Home | Journal of Clinical Microbiology Clinical Immunology Serology A Laboratory Finlay Laboratory services include a broad range of tests in: chemistry, pathology cytology, endocrinology, hematology, immunology, microbiology, radioassay, serology and toxicology. Regularly scheduled courier service is provided to our clients. Finlay Clinical Laboratory The severe acute respiratory syndrome coronavirus, SARS-CoV-2, and resulting pandemic have challenged laboratory medicine. As serologic tests are now ubiquitous and available on a variety of platforms, it is important to understand assay differences, regulatory issues, performance characteristics, utility, and limitations of SARS-CoV-2 antibody tests. Laboratory Serology for SARS-CoV-2 Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is the cause of an ongoing pandemic that has infected over 36 million and killed over 1 million people. Informed implementation of government public health policies depends on accurate data on SARS-CoV-2 immunity at a population scale. We hypothesized that detection of SARS-CoV-2 salivary antibodies could serve as a noninvasive ... COVID-19 Serology at Population Scale: SARS-CoV-2-Specific ... The Clinical Virology Laboratory is a full service virology laboratory that performs molecular methods, rapid antigen testing, culture and serology. Virology is a rapidly changing field and the laboratory is continually modifying its test menu and test algorithms in order to keep abreast of current developments and provide the best services to ... Clinical Virology < Laboratory Medicine Clinical chemistry (also known as chemical pathology, clinical biochemistry or medical biochemistry) is the area of chemistry that is generally concerned with analysis of bodily fluids for diagnostic and therapeutic purposes. It is an applied form of biochemistry (not to be confused with medicinal chemistry, which involves basic research for drug development). Clinical chemistry - Wikipedia Pneumococcal vaccination is a commonly used technique for assessing the humoral immune status of a patient suspected of having immunodeficiency. Interpretation of what constitutes an adequate response, however, can be challenging. This is due to the complexity of the data generated from serotype-specific assays, historical variations in the assays used to measure pneumococcal antibodies, and ... Use and Clinical Interpretation of Pneumococcal Antibody

...Accurate diagnosis of acute severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) infection is critical for appropriate management of patients with this disease. We examined the possible complementary role of laboratory-developed class-specific clinical serology in assessing SARS-CoV-2 infection in hospitalized patients. Home | Journal of Clinical Microbiology 2 Clinical Microbiology and Immunology Laboratory, University of Chicago ... Specimens from patients, with and without COVID-19 infection, were tested at the University of Chicago Clinical Microbiology and Immunology Laboratory. Of 86 samples from SARS-CoV-2 PCR-negative patients, including 28 samples positive for common human coronavirus ...
