International Electronics

Directory '90, Third

Edition: The Guide to

European Manufacturers,

Agents and Applications,

Part 1 comprises a

directory of various

manufacturers in Europe

and a directory of agents

in Europe. This book

contains a classified

directory of electronic

products and services

where both manufacturers

and agents are listed. This

edition is organized into

two sections. Section 1

provides details of

manufacturers, including

number of employees,

production program,

names of managers, as

well as links with other

companies. The entries

are listed alphabetically

on a country-by-country

basis. Section 2 provides

information concerning

agents or representatives,

including names of

manufacturers

represented, names of

managers, number of

employees, and range of

products handled. A

number of these

companies are also active

in manufacturing and so

appear in both Section 1

and Section 2. This book

is a valuable resource for

private consumers.

The text provides

guidance to the building

science community of

architects and engineers,

to reduce physical

damage to buildings,

related infrastructure, and

people caused by terrorist

assaults. It presents

incremental approaches

that can be implemented

over time to decrease the

vulnerability of buildings

to terrorist threats. Many

of the recommendations

can be implemented

quickly and cost-

effectively. The manual

contains many how-to

aspects based upon

current information

contained in Federal

Emergency Management

Agency (FEMA),

Department of

Commerce, Department

of Defense, Department

of Justice, General

Services Administration,

Department of Veterans

Affairs, Centers for

Disease Control and

Prevention/National

Institute for Occupational

Safety and Health, and

other publications. It

describes a threat

assessment methodology

and presents a Building

Vulnerability Assessment

Checklist to support the assessment process. It also discusses architectural and engineering design considerations, standoff distances, explosive blast, and chemical, biological, and radiological (CBR) information. The appendices includes a glossary of CBR definitions as well as general definitions of key terminologies used in the building science security area. The appendices also describe design considerations for electronic security systems and provide a listing of associations and organizations currently working in the building science security area.

A Manager's Guide to Telecommunications discusses the basic principles of various telecommunications equipment that can be utilized in management practice. The book also covers the techniques, relevance, and selection of different telecommunication devices. The text first covers communication and computers, and then proceeds to tackling transmission technology and techniques. The next chapter covers networks

and exchanges, while the succeeding two chapters discuss voice and text communication, respectively. The last two chapters talk about database on-line database and local area networks, successively. The book will be of great use to those in management positions who wish to learn more about the various telecommunications equipment.
