POLLARD GLORIA

A Theory of Everyone University of Toronto Press
 In an era where climate change dominates global discourse, Felix Leach and Nick Molden dive deep into the complexity of vehicle emissions in their groundbreaking new book. Building on the insights from Felix's previous work, *Racing Toward Zero*, this new release confronts the bewildering landscape of automotive pollution with a clear, rigorous approach: what one piece of information can best describe the environmental impact of cars? Our digital age bombards us with information, yet meaningful understanding often eludes us, particularly when it comes to climate issues like road vehicle emissions. As simple solutions to such a complex problem remain elusive, Leach and Molden advocate for a sophisticated, yet accessible perspective. They propose a radical simplification of how we consider the environmental impact of cars and explore the multifaceted impacts of various vehicle powertrains, pushing beyond CO2 emissions to address broader environmental and societal

concerns. The authors introduce the Molden-Leach Conjecture, a bold, universal solution that evaluates vehicles through a holistic lens. This conjecture offers a comprehensive framework to assess and regulate environmental impact, aiming to simplify complex choices for consumers and policymakers alike. They propose a new paradigm for taxing vehicles as we move away from fossil gasoline and diesel, enabling policymakers to address pollution and underpin tax revenues simultaneously. In a world where climate action is critical yet convoluted, Leach and Molden's book promises clarity and actionable insight. It's not just about finding answers—it's about finding the right ones. Join the journey to demystify automotive emissions and drive meaningful change. "As a former Secretary of State for the Environment and, later, Industry I welcome this contribution to the most important challenge of our time." Last year Gartner identified the 10 major forces that are actively reshaping the future of IT services and the outsourcing market*. Amongst the much hyped Cloud, Security and Consumerization were included the Value Chain and Componentization -- items that don't get so much Press hype but, according to Gartner, are fundamental forces that should be addressed. A new title: *The IT Factory* describes operating within these forces by applying Supply Chain Management for IT Infrastructure Services: Using the SCOR Model. The IT Factory is the Solution to Value Chain and Componentization Issues. Caspar Hunsche, CTO, Director of Research, Supply Chain Council, Inc. notes that it's been done before: The processes of IT Value Chain and IT Componentization can deliver goods and services by using the same Factory techniques that supply chains do. Brad Ellison - Manager, Global Data Centers - Intel® Corporation agrees noting We have moved deliberately to a factory metaphor. We have stopped focusing just on what data centers store and are asking ourselves, What do they output? It's clear that IT departments need to get down to the Factory floor to gain the experience that has been bread and butter thinking for Supply Chain disciplines for many years. Hans van Aken, a seasoned HP employee, with support from The Supply Chain Council, has used the Global Standard SCOR (Supply-Chain Operations Reference-model) to distill the experience of many Supply Chain experts to describe how businesses can implement IT Commoditisation and Value Chain using tried and tested techniques.

Ava has just landed a job as a reporter in Gubinge, a tiny tropical town in Australia's north. Gubinge has a way of getting under the skin. Ava is hooked on the thrill of going hand-to-hand with barramundi, awed by country, and stunned by pindan sunsets. But a bitter collision between a native title group and a Japanese-owned uranium mining company is ripping the community in half. From the rodeos and fishing holes of northern Australia, to the dazzling streets of night-time Tokyo, Ava is swept in pursuit of the story. Will Gerro Blue destroy Burrika country? Or will a uranium mine lift its people from poverty? And can Ava hold on to her principles if she gives in to her desire for Noah, the local Burrika boss?

Who would ever imagine that an eighteen-year-old who began his career teaching thirty-two eight-year-olds in a state school in an insignificant city in the remote South Pacific would end up on the world stage as the writer of definitive technical volumes in the field of biblical studies and as the only scholar from Australia/New Zealand on the Committee on Bible Translation that produced the New International Version? This autobiography is the account of the surprising stages that led Murray Harris from his humble beginnings to ending his teaching career as a professor emeritus at a leading United States theological institution. These stages are here attributed to the gracious guiding hand of a God who delights in providing serendipities while achieving his purposes. All this is recorded with humor and with many photos and illustrations.

Our thought-life defines our identity and how we see ourself. What we believe dictates our actions, and our actions become habits. We all face enemies from our past: guilt, shame, and fear that are born from negative circumstances which have created wounds. These wounds can birth lies that we agree with over time that cripples our thinking, nagging us into an ineffective life. Our family, career, and relationships suffer as a result. Freedom from these strongholds in our mind can be achieved, and #fearhunters is here to provide strategies and targets to help eliminate the shame and guilt that stand between you and the life you are meant to live.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Enchantment, as defined by bestselling business guru Guy Kawasaki, is not about manipulating people. It transforms situations and relationships. It converts hostility into civility and civility into affinity. It changes skeptics and cynics into believers and the undecided into the loyal. Enchantment can happen during a retail transaction, a high-level corporate negotiation, or a Facebook update. And when done right, it's more powerful than traditional persuasion, influence, or marketing techniques. Kawasaki argues that in business and personal interactions, your goal is not merely to get what you want but to bring about a voluntary, enduring, and delightful change in other people. By enlisting their own goals and desires, by being likable and trustworthy, and by framing a cause that others can embrace, you can change hearts, minds, and actions.

With I'm Not from Here, popular writer Will Willimon returns to fiction with a story of spiritual discovery set in a Southern town. Will takes us on a Don Quixote-like journey during which young Felix Goforth Luckie learns a great deal about the world, about other people, and about a God who shows up in the oddest places, in the strangest times, and among the unlikeliest people. On a quest to discover himself, Felix is discovered by the grace of God. In homage to Dostoevsky, Cervantes, and the Bible, Willimon creates a world that is thoroughly believable, realistic, and ordinary, yet at the same time fantastic, strange, and funny. In Galilee, Georgia, young Felix finds that things are not as they first appear, people are wonderfully mysterious, and God is unavoidable. At times odd, frequently very funny, both satirical and poignant, I'm Not from Here is a rollicking tale, a light-hearted parable with serious intent. Willimon's first novel, Incorporation, was widely acclaimed for its satire, honesty, and theological depth. While this his second novel differs considerably, I'm Not from Here is equally surprising and entertaining, showing Willimon's gifts as a masterful storyteller. Even as the parables of Jesus reveal things to us that could not be seen except through fiction, so this novel is not only engaging but also revealing.

Built to Lose Positively

A blueprint for a better future that offers a unified theory of human behavior, culture, and society. Playing on the phrase “a theory of everything” from physics, Michael Muthukrishna’s ambitious, original, and deeply hopeful book *A Theory of Everyone* draws on the most recent research from across the sciences, humanities, and the emerging field of cultural evolution to paint a panoramic picture of who we are and what exactly makes human beings different from all other forms of life on the planet. Muthukrishna argues that it is our unique ability to create culture, a shared body of knowledge, skills, and experience passed on from generation to generation, that has enabled our current dominance. But it is only by understanding and applying the laws of life—the need for energy, innovation, cooperation, and evolution—that we can solve the practical and existential challenges we face as a species. *A Theory of Everyone* attempts to provide solutions for the most pressing problems of our collective future, such as polarization, inequality, the “great stagnation” in productivity, and the energy crisis. Casting a bold and wide net, Muthukrishna’s book is a must-read for anyone interested in a better future for ourselves and for generations to come.
