The purpose of The Library-Classroom Partnership is to assist library teachers and classroom teachers to effectively use the library and its resources as an extension of the classroom. As in the earlier edition, the lessons included in this book stress the library media skills needed by individuals for lifelong learning. Long after adults have forgotten a particular fact of history or the techniques of balancing an equation, they continue to use library skills to answer their questions and to meet the demands of an ever-changing society. It has been well documented that the skills taught in a library are most effectively learned within the context of classroom work. To this end, the librarian and the teacher must form a working team to take each other's ideas and develop them into effective learning experiences for students. The authors have incorporated the teaching of those library media skills with every discipline taught in the school. Through these lessons, students will realize that research and reference are a vital part of the learning process, complementing and enriching every subject. The eleven disciplines (English, mathematics, social studies, science, art, music, home and careers, technology, physical education, health, and foreign language) normally taught in the junior high and middle schools are addressed in this work. To be included, a lesson must be a learning experience in both the library skills and the subject areas. Each unit has been cooperatively developed using the expertise of the school library media specialist and the subject teacher. All lessons have been implemented successfully in the junior high and middle school environment. This revised and expanded edition of The Library Classroom- Partnership also deals with technology and the changing economic and social conditions affecting public schools. It includes a new section on reading enrichment as well as instruction in accessing information electronically.

Teachers often have too little time to prepare differentiated lessons to meet the needs of all students. Differentiating Instruction in Algebra 1 provides ready-to-use resources for Algebra 1 students. The book is divided into four units: introduction to functions and relationships; systems of linear equations; exponent rules and exponential functions; and quadratic functions. Each unit includes big ideas, essential questions, the Common Core State Standards addressed within that section, pretests, learning targets, varied activities, and answer keys. The activities offer choices to students or three levels of practice based on student skill level. Differentiating Instruction in Algebra 1 is just the resource math teachers need to provide exciting and challenging algebra activities for all students! Grades 7-10

A boy discovers his Native American heritage in this Depression-era tale of identity and friendship by the author of Code Talker It's 1932, and twelve-year-old Cal Black and his Pop have been riding the rails for years after losing their farm in the Great Depression. Cal likes being a "knight of the road" with Pop, even if they're broke. But then Pop has to go to Washington, DC--some of his fellow veterans are marching for their government checks,

and Pop wants to make sure he gets his due--and Cal can't go with him. So Pop tells Cal something he never knew before: Pop is actually a Creek Indian, which means Cal is too. And Pop has decided to send Cal to a government boarding school for Native Americans in Oklahoma called the Challagi School. At school, the other Creek boys quickly take Cal under their wings. Even in the harsh, miserable conditions of the Bureau of Indian Affairs boarding school, he begins to learn about his people's history and heritage. He learns their language and customs. And most of all, he learns how to find strength in a group of friends who have nothing beyond each other.
