The World Social Forum and Its "others" Routledge

How should international law approach the critical issue of movement of peoples in the 21st century? This book presents a radical reappraisal of this controversial problem. Challenging present-day ideas of restrictions on freedom of movement and the international structure that controls entry to states, it argues for a new blueprint for international migration policy that eliminates waste, aids both developing and developed societies and brings attendant benefits to voluntary migrants and involuntary refugees alike. In a world of increasing disorder, it is suggested that current policy only adds to international instability and threatens the interests of a functional global community.

The Political Economy of International Criminal Law SAGE Publications

This book offers an accessible introduction to comparative criminal justice and examines and reflects on the ways different countries and jurisdictions deal with the main stages in the criminal justice process, from policing to sentencing. This popular bestseller has been fully updated and expanded for the third edition. This textbook provides the reader with: a comparative perspective on criminal justice and its main components; a knowledge of methodology for comparative research and analysis; an understanding of the emerging concepts in comparative criminal justice, such as security,

surveillance, retribution and rehabilitation; a discussion of global trends such as the global drop in crime, the punitive turn, penal populism, privatization, international policing and international criminal tribunals. The new edition has been fully updated to keep abreast with this growing field of study and research, including increased coverage of the challenge of globalization and its role and influence on criminal justice systems around the world. Topics such as state crime, genocide and the international criminal court have also grown in prominence since the publication of the last edition and are given increased coverage. This book will be perfect reading for advanced undergraduates and postgraduates taking courses in comparative criminal justice and those who are engaged in the study of global responses to crime. New features such as lists of further reading, study questions and boxed case studies help bring comparative criminal justice alive for students and instructors alike.

The Political Economy of International Criminal Law Routledge

"With specific focus on three environmental regimes, this book explores the way that various notions of justice feature both implicitly and explicitly in the design of global environmental policies. In so doing, the dominant conceptions of justice that underpin these policies are identified and, in turn, criticised on the basis of their compatibility with the normative essence of global sustainable development. The book demonstrates that, although moral norms have a far greater impact on regime development than is currently acknowledged, the core policies for the most part remain rooted in two neoliberal interpretations of justice, both of which undermine the ability to achieve sustainable development and international justice."--BOOK JACKET.

Making Sense of Difference Routledge

The increasingly important topic of comparative criminal justice is examined from an original and insightful perspective by one of the top scholars in the field. Addressing the need for a globalized criminology, David Nelken looks at why we should study crime and criminal justice in a comparative and international context, and the difficulties we encounter when we do. Evaluating 'global' trends in crime, risk and security, the book draws upon the author's experience of working in a number of settings around the world. A range of case studies are included to illustrate the discussion, covering areas such as white collar crime, juvenile delinquency, and organized crime.

This book aims to meet the need for an accessible introductory text on comparative criminal justice, examining the ways different countries and jurisdictions deal with the main stages and elements in the criminal justice process, from policing through to sentencing. Examples are taken from all over the world, with a particular focus on Europe, the UK, the United States and Australasia. The main aims of the book are to provide the reader with: a comparative perspective on criminal justice and its main components an understanding of the increasing globalization of justice and standards of the administration of justice a knowledge of methodology for comparative research and analysis an understanding of the most important concepts in criminal justice (such as inquisitorial and adversarial trial systems, policing styles, crime control versus due process, retribution versus rehabilitation etc) discussion of global trends such as the rise of imprisonment, penal populism, diversion, international policing and international tribunals an insight into what the essential ingredients of doing justice might be. This fully updated and expanded new edition of *Comparative Criminal Justice* takes into account the considerable advances in comparative criminal justice research since the first edition in 2004. Each chapter has been thoroughly updated and in addition, there is a new chapter on establishing the rate of crime in a comparative context. The rate of development in international policing and international development has been such that there is now an individual chapter devoted to each; and throughout the book, the role of globalization, changing both the local and the global in criminal justice arrangements, orientations and discourses, has now been given the prominence it deserves.

Civil society activism around issues of global justice has proliferated in Europe during the past two decades. Has such contestation and advocacy made a difference? This book examines whether and how the organizations, networks and campaigns involved have attained their policy objectives in the areas of debt relief, international trade, international taxation and corporate accountability. The analysis also considers the relationship between national and transnational activism. By comparing variations in the "activism-policy nexus" in France, Italy and the United Kingdom, it seeks to understand how such interaction and policy outcomes vary in different institutional and political contexts.

