This book is designed to be used in conjunction with any of the existing civil procedure casebooks. It includes the restyled Federal Rules of Civil Procedure, procedural statutes, state rules of court, and illustrative forms. The cases highlight areas commonly addressed in first-year civil procedure courses, but demonstrate how California procedure differs from its federal counterpart.

California Civil Procedure Handbook: Rules, Selected Statutes and Cases, and Comparative Analyses, 2013 LexisNexis

This low-cost paperback book is designed to serve as both a Rulebook and Case Supplement to be used in conjunction with any of the existing civil procedure casebooks. It enables civil procedure professors in California schools to teach this subject from a comparative perspective, exposing students to the system of procedure in both the California state and federal court systems. Updated selection of California appellate cases, including edited versions of *Dowden v. Superior Court* (Cal. App. 1999) (on California's work product privilege) and *Scheidung v. Dinwiddie Construction Co.* (Cal. App. 1999) (on the operation of summary judgment in California's courts).

This book contains the suite of protocols for the equitable evaluation of marine energy converters (based on either tidal or wave energy) produced by the EquiMar consortium led by the University of Edinburgh. These protocols aim to harmonise testing and evaluation procedures across the wide variety of devices presently available with the aim of accelerating adoption through technology matching and improved understanding of the environmental and economic impacts associated with the deployment of arrays of devices. EquiMar will assess devices through a suite of protocols covering site selection, device engineering design, the scaling up of designs, the deployment of arrays of devices, the environmental impact, in terms of both biological & coastal processes, and economic issues. The series of protocols has been developed through a robust, auditable process and we hope they will provide a firm foundation for project developers, consenting agencies, project funders and technology developers to evaluate concepts.
