*The Myths of  
Extraterrestrials  
Through the Ages* Good  
Press  
This book explores how

the Virgin Mary's life is  
told in hymns,  
sermons, icons, art,  
and other media in the  
Byzantine Empire  
before AD 1204. A  
group of international  
specialists examines  
material and textual  
evidence from both

Byzantine and Muslim-ruled territories that was intended for a variety of settings and audiences and seeks to explain why Byzantine artisans and writers chose to tell stories about Mary, the Mother of God, in such different ways. Sometimes the variation reflected the theological or narrative purposes of storytellers; sometimes it expressed their personal spiritual preoccupations. Above all, the variety of aspects that this holy figure assumed in Byzantium reveals her paradoxical theological position as meeting-place and mediator between the divine and created realms. Narrative, whether 'historical', theological, or purely literary, thus played a fundamental

role in the development of the Marian cult from Late Antiquity onward. The Motor Routes of France Frontiers Media SA  
This is the first comprehensive biography of Fulk Nerra, an important medieval ruler, who came to power in his teens and rose to be master in the west of the French Kingdom. Descendant of warriors and administrators who served the French kings, Fulk in turn built the state that provided a foundation for the vast Angevin empire later constructed by his descendants. Bernard Bachrach finds the terms "constructed" and "built" more than metaphorical in relation to Fulk's career. He shows how Fulk and the Angevin

counts who followed him based their long-term state building policy on Roman strategies and fortifications described by Vegetius. This creative adaptation of Roman ideas and tactics, according to Bachrach, was the key to Fulk's successful consolidation of political power. Students of medieval and military history will find here a colorful, impressively researched biography.

Springer

Modern research has demonstrated that many stars are surrounded by planets—some of which might contain

the right conditions to harbor life. This has only reinforced a question that has been tormenting scientists, philosophers and priests since Antiquity: Are there other inhabited worlds beyond our own? This book analyzes the many ways that humans have argued for and depicted extraterrestrial life over the centuries. The first known texts about the subject date from as early as the 6th century BC. Since that time, countless well-known historical characters like Lucretius, Aristotle, Thomas Aquinas, Cusanus, Bruno, Kepler, Descartes, and Huygens contributed to the debate; here, their lesser known opinions on the subject are studied in detail. It is

often difficult for the modern mind to follow the thinking of our ancestors, which can only be understood when placed in the relevant context. The book thus extends its scope to the evolution of ideas about cosmology in general, as well as the culture in which these great thinkers wrote. The research is presented with the author's insights and humor, making this an easy and enjoyable read.

Practical Hints Upon Landscape Gardening  
Springer

This book takes a new approach to studying the contemporary Middle East, focusing on popular culture, including film, music, and television.

Innovative essays by a group of smart young scholars in

anthropology, history, and ethnomusicology.

**Count** Springer Nature  
 This book is the first structured and complete research work undertaken on opera theatres across the entire Middle East and North Africa. Until now, no single study has looked at every theatrical and musical institute in these countries. Many of the opera theatres that are examined here have had very little written about them at all. This work fills this void in order to provide

scholars and practitioners in the sector with the first reference work on the subject that will help our understanding of the evolutionary process that has led—and continues to lead—all the countries in the MENA region to equip themselves with an opera theatre.

Khyentse Chenmo of Gongkar The Reception of the Virgin in Byzantium Marian Narratives in Texts and Images

This book is based on EU-funded project PLANTFOODSEC, covering intentional and unintentional threats to plant biosecurity and to food safety areas.

Biosecurity is a strategic and integrated approach for analysing and managing relevant

risks to human, animal and plant life and health, and associated risks to the environment. Interest in biosecurity has risen considerably over the last decade in parallel with the increasing trade in food and plant and animal products; higher levels of international travel; new outbreaks of transboundary diseases. Although most diseases outbreaks have natural causes or are the result of inadvertent introductions of pathogens through human activities, the risk of a deliberate introduction of a high consequence plant pathogen cannot be excluded. Vigilance is required to identify, prevent and manage new and emerging issues that could

impact on production capacity, plant biosecurity or food safety and food chain resilience. /div

*Twelve Years a Slave*

Elsevier

This book presents selected papers from a conference on small business in Africa.

