### VANG CURTIS

*Documenting Inuit Sea Ice Knowledge and Use* Springer Nature

Today's enterprises face a profound leadership crisis - and the speed of business has far outstripped conventional executive development systems. In *Grow Your Own Leaders*, three world-renowned experts introduce an entirely new approach for identifying tomorrow's leaders within your own organization, accelerating their development, and deploying them immediately, to address new challenges wherever they emerge.

*Space Safety Regulations and Standards* Springer Nature

'This cutting-edge publication is drawn on international research and practice, and undoubtedly encourages reflection and personal development. The authors are experts in the field of education leadership and management.' - Professor Raj Mestry, University of Johannesburg  
 The Third Edition of this successful and respected book covers leadership and management of people at all levels in educational organisations. It contains up-to-date research and literature, covering the entire

spectrum of educational institutions. This new and revised edition: deals with issues such as succession planning, leadership development and diversity has an enhanced focus on international trends, examples and research acknowledges the changing English context, including the shift to system leadership, academies and free schools covers changes in Scotland, Wales and Northern Ireland The book will be of great interest to postgraduate students, researchers and academics; candidates on professional leadership qualifications; middle and senior managers, and aspiring leaders in schools and colleges. Tony Bush is Professor of Educational Leadership at the University of Warwick, UK and Visiting Professor at the University of the Witwatersrand, South Africa. David Middlewood is a Research Fellow at The University of Warwick.

*The New Economy of the Product Life Cycle* John Wiley & Sons

The Author of this new volume on ant communication demonstrates that information theory is a valuable tool for studying the natural communication of animals. To do so, she pursues a fundamentally new approach to studying animal communication and "linguistic" capacities on the basis of measuring the rate of information transmission and the complexity of transmitted messages. Animals' communication systems and cognitive abilities have long-since been a topic of

particular interest to biologists, psychologists, linguists, and many others, including researchers in the fields of robotics and artificial intelligence. The main difficulties in the analysis of animal language have to date been predominantly methodological in nature. Addressing this perennial problem, the elaborated experimental paradigm presented here has been applied to ants, and can be extended to other social species of animals that have the need to memorize and relay complex "messages". Accordingly, the method opens exciting new dimensions in the study of natural communications in the wild.

*The Complete Guide to Postgraduate Funding Worldwide* Springer

The arrest of Mikhail Khodorkovsky, the head of the Yukos oil company, on 25 October 2003, was a key turning point in modern Russian history. At that time Khodorkovsky was one of the world's richest and most powerful men, while Yukos had been transformed into a vast and lucrative oil company that was set to go global. On all counts, this looked like a success story, but it was precisely at this moment that the Russian authorities struck. After two controversial trials, attracting widespread international condemnation, Khodorkovsky was sentenced to fourteen years in jail. In this book, Richard Sakwa examines the rise and fall of Yukos, and the development of the

Russian oil industry more generally. Sakwa analyses Russia's emergence as an energy superpower, and considers the question of the 'natural resource curse' and the use of energy rents to bolster Russia as a great power and to maintain the autonomy of the regime. Crucially this book also examines the relationship between Putin's state and big business during Russia's traumatic shift from the Soviet planned economy to the market system. It is a detailed analysis of one of the most dramatic confrontations between economic and political power in our era, full of human drama and moral dilemmas. It is also a study of political economy, with the market and state coming into confrontation. Above all, the 'Yukos affair' continues to shape contemporary Russian politics, with a weakened judiciary and insecure property rights. It traces the struggles of the Putin era as two visions of society came into conflict. The attack on Khodorkovsky had - and continues to have - far-reaching political and economic consequences but it also raises fundamental questions about the quality of freedom in Putin's Russia as well as in the world at large.

*Proceedings of the Conference "Integrating Engineering Education and Humanities for Global Intercultural Perspectives", 25-27 March 2020, St. Petersburg, Russia* Palgrave Macmillan

This book highlights the vital necessity for combining sustainable development processes from different areas, with applications in areas such as science, education and production sectors. These sectors have previously been separated by linguistic and technological barriers. Breaking down these barriers will allow an interdisciplinary and transdisciplinary flow of information, leading to greater efficiency, and towards a more real resilient and sustainable economy development. This book fills in the gap in respect of publications addressing aspects of innovation and sustainable development and focuses on a range of areas, such as I. Gradual transition to innovative development; II. Continuity of technology in education, science and industry; III. Convergency directions, interdisciplinary relations in scientific research; IV. Digital technologies for sustainable development; V. Global trends and regional aspects of innovation and traditions in environmental management; VI. International legal regulations and environmental and economic relations among business communities. The publication fosters the global efforts towards taking better advantage of the many opportunities which innovation in specific areas may offer.

