Cooper demonstrates how the lure of the open air, from rooftop schoolrooms to open-air theaters to the front porch, challenged air conditioning. Americans were slow to give up the social rituals

of hot-weather living - the cold drink, the cool clothes, the summer vacation - for the comforts of either the window air conditioner or the central system.

Earth tubes (earthtubes, or earth-air tubes) are underground tubes that use geothermal energy to cool or heat temper the air for your home. It works like cheap air conditioning because you can build it yourself for several hundred dollars and it is FREE to run (no electricity needed). Being completely passive, this is a sustainable technology based on designs that are 3,000 years old and still used today around the world to cool homes.

Brady loves life on the Chesapeake Bay with his friends J.T. and Digger. But developers and rich families are moving into the area, and while Brady befriends some of them, like the DiAngelos, his parents and friends are bitter about the changes. Tragedy strikes when the DiAngelos' kayak overturns in the bay, and Brady wonders if it was more than an accident. Soon, Brady discovers the terrible truth behind the kayak's sinking, and it will change the lives of those he loves forever. Priscilla Cummings deftly weaves a suspenseful tale of three teenagers caught in a wicked web of deception.

Are You Ready to Embrace the Challenge of Change? In his seventy-five business-years, author Oz Mutz has seen a lot of change. From the development of atomic energy to the moon landing to a lifetime of enriching family events. Each has brought with it the challenge of change and left the world a different place. Oz documents what can happen when a person embraces the challenges that change brings and uses them to positively influence the generation that follows. As "the wizdom of Oz" says, the future belongs to the next generation, not the current one, and our responsibility is to help them make decisions that are "informed, intentional, and purposeful." If you desire to leave an influential inheritance for the upcoming generation, *Challenge of Change* will help show you how to work with dauntless energy to achieve that goal.

Air Conditioning and Refrigeration Equipment: Production, Consumption, Trade Penguin

This “ambitious [and] delightful” (The New York Times) work of literary nonfiction interweaves the science and history of the powerful refrigerant (and dangerous greenhouse gas) Freon with a haunting meditation on how to live meaningfully and morally in a rapidly heating world. In *After Cooling*, Eric Dean Wilson braids together air-conditioning history, climate science, road trips, and philosophy to tell the story of the birth, life, and afterlife of Freon, the refrigerant that ripped a hole larger than the continental United States in the ozone layer. As he traces the refrigerant’s life span from its invention in the 1920s—when it was hailed as a miracle of scientific progress—to efforts in the 1980s to ban the chemical (and the resulting political backlash), Wilson finds himself on a journey through the American heartland, trailing a man who buys up old tanks of Freon stockpiled in attics and basements to destroy what remains of the chemical before it can

do further harm. Wilson is at heart an essayist, looking far and wide to tease out what particular forces in American culture—in capitalism, in systemic racism, in our values—combined to lead us into the Freon crisis and then out. “Meticulously researched and engagingly written” (Amitav Ghosh), this “knockout debut” (New York Journal of Books) offers a rare glimpse of environmental hope, suggesting that maybe the vast and terrifying problem of global warming is not beyond our grasp to face.

Whether you are a grassy green, brand new, junior HVAC technician trying to convince your first customer that they really do need to replace that six year old, hair encrusted air filter for ten dollars, or you're a full time, briefcase carryin', bowtie wearin', dyed in the wool snake oil salesman, trying to close the deal on a ten ton, 86 SEER, 4 stage, tri-fuel super heat pump with dual flux-capacitors in a single-wide trailer park, you have probably never been taught the basics of how to sell anything. One day a supervisor of yours just said "Jack's out today, so I need you to get over to Mrs. Fenabola's house, and sell her a furnace!" Yeah, that's the way it happened for most of us. Well, this is your chance to go back and learn those all important little details that no one ever told you about sales. Things like, where to find leads, how to speak to customers so they trust you enough to say "yes", how and when to close the sale, or what closing the sale even means! Got a clue about closing ratios? How about gross profit? Believe it or not, most salesmen don't even know if their jobs are profitable! Oh, and I know that you don't like to read too much; neither do I, so, I promise that this

will be painless, teach you a few things to help increase your sales, and be at least slightly entertaining. In fact, this might actually be the easiest and most effective thing you ever do for your career! Aren't you the smarty pants now!