Subjects of the papers include the design and implementation of national policies to promote small and medium enterprises; regulatory reforms and their effects on the dynamics of business growth; agents of change in financial services, both formal and informal; innovations to improve the competitive potential of small enterprises, including technological innovations, grouping of enterprises into consortia, and training

of entrepreneurs; and viewpoints of the public service, the private sector, and international organizations.

*A Revolutionary Artist of Tibet* Prabhat

Gustave Flaubert called the Loire "the most French of French rivers." It is the longest river in France and the most varied in scenery and moods. Beginning as a mountain stream in the Ardèche, it issues, 630 miles later, into the Atlantic beyond the great modern port of St.-Nazaire. Small and rapid at first, the Loire runs through dark volcanic hills; further downstream it becomes the broad, slower river of sandy islands, poplars, and châteaux and of the vibrant cities of

Orléans, Blois, Tours, and Nantes (the former capital of Brittany). It is lined with vineyards, forests, medieval fortresses, and flamboyant Renaissance palaces. It is fed by countless tributaries, from rivulets to mighty rivers like the Allier, Cher, and Vienne, each with their own remarkable sights. Martin Garrett follows the Loire's course through cities and countryside, tracing its dramatic history from the days of feuding warlords and barons to the battles of 1940. Looking at the wide range of literature, art, and architecture created along its banks, he considers works from Du Bellay and Balzac to Virginia Woolf, from Renaissance palace

builders to Le Corbusier. Our Lady's Juggler Springer Science & Business Media Surveillance presents a conundrum: how to ensure safety, stability, and efficiency while respecting privacy and individual liberty. From police officers to corporations to intelligence agencies, surveillance law is tasked with striking this difficult and delicate balance. That challenge is compounded by ever-changing technologies and evolving social norms. Following the revelations of Edward Snowden and a host of private-sector controversies, there is intense interest among policymakers, business leaders, attorneys, academics, students, and the public

regarding legal, technological, and policy issues relating to surveillance. This handbook documents and organizes these conversations, bringing together some of the most thoughtful and impactful contributors to contemporary surveillance debates, policies, and practices. Its pages explore surveillance techniques and technologies; their value for law enforcement, national security, and private enterprise; their impacts on citizens and communities; and the many ways societies do - and should - regulate surveillance. Cambridge University Press

This treasury of 101 new healing stories addresses a range of issues - from unruly behaviour to grieving,

anxiety, lack of confidence, bullying, teasing, nightmares, intolerance, inappropriate talk, toileting, bedwetting and much more. The stories also have the potential for nurturing positive values.

New Approaches to Popular Culture in the Middle East and Beyond BRILL

Interpretation of Micromorphological Features of Soils and Regoliths, Second Edition, provides researchers and students with a tool for interpreting features observed in soil thin sections and through submicroscopic studies. After an introduction and general overview, micromorphological aspects of regoliths (e.g., saprolites, transported materials)

are highlighted, followed by a systematic and coherent discussion of the micromorphological expression of various pedogenic processes. The book is written by an international team of experts in the field, using a uniform set of concepts and terminology, making it a valuable interdisciplinary reference work. The following topics are treated: freeze-thaw features, redoximorphic features, calcareous and gypsiferous formations, textural features, spodic and oxic horizons, volcanic materials, organic matter, surface horizons, laterites, surface crusts, salt minerals, biogenic and pedogenic siliceous

materials, other authigenic silicates, phosphates, sulphidic and sulphuric materials, and features related to faunal activity. The last chapters address anthropogenic features, archaeological materials and palaeosoils. Updates the first exhaustive publication on interpretation of micromorphological features, with some new chapters and with a larger number of additional references. Covers related topics, making micromorphology more attractive and accessible for geomorphologists, archaeologists and quaternary geologists. Includes thematic treatment of a range of soil micromorphology fields and broadens its

applications Features input from a multi-disciplinary team, ensuring thorough coverage of topics related to soil science, archaeology and geomorphology