**Microwave and mmWave Engineering with Generalized Macroscopic Electrodynamics** Springer

This book presents contributions submitted to the 2nd international conference Going Global through Social Sciences and Humanities (GGSSH 2019) held in Tomsk, Russia on 27-28 February 2019. The conference focused on such issues as interdisciplinary pedagogy, language teaching and learning, cultural studies and linguistics, particularly highlighting global academic integration and professional development for research. As such, the event provided a platform for discussions and sharing publication activities, to help Russian academics to take first steps toward global research. Showcasing the ongoing Russian research in focus areas, this book is of interest to a diverse academic audience working in social sciences and humanities, particularly those from the post-Soviet countries.

**Dissertation Abstracts International** John Wiley & Sons

Some major developments of physics in the last three decades are addressed by highly qualified specialists in different specific fields. They include renormalization problems in QFT, vacuum energy fluctuations and the Casimir effect in different configurations, and a wealth of applications. A number of closely related issues are also considered. The cosmological applications of these theories play a crucial role and are at the very heart of the book; in particular, the possibility to explain in a unified way the whole history of the evolution of the Universe: from primordial inflation to the present day accelerated expansion. Further, a description of the mathematical background underlying many of the physical theories considered above is provided. This includes the uses of zeta functions in physics, as in the regularization problems in QFT already mentioned, specifically in curved space-time, and in Casimir problems as.

**In Honor of Emilio Elizalde** Springer Science & Business Media

This book features contributions to the XVIIth International Conference "Linguistic and Cultural Studies: Traditions and Innovations" (LKTI 2017), providing insights into theory, research, scientific achievements, and best practices in the fields of pedagogics, linguistics, and language teaching and learning with a particular focus on Siberian perspectives and collaborations between academics from other Russian regions. Covering topics including curriculum development, designing and delivering courses and vocational training, the book is intended for academics working at all levels of education striving to improve educational environments in their context - school, tertiary education and continuous professional development.

*The Khodorkovsky-Yukos Affair* Palgrave MacMillan

Handbook of Research on Curriculum Reform Initiatives in English Education IGI Global Lulu.com

This book presents papers from the International Conference on Integrating Engineering Education and Humanities for Global Intercultural Perspectives (IEEHGIP 2020), held on 25-27 March 2020. The conference brought together researchers and practitioners from various disciplines within engineering and humanities to offer a range of perspectives. Focusing on, but not limited to, Content and Language Integrated Learning (CLIL) in Russian education the book will appeal to a wide academic audience seeking ways to initiate positive changes in education.

**Current Practices, Challenges and Innovations** SAGE

When reading and writing medical and nursing texts, Health Care Professionals require an understanding of medical, hospital and everyday health terminology. As well as this, Health Care Professionals need to be able to write fluently in patient notes, in referral letters and when completing care plans or care pathways. English for Medical Purposes: Spelling and Vocabulary provides spelling tips for common errors and helps develop extensive glossaries in the areas of patient care encountered in hospitals and also in the community. Common phrases and collocations are listed to familiarise students with the language they will use both in the workplace and in academic writing.

**Designing Globally Networked Learning Environments** Cambridge University Press

This textbook is intended for a course in electromagnetism for upper undergraduate and graduate students. The main concepts and laws of classical macroscopic electrodynamics and initial information about generalized laws of modern electromagnetics are discussed, explaining some paradoxes of the modern theory. The reader then gets acquainted with electrodynamics methods of field analysis on the basis of wave equation solution. Emission physics are considered using an example of the Huygens-Fresnel-Kirchhoff canonic principle. The representation about strict electrodynamics task statement on the base of Maxwell equations, boundary conditions, emission conditions and the condition on the edge is given. Different classes of approximate boundary conditions are presented, which essentially simplify understanding of process physics. The canonic Fresnel functions are given and their generalization on the case of anisotropic impedance. The free waves in closed waveguides and in strip-slotted and edge-dielectric transmission lines are described. A large number of Mathcad programs for illustration of field patterns and its properties in different guiding structures are provided. The material is organized for self-study as well as classroom use.

*Oxford Business English Dictionary* Springer Science & Business Media

Understanding the Modern Russian Police represents the culmination of ten years of research and an ongoing partnership between the Volgograd Academy of Russian Internal Affairs Ministry (VA MVD) and the Volgograd branch of the Russian Presidential Academy of National Economy and Public Administration (VAPA). The book provides a timely and comprehensive analysis of the historical development, functions, and contemporary challenges faced by the modern Russian police. Spanning more than two centuries of history, the book covers: The tsarist police evolution that witnessed the creation of the Ministry of Internal Affairs of the Russian Federation (MVD) in 1802 and concluding with the 1917 October Revolution The Soviet era from the 1917 October Revolution until Stalin's death in 1953 The Khrushchev and Brezhnev periods, and the Soviet police's maturation into a professionally educated and well-equipped law enforcement system The transformational period of police development beginning with Gorbachev's perestroika and concluding with the first term of Putin in 2008 The structure, authority, and workforce of the modern Russian police Public-police relationships existing today in Russia Reports by Amnesty International and Human Rights Watch on corruption and abuse of power, along with a legal analysis of practices by the European Court of Human Rights (ECHR) The 2011 Police Reform by Medvedev The book concludes with some predictions on the future of the Russian police and its potential reforms. Encompassing the efforts of many great researchers from Russia, this exhaustive review of the history of policing in Russia enables readers to comprehend the societal and political forces that have shaped policing in this country.

