Get What's Yours AMACOM

Rich or poor, young or old, high school or college grad, this book, written by economist Laurence J. Kotlikoff and syndicated financial columnist Scott Burns, can change your life for the better! If you follow the advice in this book, it will raise your living standard (possibly by a lot), improve your lifestyle, and help you spend 'til the end. And it will completely transform your financial thinking, turning every bit of conventional financial wisdom on its head. If this sounds like a revolution in financial planning, you got it. So do The New York Times, The Washington Post, The Wall Street Journal, USA Today, Time, Consumer Reports, and other top publications that have been featuring the authors' economics-based "consumption smoothing" approach to financial planning. Spend 'Til the End substitutes economic wisdom for the "rules of dumb" that currently pass for financial advice. In the process it indicts the investment and financial-planning industry for giving most people saving and insurance targets that are much too high and then convincing them to invest in risky mutual funds and expensive insurance policies. The result is that most people are scrimping and saving during the years when they could be spending and enjoying their money -- and with no sure payoff. Easy to read, this book is packed with practical and often shocking advice on whether to work, how to pick a career, which job to take, where to live, what sort of house to buy, how much to save, when to retire, which kind of retirement account to use, whether to have kids, whether to divorce, when to take Social Security, how fast to spend down your

assets in retirement, and how to invest.

This all-new edition of the seminal book on navigating the multigenerational workplace takes a fresh look at a growing challenge, now exacerbated by the youngest employees. With their micromanaged childhoods and tech addictions, Gen Yers require constant feedback-frustrating for the Me Generation that can't let go of the spotlight, and annoying for Gen Xers, sandwiched between the two. So how can you lead this motley group with their often incompatible work ethics, values, and styles? *Generations at Work* lays bare the causes of conflict, and offers practical guidelines for managing the differences, including: * In-depth interviews with members of each generation * Best practices from companies bridging the generation gap * Specific tips for each generation on how to handle the others * A field guide for mentoring Generation Y For anyone struggling to manage a workforce with different ways of working, communicating, and thinking, *Generations at Work* is the answer.

Generation A is set in the near future in a world where bees are extinct, until five unconnected people all around the world— in the United States, Canada, France, New Zealand, and Sri Lanka—are all stung. Their shared experience unites them in ways they never could have imagined. Generation A mirrors Coupland's debut novel, 1991's *Generation X*. It explores new ways of storytelling in a digital world. Like much of Coupland's writing, it occupies the perplexing hinterland between optimism about the future and everyday apocalyptic paranoia. Imaginative, inventive, and fantastically entertaining, *Generation A* is his most ambitious work to date.

The realities of mounting government debt, tax burdens, and an aging population raise serious concerns about the financial legacy confronting future generations. How great a fiscal burden will current policies leave to subsequent generations, and how might changes in those policies alter the intergenerational distribution of public welfare? Generational accounting has recently emerged as a robust new method of fiscal analysis and planning designed to assess the long-term sustainability of fiscal policy and to measure the extent of the financial load ultimately borne by present and future generations. A seminal contribution to public economics, generational accounting has already been adopted by 23 nations around the world. Combining the latest and most extensive country-by-country generational analyses with a comprehensive review of generational accounting's innovative methodology, these papers are a consummate resource for economists, political scientists, and policy makers concerned with fiscal health and responsibility.

Members of each generation share special signposts: collective experiences that influence our expectations, actions, and mind-sets. They also mold our ideas about company loyalty, work ethic, and the definition of a job well done. And now that five different generations are working together simultaneously—from Traditionals to Generation Y and beyond—it's even more important to understand where everyone's coming from. Written by two generational experts—who happen to be father and daughter—Generations, Inc. offers the perspectives of people of different eras, eliciting practical insights on wrestling with generational issues in the workplace. The book provides Baby Boomers and Linksters alike with practical techniques for: Addressing conflicts * Forging alliances with coworkers from other generations * Getting people with disparate values and idiosyncratic styles to work together * Running productive meetings in which all participants find value in each others' ideas Generations, Inc. provides realistic strategies for all those managers, executives, and employees seeking to coexist, flourish, and thrive together...at the same time.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

Clash of the Generations MIT Press

This is the first time in American history that we have had four different generations working side-by-side in the workplace: the Traditionalists (born before 1945), the Baby Boomers (born 1945-1964), Gen X (born 1965-1980), and the Millennials (born 1981-2001). Haydn Shaw, popular business speaker and generational expert, has identified 12 places where the 4 generations typically come apart in the workplace (and in life as well). These sticking points revolve around differing attitudes toward managing one's own time, texting, social media, organizational structure, and of course, clothing preferences. If we don't learn to work together and stick together around these 12 sticking points, then we'll be wasting a lot of time fighting each other instead of enjoying a friendly and productive team. *Sticking Points* is a must-read book that will help you understand the generational differences you encounter while teaching how we can learn to speak one another's language and get better results together.

