This book is open access under a CC BY NC ND 4.0 license. This open access book discusses how Norwegian shipping companies played a crucial role in global shipping markets in the 20th century, at times transporting more than ten per cent of world seaborne trade. Chapters explore how Norway managed to remain competitive, despite being a high labour-cost country in an industry with global competition. Among the features that are emphasised are market developments, business strategies and political decisions The Norwegian experience was shaped by the main breaking points in 20th century world history, such as the two world wars, and by long-term trends, such as globalization and liberalization. The shipping companies introduced technological and organizational innovations to build or maintain a competitive advantage in a rapidly changing world. The growing importance of offshore petroleum exploration in the North Sea from the 1970s was both a threat and an opportunity to the shipping companies. By adapting both business strategies and the political regime to the new circumstances, the Norwegian shipping sector managed to maintain a leading position internationally.

Governance and Business Models for Sustainable Capitalism touches upon many of the central themes of today's debate on business and society. In particular, it brings attention to a recurrent tension between efficiency, innovation, and productivity on the one hand, and fairness, equity, and sustainability on the other. The book argues that we need radical rethinking of business models and economic governance, beyond the classical doctrine, which sees social and ecological responsibility as lying with public-policy regulation of purely profit-seeking firms. In spite of the popular CSR agenda, business - as we know it today - is both too transient and too limited in its motivation to carry the regulatory burden. We need to adopt a much wider concept of 'partnered governance', where advanced states and pioneering companies work together to raise the social and environmental bar. The book suggests that civil engagements based on moral rather than formal rights, and amplified through the media, may provide a healthy challenge both to autocratic planning and to solely profit-centered commercialization. The book also proposes a triple cycle theory of innovation for sustainability: a novel framing of the efficacy of green and prosocial entrepreneurship as intertwined with political visions and supportive institutions. In addition, the book offers reflections on the ways in which further digital robotization may enable transition to an 'Agora Economy' where productive efficiency is combined with expanded civic freedoms. Aimed primarily at researchers, academics, and students in the fields of political economy, business and society, corporate governance, business ethics, corporate social responsibility, and sustainability, the book will additionally be of value to practitioners, supplying them with information regarding the challenges associated with the shaping of sustainable or 'civilised' market capitalism for a better world.

Starring Michelle Monaghan, James Marsden, Luke Bracey, and Liana Liberato "Everyone wanted to believe that endless love was possible. She'd believed in it once, too, back when she was eighteen." In the spring of 1984, high school students Amanda Collier and Dawson Cole fell deeply, irrevocably in love. Though they were from opposite sides of the tracks, their love for one another seemed to defy the realities of life in the small town of Oriental, North Carolina. But as the summer of their senior year came to a close, unforeseen events would tear the young couple apart, setting them on radically divergent paths. Now, twenty-five years later, Amanda and Dawson are summoned back to Oriental for the funeral of Tuck Hostetler, the mentor who once gave shelter to their high school romance. Neither has lived the life they imagined . . . and neither can forget the passionate first love that forever changed their lives. As Amanda and Dawson carry out the instructions Tuck left behind for them, they realize that everything they thought they knew -- about Tuck, about themselves, and about the dreams they held dear -- was not as it seemed. Forced to confront painful memories, the two former lovers will discover undeniable truths about the choices they have made. And in the course of a single, searing weekend, they will ask of the living, and the dead: Can love truly rewrite the past?

