Additional online material can be found by clicking on the button above. 'A very practical text that provides professionals new to this arena with a good introduction to what they can expect to encounter in online work. The book contains numerous thought-provoking examples and exercises for those contemplating work in virtual arenas' - Terry Hanley, Lecturer in Counselling, University of Manchester `It's tempting to think that face-to-face experience translates straightforwardly to online work. But it doesn't. Jane Evans shows how many different aspects there are

to counselling on-line... My advice would be, don't attempt it until you have worked through this book' - Professor Michael Jacobs, author of Psychodynamic Counselling in Action Counsellors - and other professionals who provide emotional support and guidance - are increasingly working online. The difference between online and face-to-face interaction with clients is vast and practitioners need to equip themselves with specialist knowledge and skills to ensure that they are being effective. Online Counselling and Guidance Skills is the first book to deal with the practicalities of this mode of working. It looks at how practitioners need to adapt their basic counselling skills to the online environment and guides them through the process of setting up, defining and maintaining a working relationship with a client within professional, ethical and legal boundaries. Case studies and extracts from online sessions show how the skills are put into practice, while practical

exercises and points for further consideration help readers to develop their own knowledge and skills. Until now, books and articles have generally focused on the therapeutic work done by counsellors online. However, this book addresses people who use counselling skills in a wide range of contexts; including counselling, education, mental health, social care and careers guidance.

A Practice Handbook Routledge

This practical bestseller from leading expert Richard Nelson-Jones introduces the essential counselling skills for the helping professions. Now in its fourth edition, it guides you through the key skills for helping work across a range of settings, such as counselling, nursing, social work, youth work, education and many more. It explores 17 key counselling skills, including: - asking questions -monitoring -facilitating problem solving - negotiating homework Each chapter describes a particular skill, illustrates it using clear case examples across a range of settings and then helps you consolidate and practise what you've learned through a set of creative activities. Further chapters cover professional issues including a new chapter on managing crises and chapters on ethical dilemmas, supervision, working with diversity and more.

----- `How hard it is to find a book

to recommend to trainees, which will give them an insight into what counselling (and psychotherapy too, for that matter) is really like. This book does exactly that.... This is a book which would be equally useful to the humanistic practitioner and the more orthodox one. The breadth of sympathy is admirable in dealing with what is common to all orientations. This is one of those rare books which does justice both to the human experiences involved in counselling and psychotherapy, and to the theory which might explain those experiences' - Changes What is the experience of counselling from the perspectives of both client and counsellor? What can be learned for the practice of counselling from an understanding of how it feels to be a client or a counsellor? Addressing these questions, central to this book are the personal accounts of individual clients and counsellors, who each relate their own very different experiences of counselling. They explore such issues as identity, expectations, trust, power and boundaries in the client-counsellor relationship. And each examines the intense personal meanings of `success' or `failure' in the client or counsellor role. An analysis of the implications for the counselling relationship concludes the volume.

Basic Counselling Skills John Wiley & Sons

Human relationships lie at the heart of social work practice, and an understanding of their importance is a crucial aspect of training. This text considers the place of relationships in current practice and explores the ways in which social workers can use relationship skills to achieve the best possible outcomes for their clients.

The Skills of Finding Solutions to Problems Routledge

The Routledge Handbook of Social Work Theory provides an interdisciplinary and international introduction to social work theory. It presents an analytical review of the wide array of theoretical ideas that influence social work on a global scale. It sets the agenda for future trends within social work theory. Separated into four parts, this handbook examines important themes within the discourses on social work theory, as well as offering a critical evaluation of how theoretical ideas influence social work as a profession and in practice. It includes a diverse range of interdisciplinary topics, covering the aims and nature of social work, social work values and ethics, social work practice theories and the use of theory in different fields of practice. The contributors show how and why theory is so important to social work and analyze the impact these concepts have made on social intervention. Bringing together an international team of leading academics within the social work field and newer contributors close to practice, this handbook is essential reading for all those studying social work, as well as practitioners, policymakers and those involved in the associated fields of health and social care. *Communication and Interviewing Skills for Practice in Social Work, Counselling and the Health Professions* Sage Publications Pvt. Limited

Now in its 4th edition, this bestselling book introduces you to the core counselling and psychotherapy skills you will need for effective therapeutic practice. With an online resource site featuring over 30 videos, you will be taken step-by-step through the skills and strategies needed at each stage of the therapy process.

