*Adaptive Backstepping Sliding Mode Control of the Hybrid ...*

These techniques are a) Adaptive backstepping sliding mode control and b) Nonlinear disturbance observer based backstepping sliding mode control. Adaptive backstepping sliding mode control estimates the system uncertainties and disturbance using an adaptive law. Lyapunov theory is used to define the adaptive law for the convergence of tracking ...

*Nonlinear disturbance observer based adaptive super ...*

The designed observer-based adaptive sliding mode controller not only can adapt the unknown upper bounds of matched nonlinearity and disturbance but also the reachability of system state trajectories, and the error state system can be satisfied. Meanwhile, the stochastic stability of the closed-loop system can be guaranteed.

**Adaptive Estimation for Uncertain Nonlinear Systems: A ...**

The output feedback control issue is addressed for a class of non-affine nonlinear systems in this paper. In the situation that the internal states of the system are not available, we design a neural...

**Adaptive sliding-mode observer for second order discrete ...**

An adaptive super twisting sliding mode controller (ST-SMC) is designed based on system states and estimated disturbance. The nonlinear disturbance observer (NDO) estimates the mismatch between the electrical and mechanical power and then the estimated value is employed in the controller design to compensate the disturbance.

**Observer Based Adaptive Neuro-Sliding Mode Control for ...**

This paper contributes with a nonlinear adaptive sliding-mode observer based on a nonlinear parameter identification algorithm for uncertain nonlinear systems. The proposed nonlinear adaptive sliding-mode observer is a modified version of that one proposed in [24]. Such a modification lies in Adaptive sliding-mode observer for second order ...

**Nonlinear Disturbance Observer Based Adaptive Integral ...**

In this paper, a stable adaptive neural sliding mode controller is developed for a class of multivariable uncertain nonlinear systems. For these systems not all state variables are available for measurements.

*Sliding mode control - Wikipedia*

In this paper, the nonlinear observer based tracking control is addressed for a quadrotor with system uncertainties and external disturbances.

*Nonlinear Disturbance Observer-Based Adaptive Sliding Mode ...*

The proposed an adaptive backstepping sliding mode control based on nonlinear disturbance observer (ABSMC + NDO) has two main advantages: First, the NDO is utilized to compensate for the mismatched disturbances in the virtual control law. Second, it not only alleviates the chattering problem but also improves tracking precision.

*Nonlinear disturbance observer based adaptive super ...*

study. An adaptive super twisting sliding mode controller (ST-SMC) is designed based on system states and estimated disturbance. The nonlinear disturbance observer (NDO) estimates the mismatch between the electrical and mechanical power and then the estimated value is employed in the controller design to compensate the disturbance.

*Nonlinear disturbance observer based adaptive super ...*

**Perturbation observer-based adaptive passive control for ...**

An adaptive sliding-mode observer is proposed by for a class of nonlinear systems with unknown parameters and faults. Based on the main properties of the sliding-mode observers, an asymptotic fault reconstruction is given taking into account that the relative degree of the output, with respect to the fault, is equal to one.

**Nonlinear Adaptive Observer Based Sliding**

In this paper, a perturbation observer-based adaptive passive control scheme is developed to provide great robustness of nonlinear systems against the unpredictable uncertainties and

disturbances therein. The proposed scheme includes a high-gain perturbation observer and a robust passive controller.

*Observer based adaptive neuro-sliding mode control for ...*

In [31], an observer-based adaptive sliding mode controller was designed to guarantee the stability of the closed-loop nonlinear Markovian jump system. In [32], the composite control method was ...

In control systems, sliding mode control is a nonlinear control method that alters the dynamics of a nonlinear system by application of a discontinuous control signal that forces the system to "slide" along a cross-section of the system's normal behavior. The state-feedback control law is not a continuous function of time. Instead, it can switch from one continuous structure to another based on the current position in the state space. Hence, sliding mode control is a variable structure control m

*Observer-based adaptive sliding mode control for nonlinear ...*

A composite control method is proposed based on adaptive terminal sliding mode control and disturbance observer theory for a class of high-order nonlinear dynamic systems.

**[DOC] Nonlinear Adaptive Observer Based Sliding Mode ...**

/ Adaptive sliding-mode observer for second order discrete-time MIMO nonlinear systems based on recurrent neural-networks. In: International Journal of Machine Learning and Cybernetics. 2019 ; Vol. 10, No. 10. pp. 2851-2866.