Comparative and International Criminal Justice Systems: Policing, Judiciary, and Corrections, Third Edition examines the history, dynamics, structure, organization, and processes in the criminal justice systems in a number of selected countries. Designed for courses in comparative criminal justice systems, comparative criminology, and international criminal law, it explores systems in the United States, Ireland, Israel, Argentina, Sierra Leone, China, Russia, and Poland. A descriptive and quantitative analysis of criminal justice processes, this text goes beyond a mere analysis of individual systems. Instead, the book compares these criminal justice models with each other and contrasts them with: United Nations conventions World Courts of Justice International Court of Justice International Military Tribunal International Criminal Tribunal International Criminal Court Understanding these comparisons is crucial for a proper grasp of transnational crimes. The book shows how the national criminal justice systems and the United Nations judicial systems complement each other when adjudicating transnational crimes in the international community. It analyzes the nature of crime and criminal law, explores basic theories of crime, and discusses the various sources of international law. It also examines the inherent pitfalls in comparing international crime rates and discusses terrorism and its control. Unique to this edition is a thorough, unbiased study of the Islamic justice system. Each chapter focuses on a select region and includes crime data and arrest, prosecution, and conviction rates where appropriate. This allows readers looking for information on the criminal justice systems of any part of the world to easily find the relevant section. A sound approach to understanding the laws of various nations, and international, criminal, and humanitarian laws, this volume provides sage insight into the sociological explanations of criminal law and crime.

What is this thing called Global Justice? Routledge

The use of comparisons to explain, analyze and understand social and economic phenomena is recognized as a valuable social science tool. This textbook deals with the differences in management and organization between nations and their effects on multinational enterprises. In comparing management practice across the world, the authors cover themes such as national cultures, diversity and globalization. Students are guided through the key business disciplines, providing a broad introduction to the field and including truly global coverage. With student and instructor friendly resources such as chapter summaries, mini-case scenarios, larger case studies and power-point slides, this book is core reading for students of international business and international management.

A Topical Approach Jones & Bartlett Publishers

For junior/senior-level courses in Comparative (or International) Criminal Justice Systems, Comparative Criminology, and Comparative Government. Unique in approach, this is the only comparative criminal justice text that follows a natural progression from law, police, courts, to corrections, and

that explores these topics, individually, by using over 30 different countries to show the different ways policing, adjudication, and corrections can be carried out.

The book consists of the keynote papers delivered at the 2012 WG Hart Workshop on Globalisation, Criminal Law and Criminal Justice organised by the Queen Mary Criminal Justice Centre. The volume addresses, from a cross-disciplinary perspective, the multifarious relationship between globalisation on the one hand, and criminal law and justice on the other hand. At a time when economic, political and cultural systems across different jurisdictions are increasingly becoming or are perceived to be parts of a coherent global whole, it appears that the study of crime and criminal justice policies and practices can no longer be restricted within the boundaries of individual nation-states or even particular transnational regions. But in which specific fields, to what extent, and in what ways does globalisation influence crime and criminal justice in disparate jurisdictions? Which are the factors that facilitate or prevent such influence at a domestic and/or regional level? And how does or should scholarly inquiry explore these themes? These are all key questions which are addressed by the contributors to the volume. In addition to contributions focusing on theoretical and comparative dimensions of globalisation in criminal law and justice, the volume includes sections focusing on the role of evidence in the development of criminal justice policy, the development of European criminal law and its relationship with national and transnational legal orders, and the influence of globalisation on the interplay between criminal and administrative law.

Global Justice and Social Conflict SAGE Publications

Comparative and International Policing, Justice, and Transnational Crime provides a rich reservoir of thought-provoking original articles written by international criminal justice, policing, and legal scholars. Many of the articles not only share a central theme (e.g., the policing of dependent sovereignties) but also focus on how various issues are addressed by international treaties and policing or law enforcement agencies. The articles are drawn from historical, contemporary, and controversial topics. The main objectives are to provide students with a comprehensive understanding of various international issues, from historical to contemporary perspectives; incorporate topics that are important, yet ignored in many international criminal justice books; and generate scholarly discussion among students.