Counselling Hachette UK

Supervision and Professional Development in Social Work Practice aims to familiarize its readers with the current state of supervision in social work, provide them a common platform for reflection and action and thereby promote excellence in their respective learning, research and professional practice areas. It incorporates contributions by scholars, practitioners and students from various backgrounds, professional disciplines and countries. The ideas, concepts and practice frameworks discussed in this book are useful in any human service context. However, they need to be adapted with cultural sensitivity and appropriate levels of consultation and guidance to effectively challenge prevalent practice frameworks and support the embracing of new ideas to enhance professional and authentic engagement. The book utilizes several research studies, views, experiences and reflections, and includes numerous Voices from the Field, which provide diverse perspectives and viewpoints as well as practical help. This book will prove indispensable for academicians, practitioners, supervisors and supervisees as well as postgraduate and advanced undergraduate students of social work, counselling, psychology and education.

A Relational Skills Model Routledge

The main aim of this practical Handbook is to strengthen counselling and communication skills of skilled attendants (SAs) and other health providers, helping them to effectively discuss with women, families and communities the key issues surrounding pregnancy, childbirth, postpartum, postnatal and post-abortion care. The MNH Counselling Handbook is chiefly designed to be used by groups of SAs with the help of a facilitator. It can also be used by individual SAs who can get

together with colleagues for discussions and activities where needed. It relies on a self-directed learning approach, allowing SAs to work at their own pace, drawing on their past counselling experience. The way it is used will be determined by each country's context, and the SAs' preference. The MNH Counselling Handbook is divided into three main sections. Part 1 is an introduction which describes the aims and objectives and the general layout of the Handbook. Part 2 describes the counselling process and outlines the six key steps to effective counselling. It explores the counselling context and factors that influence this context including the socio-economic, gender, and cultural environment. A series of guiding principles is introduced and specific counselling skills are outlined. Part 3 focuses on different maternal and newborn health topics, including general care in the home during pregnancy; birth and emergency planning; danger signs in pregnancy; post-abortion care; support during labour; postnatal care of the mother and newborn; family planning counselling; breastfeeding; women with HIV/AIDS; death and bereavement; women and violence; linking with the community. Each Session contains specific aims and objectives, clearly outlining the skills that will be developed and corresponding learning outcomes. Practical activities have been designed to encourage reflection, provoke discussions, build skills and ensure the local relevance of information. There is a review at the end of each session to ensure the SAs have understood the key points before they progress to subsequent sessions.

EBOOK: Social Work Skills And Knowledge: A Practice Handbook
SAGE

Drawing from the author's vast experience as teacher,

researcher, and practitioner, Lawrence Shulman's DYNAMICS AND SKILLS OF GROUP COUNSELING equips students in the helping professions with a solid introduction to methods for effective group counseling. Guided by theory, empirical research, years of teaching experience, his own group practice, and the wisdom of colleagues, Shulman's text brings concepts to life with vivid cases that include Record of Service reports and dialogue from actual groups. These illustrative examples connect theory to current practice and address the day-to-day realities of leading counseling groups. Extremely practical, the book presents students with a clear format on how to run a group built around four phases of work: the preliminary (preparatory) phase; the beginning (contracting) phase; the middle (work) phase; and the ending and transition phase. Recognizing the broad applications of these methods, the latter part of the text shows how these lessons can be applied to a wide range of settings. Reflecting the latest research and practices, DYNAMICS AND SKILLS OF GROUP COUNSELING delivers an insightful, authoritative, and comprehensive introduction to the field. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Counselling Skills: A Practical Guide For Counsellors And Helping Professionals SAGE

Puzzled by terminology, skills, law, or theory? Revising for your placement or exam? Then look no further! This series of concise and easy-to-use A-Zs will be your guide. Designed for both students and newly-qualified social workers, this book will introduce you to over 60 key skills in a concise and no-nonsense way. You can test your knowledge and how to apply each skill in

practice with Skills in Action, Stop-Reflect and Top Tips boxes.

Using Counselling Skills in Social Work SAGE

Integrating recent research and developments in the field, this revised second edition introduces an easy-to-master strategy for developing and writing culturally sensitive case conceptualizations and treatment plans. Concrete guidelines and updated case material are provided for developing conceptualizations for the five most common therapy models: Cognitive-Behavioral Therapy (CBT), Psychodynamic, Biopsychosocial, Adlerian, and Acceptance and Commitment Therapy. The chapters also include specific exercises and activities for mastering case conceptualization and related competencies and skills. Also new to this edition is a chapter on couple and family case conceptualizations, and an emphasis throughout on trauma. Practitioners, as well as graduate students in counseling and in clinical psychology, will gain the essential skills and knowledge they need to master case conceptualizations.