**For Learners of English** Springer Nature

Medical Geology is a rapidly growing field concerned with the relationship between natural geological factors and human and animal health, as well as with improving our understanding of the influence of environmental factors on the geographical distribution of health problems. This book brings together the work of geoscientists and medical/public health researchers, which

addresses health problems caused, or exacerbated by geological materials (rocks, minerals, atmospheric dust and water) and processes (including volcanic eruptions and earthquakes. Among the environmental health problems discussed in this book are: exposure to toxic levels of trace essential and non-essential elements such as arsenic and mercury; trace element deficiencies; exposure to natural dusts and to radioactivity; naturally occurring organic compounds in drinking water; volcanic emissions, etc. The text also deals with the many health benefits of geologic materials and processes. This wide-ranging volume covers issues in medical geology all over the world with each author covering their respective region. It provides examples from different continents as well as a state-of-the-art review of the latest developments in the discipline. The authors are all recognized geoscientific and medical experts working in the field. The book is written for a wide variety of specialists from geologists, geochemists, pathologists and medical doctors to veterinarians and biologists.

*Contact Problems* Unesco

This book studies the role of civil society organisations in the fight against HIV/AIDS in Russia. It looks at how Russia's HIV/AIDS epidemic has developed into a serious social, economic and political problem, and how according to the United Nations Programme on HIV/AIDS (UNAIDS), Russia is currently facing the biggest HIV/AIDS epidemic in all of Europe with an estimated number of 980,000 people living with HIV in 2009. The book investigates civil society organisations' contribution to social change and civil society development in post-Soviet Russia, and thus situates a specific type of civil society actors into a broader socio-political context and questions their ability to represent civic interests, particularly in the field of social policy-making and health. This allows for a better understanding of the dynamics of state-society relations in present-day Russia, and gives insight into the ways HIV/AIDS NGOs in Russia have used transnational ties in order to exert influence on domestic policy-making in the field of HIV/AIDS.

**Relational Alternatives to Individualism** Cambridge Scholars Publishing

Educational pedagogy is a diverse field of study, one that all educators should be aware of and fluent in so that their classrooms may succeed. Curriculum Design and Classroom Management: Concepts, Methodologies, Tools, and Applications presents cutting-edge research on the development and implementation of various tools used to maintain the learning environment and present information to pupils as effectively as possible. In addition to educators and students of education, this multi-volume reference is intended for educational theorists, administrators, and industry professionals at all levels.

*The Politics of HIV/AIDS in Russia* CRC Press

This book deals with a number of critical issue in juvenile justice that have not been dealt with in extenso before

**Studying Animal Languages Without Translation: An Insight from Ants** IGI Global

The book presents the best contributions from the international scientific conference "Growth Poles of the Global Economy: Emergence, Changes and Future," which was organized by the Institute of Scientific Communications (Volgograd, Russia) together with the universities of Kyrgyzstan and various other cities in Russia. The 143 papers selected, focus on spatial and sectorial structures of the modern global economy according to the theory of growth poles. It is intended for representatives of the academic community: university and college staff developing study guides on socio-humanitarian disciplines in connection with the theory of growth poles, researchers, and undergraduates, masters, and postgraduates who are interested in the recent inventions and developments in the field. It is also a valuable resource for expert practitioners managing entrepreneurial structures in the existing and prospective growth poles of the global economy as well as those at international institutes that regulate growth poles. The first part of the book investigates the factors and conditions affecting the emergence of the growth poles of the modern global economy. The second part then discusses transformation processes in the traditional growth poles of the global economy under the influence of the technological progress. The third part examines how social factors affect the formation of new growth poles of the modern global economy. Lastly, the fourth part offers perspectives on the future growth of the global economy on the basis of the digital economy and Industry 4.0.

**The Blended Learning Book** Elsevier

'CLIL Activities' is organised into five chapters: activating, guiding understanding, focus on language, focus on speaking, and focus on writing. A further chapter provides practical ideas for assessment, review and feedback.

*Curriculum Design and Classroom Management: Concepts, Methodologies, Tools, and Applications*

Bloomsbury Publishing

The present book is based on presentations made during the IXth International School on Lexicography, "Multi-disciplinary Lexicography: Traditions and Challenges of the XXIst Century", at

Ivanovo State University, September 8-10, 2011, and continues a series of collective monographs devoted to the theoretical and practical problems of lexicography, published by Cambridge Scholars Publishing in 2007, 2009 and 2010. The scope of topics discussed in four parts (Dictionary as a Cross-road of Language and Culture, Dictionary Use and Dictionary Criticism, Terminology and

LSP Studies, and Projects of New Dictionaries) is rather wide and focuses on burning problems of European, Russian and world lexicography, as well as on projects of new dictionaries. This book will be of interest to theoreticians, practitioners, and students of linguistic faculties.
