analysis of the transmittance of polarized light by a Polaroid sheet, brightness and luminosity,

and the mysterious behavior of the photon. The *Physics of Music and Color* is written at a level suitable for college students without any scientific background, requiring only simple algebra and a passing familiarity with trigonometry. The numerous problems at the end of each chapter help the reader to fully grasp the subject.

How Sound Moves Entangled: Teen Presents an introduction to light and sound, discussing their identifying characteristics, color, mirrors, refraction, acoustics, sound waves, and human hearing and vision.

Light and Sound Kingfisher Now a USA TODAY BEST-SELLER, *The Sound of Wings* is a masterfully crafted tale of love, friendship, betrayal, and the risks we take in the pursuit of justice. Seventy-year-old Goldie Sparrows faces declining finances, questionable health, and a late husband who torments her from the beyond. She seeks refuge in her butterfly garden, which is filled with voices and memories from long ago. Jocelyn Anderson is a struggling writer who finds escape from her custody battle in the journal of her late mother-in-law. As she

gets pulled through the pages of time, Jocelyn discovers her own husband has a hidden history she knows nothing about. Is this secret now Jocelyn's to keep? Krystal Axelrod is living a life she never dreamed she could have. And yet the demons of a dysfunctional childhood and mean girl culture from her cheerleading days cast their shadow over her ability to feel whole, capable, and worthy. Does Goldie hold the key to Krystal's path to freedom?

The New York Times bestselling author of the Tradd Street novels explores a Southern family's buried history, which will change the life of the woman who unearths it, secret by shattering secret. Two years after the death of her husband, Merritt Heyward receives unexpected news—Cal's family home in Beaufort, South Carolina, bequeathed by his reclusive grandmother, now belongs to Merritt. In Beaufort, the secrets of Cal's unspoken-of past reside among the pluff mud and jasmine of the ancestral Heyward home on the Bluff. This unknown legacy, now Merritt's, will change and define her as she navigates her new life—a life

complicated by the arrival of her too young stepmother and ten-year-old half brother. Soon, in this house of strangers, Merritt is forced into unraveling the Heyward family past as she faces her own fears and finds the healing she needs in the salt air of the Lowcountry.

The *Sound of Light* is a sweeping overview of the history of gospel music. Powerful and incisive, it traces contemporary Christianity and Christian music to the

16th century and the Protestant Reformation after examining music in the Bible and early church music. From the

psalms of the early Puritans through the hymns of human composure of Isaac Watts and the social activism of the

Wesleys, gospel music was established in 18th century America. With the camp

meeting songs of the Kentucky Revival, the spirituals that came from the slave culture, and the hymns from the great revival after the Civil War, gospel music advanced through the 19th century. The 20th century brought recording technology and electronic media to the table. Gospel music has developed with Christian revivals and the history of American gospel music is the history of Christianity in America. Gospel music reflects the American spirit of freedom and the free market as a Christian culture emerges in the 20th century, providing a spiritual as well as economic foundation. The Sound of Light presents gospel music as part of the history of contemporary Christianity. It is a work broad in scope that defines a music essential to understanding American culture as well as American music in the 20th century. Don Cusic is the author of ten books, including the biography Eddy Arnold: I'll Hold You in My Heart and an encyclopedia of cowboys, Cowboys and the Wild West: An A-Z Guide from the Chisholm Trail to the Silver Screen. He earned a Masters and Doctorate in Literature from MTSU. Since August of 1994, Cusic has been Professor of Music Business at Belmont University. Firefly, Light Up the Sky Capstone Classroom

This book is a collection of essays and original material that introduces the avant-garde artist-collaborators, La Monte Young and Marian Zazeela to those unfamiliar with their life and art, as well as providing the more acquainted readers with new and useful insights and analyses of the fundamental issues in their life and work. The book explores the recurring themes that have influenced Young's minimalist music and Zazeela's ongoing engagement with the use of light in art. These themes include the importance of nature and its natural shapes and sounds, the importance of mathematics and organized tuning systems based on natural harmonics, enhanced attention spans and increased sensitivity to differences within apparent sameness, extensions of time, and alterations of space. Essays by Terry Riley, John Schaefer, Henry Flynt, Christine Christer Hennix, Mitchell Clark, Kyle Gann, Ben Neill, and Robert Palmer are included.

Young and Zazeela contribute to the book with original text materials that focus on continuous sound and light environments. Sending Messages with Light and Sound Pi Kids

My littlest girl has always been a bit peculiar. It was nothing I could ever put a finger on, but I always knew there was something inside her that made her a different kind of special. A deeper kind. K'acy's got a light around her, one that'll just about knock you over, especially if you don't see her coming. She's got music in her soul, too. Deep, resonating music that echoes and hums, just like the notes that come from the bass guitar she's had attached to her hip since the day she turned thirteen years old. She's got a hell of a secret, yes, but she does what she's got to do to make it one worth having. She takes care of people. She changes their stories. I spent my life telling both of my girls that you always gotta do what's right, even when it hurts, and it makes me proud to know she was listening. I saw the way she looked at that boy on the day they met, and I knew right then that things were going to change. Two different people from two different worlds is nothing

but a recipe for heartbreak, and when the lies pile higher and higher, it can change a person into something they're not. It took me dying all those years ago to finally figure out just exactly how special my K'acy really is, and even though I'm not with her anymore, I don't want that boy and his family to change her. I want her to keep doing what's right, even when it hurts. Because that's who she is inside. That's her deeper kind of special. **This stand-alone novel by Claire Wallis is intended for mature readers age 17 and up**

"Sounds are all around us, but what makes sound? How does it travel? What can it do?"

These questions and more will be answered as the science of sound energy is examined in depth. Readers will learn how the physical movement of objects creates sound, as well as the qualities of sound and how they vary, and are received. The uses of sound energy in various fields will be explored. Simple illustrations of sophisticated scientific concepts will enhance the young learner's understanding of the topic."