One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated Cities can make us sick. They always have—diseases spread more easily when more people are close to one another. And disease is hardly the only ill that accompanies urban density. Cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on. But cities have flourished nonetheless because they are humanity's greatest invention, indispensable engines for creativity, innovation, wealth, and connection, the loom on which the fabric of civilization is woven. But cities now stand at a crossroads. During the global COVID crisis, cities grew silent as people worked from home—if they could work at all. The normal forms of socializing ground to a halt. How permanent are these changes? Advances in digital technology mean that many people can opt out of city life as never before. Will they? Are we on the brink of a post-urban world? City life will survive but individual cities face terrible risks, argue Edward Glaeser and David Cutler, and a wave of urban failure would be absolutely disastrous. In terms of intimacy and inspiration, nothing can replace what cities offer. Great cities have always demanded great management, and our current crisis has exposed fearful gaps in our capacity for good governance. It is possible to drive a city into the ground, pandemic or not. Glaeser and Cutler examine the evolution that is already happening, and describe the possible futures that lie before us: What will distinguish the cities that will flourish from the ones that won't? In America, they argue, deep inequities in health care and education are a particular blight on the future of our cities; solving them will be the difference between our collective good health and a downward spiral to a much darker place.

Many undergraduate texts treat macroeconomics as a set of distinct topics rather than as a unified body of theory and empirical findings. In contrast, this text by Alan Auerbach and Laurence Kotlikoff uses a single analytic framework—the two-period life-cycle model—to explore and connect each of the major issues in contemporary macroeconomics. The model describes the evolution of the economy over time in terms of the behavior of overlapping generations of individuals, each of whom lives for two periods: youth and old age. This versatile framework can encompass most macroeconomic schools of thought through the alteration of key assumptions. The use of one basic model also allows the authors to explore important topics not always addressed adequately in other texts; these include credit constraints, real business cycles, generational accounting, and international capital flows markets. Written in a clear, accessible style, this shortened and simplified second edition provides a systematic way to interpret macroeconomic outcomes, to understand various policy proposals, and to appreciate how individuals and firms fit into the big picture.

An Integrated Approach John Wiley & Sons

How America went bankrupt and how we can save ourselves—as a country and as individuals—from economic disaster. The United States is bankrupt, flat broke. Thanks to accounting that would make Enron blush, America's insolvency goes far beyond what our leaders are disclosing. The United States is a fiscal basket case, in worse shape than the notoriously bailed-out countries of Greece, Ireland, and others. How did this happen? InThe

Clash of Generations, experts Laurence Kotlikoff and Scott Burns document our six-decade, off-balance-sheet, unsustainable financing scheme. They explain how we have balanced our longer lives on the backs of our (relatively few) children. At the same time, we've been on a consumption spree, saving and investing less than nothing. And that's not to mention the evisceration of the middle class and a financial system that has proven it can't be trusted. Kotlikoff and Burns outline grassroots strategies for saving ourselves—and especially our children—from what could be a truly catastrophic financial collapse. Kotlikoff and Burns sounded the alarm in their widely acclaimed *The Coming Generational Storm*, but politicians didn't listen. Now

the need for action is even more urgent. It's up to us to demand radical reform of our tax system, our healthcare system, and our Social Security system, and to insist on better paths to investment return than those provided by Wall Street (mis)managers. Kotlikoff and Burns's "Purple Plans" (so called because they will appeal to both Republicans and Democrats) have been endorsed by a who's who of economists and offer a new way forward; and their revolutionary investment strategy for individuals replaces the idea of financial capital with "life decision capital." Of course, we won't be doing all this just for ourselves. We need to fix America's fiscal mess before our kids inherit it.
