The Namibian constitution makes full provision for education as a fundamental human right and freedom. Three years into independence, as part of the government's educational policy, the 'Education for All Policy' was launched as a stepping stone to free quality education. However, inequities have become widely pronounced within the Namibian educational system. Democracy and Education in Namibia and beyond debates the education-democracy nexus in Namibia and the southern African context. It defines and explores the meaning of democracy and related concepts. It also looks at what democracy means in the context of human rights and access to education. The ten chapters in this collection interrogate the strengths and limitations of education as an instrument of social change and question whether or not the Namibian educational objectives and practices do develop and help to sustain a democratic culture in Namibia. The authors in the collection have drawn material from their own teaching and research experience across the fields of education and social science in Namibia and beyond, and present their findings in a pedagogical framework suitable as a challenging text for tertiary students. At a time when education is in crisis, especially in South Africa where strident calls for free tertiary education and Africanisation of the curriculum are spreading like wildfire, this book gives scholarly insight into the history and social conditions that gave rise to our current predicament.

An examination of how language functions in CLIL, based on a corpus of classroom interactions. Drawing on their wide experience as CLIL educators and researchers, the authors explore data collected in real CLIL classrooms from two interrelated perspectives: the CLIL classroom as an interactional context for developing language and content, and the genres and registers through which the meanings of the different academic subjects are enacted. From the analysis of this corpus of data, the authors provide a rich description of how CLIL students' language works and may be expected to develop. Also available separately as a hardback.

*Teaching Ethics through Literature* provides in-depth understanding of a new and exciting shift in the fields of English education, Literature, Language Arts, and Literacy through exploring their connections with ethics. The book pioneers an approach to integrating ethics in the teaching of literature. This has become increasingly relevant and necessary in our globally connected age. A key feature of the book is its integration of theory and practice. It begins with a historical survey of the emergence of the ethical turn in Literature education and grounds this on the ideas of influential Ethical Philosophers and Literature scholars. Most importantly, it provides insights into how teachers can engage students in ethical concerns and apply practices of Ethical Criticism using rich on-the-ground case studies of high school Literature teachers in Australia, Singapore and the United States.

Theme-based learning is a way of teaching and learning, whereby many areas of the curriculum are connected together and integrated within a theme. For Chinese International exams, like IGCSE, IB, are evolving into Theme-based curriculum. Students develop the ability to communicate in the target language through the study of language, themes and texts. In this edition, we added more vocabulary and give the HSK classification, both Version 2009 and the latest Version 2021. Within each topic, the vocabulary are arranged by HSK V2021 levels. This will give teachers a guidance for difficulty level and allow students to set priority on the vocabulary they should know to read, write or both. Based on HSK (version 2009 and the latest version 2021), we edited a series of Chinese Vocabulary for those who are studying Chinese or preparing international examinations, such as IB, SAT, AP, IGCSE, GCSE Chinese.