Professional service firms are critical agents of contemporary economies and understanding them has become a central focus of recent scholarship. This very timely and well organized Handbook brings together several leading scholars who explore how we might think and theorize about professional service firms and their entrepreneurial behaviours. The Handbook will become a key source for the growing community of researchers in this area. Æ Royston Greenwood, University of Alberta, Canada Æ For too long, both researchers and practitioners have presumed that professional service firms follow the status quo when they should better understand how these professionals set the rules for globalization. This Handbook reminds us that professionals are as much the shock-troops of capitalism as the multinational corporations that they serve. As this Handbook shows, the leading firms successfully compete with each other by fostering entrepreneurship and innovation in order to service an institutional system that undergirds the international economy. Æ Christopher McKenna, University of Oxford, UK Professional services are increasingly seen as an important foundation for future economic growth and prosperity. Yet research on innovative and entrepreneurial processes in professional services has been surprisingly scarce. This Handbook provides a collection of original contributions from leading scholars outlining the current stock of knowledge in the area as well as providing directions for further research. The expert contributors discuss entrepreneurship and innovation from a number of different perspectives, including the entrepreneurial professional team, the entrepreneurial firm and the institutional environment. The first part of the book looks at the challenges of entrepreneurship specific to the professional service firm while the second explores the creation and exploitation of entrepreneurial opportunities in the professional service team. Part III turns to the organization and Part IV to the management and growth of the entrepreneurial professional service firm. The final part discusses the interplay between professions, firms and the institutional environment. Researchers, scholars and PhD students in the areas of entrepreneurship and professional service firms along with advanced students of management will find this volume of great value.

In mid-July 2011, the "lone wolf terrorist" Anders Behring Breivik placed a bomb at the Norwegian government block, killing eight people. He then traveled to a youth camp on a small island in the Oslo archipelago, where another 69 people, mainly teenage social democratic activists, were shot in cold blood. Far right terrorism aligns its actions against the backdrop of ideological evolution and transnational networks that spread their messages in concerted ways. In *Tracks of Breivik* addresses the far right by providing both cross-national and country-specific perspectives of transnational networks and dimensions. *Sport, Outdoor Life and the Nordic World* explores the Nordic model of sport and outdoor life with

respect to such issues as sport facilities, mountain guiding, women and ethnic minorities, urban planning, anti-doping, health, elite sport coaching and leadership, and the globalization of sport. The aims of the volume are twofold. First, it advances knowledge of Nordic sport and outdoor life, as important fields of social activity in their own rights. Second, it enhances the understanding of the 'Nordic model' of society, and the ways in which this is constructed, explored and challenged within and through sport and outdoor life activities. In doing so, the contributors explore a range of key themes, notably: how modern Nordic sport and outdoor life activities emerged and are organized through specific social policies; how they may challenge or harbour forms of social exclusion, particularly in regard to gender or minority populations; how they are affected by, and respond to, deviant practices such as doping; how they may contribute to alleviating social problems; and how they confront major structural challenges and changes, such as the impacts of globalization and the continuing dominance of neoliberal economic policies. Interdisciplinary in approach, *Sport, Outdoor Life and the Nordic World* is essential reading for those studying Nordic sports and societies, and will also appeal to students, academics and wider readers with interests in sport studies, sociology, social policy, cultural studies, anthropology and public health. The chapters were originally published as a special issue of *Sport in Society*.

Physiotherapy is arriving at a critical point in its history. Since World War I, physiotherapy has been one of the largest allied health professions and the established provider of orthodox physical rehabilitation. But ageing populations of increasingly chronically ill people, a growing scepticism towards biomedicine and the changing economy of healthcare threaten physiotherapy's long-held status. Paradoxically, physiotherapy's affinity for treating the 'body-as-machine' has resulted in an almost complete inability to identify the roots of the profession's present problems, or define possible ways forward. Physiotherapists need to engage in critically informed theoretical discussion about the profession's past, present and future - to explore their practice from economic, philosophical, political and sociological perspectives. The End of Physiotherapy aims to explain how physiotherapy has arrived at this critical point in its history, and to point to a new future for the profession. The book draws on critical analyses of the historical and social conditions that have made present-day physiotherapy possible. Nicholls examines some of the key discourses that have had a positive impact on the profession in the past, but now threaten to derail it. This book makes it possible for physiotherapists to think otherwise about their profession and their day-to-day practice. It will be essential reading for scholars and students of physiotherapy, interprofessional and community rehabilitation, as well as appealing to those working in medical sociology, the medical humanities, medical history and health care policy.