Law and Justice around the World is designed to introduce students to comparative law and justice, including cross-national variations in legal and justice systems as well as global and international justice. The book draws students into critical discussions of justice around the world today by: taking a broad perspective on law and justice rather than limiting its focus to criminal justice systems examining topics of global concern, including governance, elections, environmental regulations, migration and refugee status, family law, and others focusing on a diverse set of global examples, from Europe, North America, East Asia, and especially the global south, and comparing the United States law and justice system to these other nations continuing to cover core topics such as crime, law enforcement, criminal courts, and punishment including chapter goals to define learning outcomes sharing case studies to help students apply concepts to real life issues Instructor resources include discussion questions; suggested readings, films, and web resources; a test bank; and chapter-by-chapter PowerPoint slides with full-color maps and graphics. By widening the comparative lens to include nations that are often completely ignored in research and teaching, the book paints a more realistic portrait of the different ways in which countries define and pursue justice in a globalized, interconnected world.

Substate nationalism, especially in the past fifteen years, has noticeably affected the political and territorial stability of many countries, both democratic and democratizing. Norms exist to limit the behavior of collective agents in relation to individuals; the set of universally accepted human rights provides a basic framework. There is a lacuna in international law, however, in the regulation of the behavior of groups toward other groups, with the exception of relations among states. The book offers a normative approach to moderate minority nationalism that treats minorities and majorities in multinational states justly and argues for the differentiation of group rights based on how group agents are constituted. It argues that group agency requires a shared set of beliefs concerning membership and the social ontology it offers ensures that group rights can be aligned with individual rights. It formulates a set of principles that, if adopted, would aid conflict resolution in multinational states. The book pays special attention to national self-determination in transitional societies. The book is intended for everyone in political philosophy and political science interested in global justice and international law and legal practitioners interested in normative issues and group rights

International criminal justice is in transition. This book explores the growing internationalisation of criminal justice as a phenomenon of global governance. It provides students with a critical understanding of the international institutions for regulating transnational crime, the development of alternative justice processes across the globe, and international and supra-national co-operation criminal justice policies and practices. Key topics covered include: The historical development of International Criminal Justice institutions and traditions International Restorative Justice Victim communities and collaborative justice The relationship between crime and war International Human Rights The 'War on Terror' The globalisation of crime and control Developments in global governance, communitarian justice and accountability This text will familiarize students with the literature and debates surrounding international criminal justice and enable them to critically appreciate their theoretical and policy context. In doing so, it encourages students to assess the strengths and weaknesses of different approaches to the study of global justice and the analysis of comparative policy convergence and research. It will also help students to reflect on, and communicate in an informed and critical way theoretical accounts and

empirical studies within the field of international criminal justice. This book will be essential reading for upper level undergraduates taking courses in criminal law, international relations and governance and postgraduates engaged in international criminal justice, international law, regulation and governance and human rights.

Global Justice Activism and Policy Reform in Europe Cambridge University Press

This book analyzes the World Social Forum (WSF) in a context of crisis and transition in the history of Western capitalist modernity. Based on ten years of fieldwork on three continents, this book treats social movements as knowledge producers. It pays attention to what movements are doing and saying on the terrain of the WSF over time and from place to place, and to how they theorize its significance. Framed by the Latin American modernity-coloniality perspective, the book critically engages with discourses of global civil society, autonomism, and transnational feminism toward a reading of the WSF through the lens of 'colonial difference'. Each chapter outlines a set of contestations and contributions with relevance beyond debates about the WSF. It will be of strong interest to students and scholars of social movement studies; international politics; post-colonial studies; gender studies; sociology; political theory and social work.

Empire, Race and Global Justice Routledge

Global Justice Reform critiques and rethinks two neglected subjects: the nature of comparison in the field of comparative law and the struggles of national judicial systems to meet global rule of law objectives. Hiram Chodosh offers a candid look at the surprisingly underdeveloped methodology of comparative legal studies, and provides a creative conceptual framework for defining and understanding the whys, whats, and hows of comparison. Additionally, Chodosh demonstrates how theories of comparative law translate into practice, using contemporary global justice reform initiatives as a case study, with a particular focus on Indonesia and India. Chodosh highlights the gap between the critical role of judicial institutions and their poor performance (for example, political interference, corruption, backlog, and delay), discussing why reform is so elusive, and demonstrating the unavoidable and essential role of comparison in reform proposals. Throughout the book, Chodosh identifies several sources of comparative misunderstanding that impede successful reforms and identifies the many predicaments reformers face, detailing a wide variety of designs, methods, and social dilemmas. In response to these seemingly insurmountable challenges, Chodosh advances some novel conceptual strategies, first by drawing on a body of non-legal scholarship on self-regulating, emergent systems, and then by identifying a series of anti-dilemma strategies that draw upon insights about the nature of comparison.
