Economics is the mother tongue of public policy. It dominates our decision-making for the future, guides multi-billion-dollar investments, and shapes our responses to climate change, inequality, and other environmental and social challenges that define our times. Pity

then, or more like disaster, that its fundamental ideas are centuries out of date yet are still taught in college courses worldwide and still used to address critical issues in government and business alike. That's why it is time, says renegade economist Kate Raworth, to revise our economic thinking for the 21st century. In *Doughnut Economics*, she sets out seven key ways to fundamentally reframe our understanding of what economics is and does.

Along the way, she points out how we can break our addiction to growth; redesign money, finance, and business to be in service to people; and create economies that are regenerative and distributive by design. Named after the now-iconic "doughnut" image that Raworth first drew to depict a sweet spot of human prosperity (an image that appealed to the Occupy Movement, the United Nations, eco-activists, and business leaders alike), *Doughnut Economics* offers a

radically new compass for guiding global development, government policy, and corporate strategy, and sets new standards for what economic success looks like. Raworth handpicks the best emergent ideas—from ecological, behavioral, feminist, and institutional economics to complexity thinking and Earth-systems science—to address this question: How can we turn economies that need to grow, whether or not they make us thrive, into economies that make us

thrive, whether or not they grow? Simple, playful, and eloquent, Doughnut Economics offers game-changing analysis and inspiration for a new generation of economic thinkers.

The International Standard Classification of Occupations 2008 (ISCO-08) is a four-level hierarchically structured classification that covers all jobs in the world.

Developed with the benefit of accumulated national and international

experience as well as the help of experts from many countries and agencies, ISCO-08 is fully supported by the international community as an accepted standard for international labour statistics. ISCO-08 classifies jobs into 436 unit groups. These unit groups are aggregated into 130 minor groups, 43 sub-major groups and 10 major groups, based on their similarity in terms of the skill level and skill specialisation required for the jobs. This allows the production of relatively

detailed internationally comparable data as well as summary information for only 10 groups at the highest level of aggregation. Each group in the classification is designated by a title and code number and is associated with a definition that specifies the scope of the group. The classification is divided into two volumes: Volume I presents the structure and definitions of all groups in ISCO-08 and their correspondence with ISCO-88, which it supersedes, while Volume

It provides an updated and expanded index of occupational titles and associated ISCO-08 and ISCO-88 codes.

International superstar Yrsa Sigurdardottir has captivated the attention of readers around the world with her mystery series featuring attorney Thora Gudmundsdottir. Now, Yrsa will stun readers once again with

this out-of-this-world ghost story that will leave you shivering. In an isolated village in the Icelandic Westfjords, three friends set to work renovating a rundown house. But soon, they realize they are not as alone as they thought. Something wants them to leave, and it's making its presence felt. Meanwhile, in a town across the fjord, a young doctor investigating the suicide of an elderly woman discovers that she was obsessed with his vanished son. When the

two stories collide, the terrifying truth is uncovered. In the vein of John Ajvide Lindqvist, this horrifying thriller, partly based on a true story, is the scariest novel yet from Yrsa Sigurdardottir, who has taken the international crime fiction world by storm. The film rights have been sold to Sigurjon Sighvatsson, a Hollywood-based Icelandic film producer who has produced such films as *Brothers* and *Arlington Road*.

Capitalism has been an unprecedented engine of wealth creation for many centuries, leading to sustained productivity gains and long-term growth and lifting an increasing part of humanity out of poverty and subsistence. But its effects, and hence its future, have come increasingly under question: Is capitalism still improving the wealth and well-being for the many?

Or, has it become destructive for the economy, where long-term value creation is being sacrificed to the pressures of short-termism; for society, where the gap between rich and poor has increased and opportunities to lift oneself out of poverty have dwindled; and for the natural environment, which seems increasingly under threat with unforeseen consequences for prosperity and global order? This volume reflects both the urgency

of the needed action and the opportunity to achieve a wide-ranging agreement and lasting movement towards a more responsible, equitable, and sustainable model of capitalism in order to ensure its very survival. The volume is unique in that it brings together many of the leading proponents for a reformed, re-imagined capitalism from the fields of academia, business, and NGOs. Its contributors have been at the forefront of thought and action in regard to the future of

capitalism. Both individually and collectively, they provide powerful suggestions of what such a long-term oriented model of capitalism should look like and how it can be achieved. Drawing on their research and/or professional experience, they write in an accessible way aiming to reach the broad audiences required to turn a re-imagined capitalism into a reality.

Jonathan Aviv, renowned ENT physician and author of The Acid Watcher Diet, supplies readers with new recipes and advice on how to stay acid-free and

reverse inflammation for optimal health. In The Acid Watcher Diet, Dr. Jonathan Aviv gave acid reflux sufferers a pathway to healing, helping them identify the silent symptoms of acid damage and providing a two-phase eating and lifestyle plan to reduce whole-body acid damage and inflammation. Now, The Acid Watcher Cookbook widens the possibilities of what acid watchers can eat without repercussions. For many people struggling with acid damage, acidic foods like

tomatoes, citrus fruits, vinegar, and reflux-inducing foods like raw onion and garlic, and chocolate are off-limits. After hearing patient after patient bemoaning the loss of vinaigrette, tomato sauce, ketchup, guacamole, and other staples, Dr. Aviv and coauthor Samara Kaufmann Aviv developed an innovative method of cooking that combines acidic foods with alkaline foods so that acidity is neutralized. By following a few simple guidelines, anyone will be able to

enjoy dishes that had previously exacerbated their acid reflux symptoms. The 100 new Acid Watcher-approved recipes included in this comprehensive cookbook are delicious, safe, and anti-inflammatory, allowing readers to reclaim the foods they love without risking their health.