The Juggler of Notre Dame and the Medievalizing of Modernity Routledge

Grassland farming in Europe was already established during the settlement of the first farmers together with their domesticated animals after the last ice age. Since then, grassland provides the forage basis to feed ruminant animals for the production of meat and milk. Depending on the ecological conditions and intensity of usage, various plant communities with different species developed, displaying

a rich biodiversity. With the introduction of improved crop rotations at the end of the 16th century, grasses and legumes were also grown to an important extent as forage crops on arable land. In the last decades the importance of amenity grasses increased markedly, due to the demand of the society for new usages like landscape protection. Around 1900 interested farmers and academics identified the need for grassland improvement through systematic selection and seed production. This marks the beginning of breeding and research in companies but also at universities and specialized research institutes. Plant collection started with

many of the species that are still of importance today. The collected materials were grouped according to the intended use and some type of phenotypic selection was applied. Seed multiplication of such populations was performed in pure stands and the harvested seed was marketed. Although the vegetative biomass and its quality are of utmost importance in forage crop breeding, it is the seed yield potential which determines the commercial success of a new variety.

Cambridge University Press

By far the most influential work on the history of the body, across a wide range of academic disciplines, remains that of Thomas Laqueur. This book puts on trial the one-sex/two-sex model of Laqueur's *Making Sex: Body and Gender from the Greeks to Freud* through a detailed exploration of the ways in which two classical stories of sexual difference were told, retold and remade from the mid-sixteenth to the nineteenth century. Agnodike, the

'first midwife' who disguises herself as a man and then exposes herself to her potential patients, and Phaethousa, who grows a beard after her husband leaves her, are stories from the ancient world that resonated in the early modern period in particular. Tracing the reception of these tales shows how they provided continuity despite considerable change in medicine, being the common property of those on different sides of professional disputes about women's roles in both medicine and midwifery. The study reveals how different genres used these stories, changing their characters and plots, but always invoking the authority of the classics in discussions

of sexual identity. The study raises important questions about the nature of medical knowledge, the relationship between texts and observation, and the understanding of sexual difference in the early modern world beyond the one-sex model.

*Fulk Nerra, the Neo-Roman Consul 987-1040* Cambridge University Press  
Written by series co-creator Michael Dante DiMartino and drawn by Irene Koh (*Secret Origins: Batgirl, Afrina and the Glass Coffin*) and with consultation by Bryan Konietzko, this is the official continuation of *The Legend of Korra!* Collects *The Legend of Korra: Turf Wars Parts One, Two, and Three*. New beginnings for Korra and Asami! After

a refreshing sojourn in the Spirit World, Korra and Asami return to Republic City but find nothing but political hijinks and human vs. spirit conflict! Pompous developer Wonyong Keum plans to turn the new spirit portal into an amusement park, potentially severing an already tumultuous connection with the spirits. At the city's edge, Zhu Li enlists everyone she can to aid the thousands of hungry and homeless evacuees who have relocated there. Meanwhile, the Triple Threats' ruthless new leader, Tokuga, is determined to unite the other triads under his rule, no matter the cost. In order to get through it all, Korra and Asami vow to look out for each other--but first, they've got to get

better at being a team!  
Curiosities of Law and Lawyers London : William Andrews & Company  
"Gewertz and Errington unpack the aspirations and anxieties, calculations and controversies that inhabit an inexpensive cut of fatty meat. Following the trail of sheep bellies from slaughterhouses in Australia and New Zealand to the plates of Pacific Islanders, they evenhandedly map the divergent perspectives of commercial traders, government officials, and ordinary consumers acting within a contested material and moral economy. Cheap Meat provides a startling view of how global food markets fashion the bodies and identities of

people everywhere."-- Robert J. Foster, author of *Coca-Globalization: Following Soft Drinks from New York to New Guinea* "Cheap Meat is a compelling example of how ethnography concerned with Oceania can elucidate broader questions in anthropology and the social sciences in general. Gewertz and Errington show the complexity of globalization by

focusing on the most unlikely commodity. This work at once demonstrates how unfettered capitalism is able to use global circulation to literally convert one person's trash to another's treasure and how resilient Pacific Islanders refashion Western commodities to their own ends."-- Paige West, Curator for the Pacific American Museum of Natural History
