 IMPLICATIONS ... Contrastive Analysis And Error  
 Analysis Contrastive analysis does not provide for the possibility  
 that the learner actively sets about the learning task, but rather  
 sees the learner as a passive recipient of language interference  
 operating in a mechanistic fashion outside the learner's control.  
 Secondly, contrastive analysis assumed that error derives  
 exclusively from first language interference. Error analysis  
 studies, however, have indicated that certain errors recur among  
 language learners of Contrastive Analysis, Error Analysis,

 years have seen the decline in popularity of contrastive analysis  
 (CA) and the rise of error analysis (EA) as a method for explaining  
 and predicting errors in second language learning. In CA, it is felt  
 that by comparing the structure of a first language (L1) to that of  
 one being learned (L2), errors can be predicted. Problems in

 Contrastive Analysis was used extensively in the field of Second  
 Language Acquisition (SLA) in the 1960s and early 1970s, as a  
 method of explaining why some features of a Target Language  
 were more difficult to acquire than others. Contrastive analysis -  
 SlideShare It thus became clear that contrastive analysis could not  
 predict all learning difficulties, but was certainly useful in the  
 retrospective explanation of errors. In response to the above  
 criticisms, a moderate version of the Contrastive Analysis  
 Hypothesis (CAH) has developed which paradoxically contradicts  
 Lado's original claim. Contrastive analysis - Wikipedia Lado (1957)  
 claimed that contrastive analysis (CA) can predict areas and  
 degrees of difficulty for the second language learner according to  
 the degree of difference between the learner's L1 ... (PDF)

 Teaching Contrastive analysis suffers from under prediction and  
 over prediction. It cannot find out the errors which are committed  
 by the learners due to overgeneralization. CA is inadequate to  
 predict the interference problems of a language learner.