Techniques and Guidelines for Social Work Practice SAGE

This is the first book on counselling skills to look in detail at the practical interventions and tools used to establish the therapeutic relationship. Step-by-step, the text teaches the reader exactly how to use these skills with clients to address their concerns and achieve therapeutic change. Integrative and pluralistic in approach, the text covers the key techniques from all the major therapeutic models, placing them in their historical and theoretical contexts. Techniques covered include empathic responding, experiential focusing, Gestalt, metaphors, task-directed imagery, ego state therapy, solution focused therapy,

cognitive behavioral therapy, narrative therapy and self-in-representation therapy. The book: - presents each technique from the perspective of its underlying theory; - gives practical instruction on how to deliver each intervention; - provides extracts from counselling sessions to demonstrate the technique in action. This book is crucial reading for all trainees on counselling and psychotherapy courses or preparing to use counselling techniques in a range of other professional settings. It is also helpful for professionals who wish to acquire additional skills. Augustine Meier, certified clinical psychologist, professor Emeritus, Faculty of Human Sciences, Saint Paul University, Ottawa, Ontario and Founder and President of the Ottawa Institute for Object Relations Therapy. Micheline Boivin, certified clinical psychologist, Psychological Services of the Family, Youth and Children's Program at the Centre for Health and Social Services, Gatineau, Québec.

Choices Springer Publishing Company

This book explores the nature of helping relationships in general and highlights key considerations for all helpers, including diversity, ethical issues and the role of supervision. It also provides suggestions for further reading and advice on how to develop counselling skills at a more advanced level.

The School Counseling and School Social Work Treatment Planner, with DSM-5 Updates, 2nd Edition National Assn Social Workers

This reader-friendly practice text emphasizes intelligent decision-making in the use of interviewing and counseling skills and provides strategies for professionals in social work and counseling. Based on a four-phase model of counseling, each

chapter in Choices explores key concepts with theory, case studies, annotated practice examples, conversations, and responses to frequently asked questions. The text lends students and professionals the ability to use or forego particular skills based on the unique needs of individuals and situations. Choices promotes a "strengths approach" to clients by stressing the importance of counselor self-awareness and cultural competence.

Theory & Practice McGraw-Hill International

Social Work Skills SAGE

This book supports and develops the communication and interviewing skills of professional practitioners and student practitioners in social work, counselling, and the health professions. Combining work on personal and social constructs, the search for meaning, and ecological theory, this book both provides an integrated discussion of practice and presents a balanced approach when discussing psychological, biological, and social influences on individual well-being. Furthermore, it emphasises the influence of social contexts on behaviour and well-being, as well as valuing and encouraging the application of practitioners' prior experience and learning (APEL) to new knowledge and understanding. Containing a range of practice examples to stimulate learning, this book promotes a

collaboration between the professions, and welcomes the contributions of people who use services, patients, and clients. Communication and Interviewing Skills for Practice in Social Work, Counselling and the Health Professions will be of interest to all undergraduate and postgraduate social work students, as well as new and experienced professional health care practitioners.

Learning Matters

This is the only comprehensive text to focus on the development of practical interviewing and counseling skills for Master's-level mental health counseling students. It is structured around the goals established by the CACREP's 2009 document on standards for MHC programs, and uniquely encompasses both theory and practice from the perspectives of a diverse array of theoretical schools and practice strategies. The text emphasizes the importance of multicultural facets of interviewing and counseling throughout, challenging students to examine their own backgrounds and biases as they develop professionally.

Counselling Skills for Social Work Allyn & Bacon

More than any other text on the market, *The Heart of Counseling* is effective in helping students to understand the importance of therapeutic relationships and to develop the qualities that make the therapeutic relationships they build with clients the foundation of healing. In these pages, students come to see how all skills arise from and are directly related to the counselor's development and to building therapeutic relationships. Student learning ranges from therapeutic listening and empathy to structuring sessions, from explaining counseling to clients and caregivers to providing wrap-around services, and ultimately to experiencing therapeutic relationships as the foundation of

professional and personal growth. *The Heart of Counseling* includes: extensive case studies and discussions applying skills in school and agency settings specific guidance on how to translate the abstract concepts of therapeutic relationships into concrete skill sets exploration of counseling theories and tasks within and extending from core counseling skills videos that bring each chapter to life test banks, instructor's manuals, syllabi, and guidance for learning-outcomes assessments for professors
An A-Z of Social Work Skills McGraw-Hill Education (UK)

Published in association with the BACUP, this textbook provides the required knowledge for counselling skills qualifications. The book relates to the activity of counselling skills and addresses the context and roles in which these skills are used. Each chapter of the book contains information and practical activities which are designed to test knowledge. The book offers comprehensive coverage of the following areas: • Ethics and processes, including the description of the difference between counselling skills and counselling. • Life stages. • Theoretical perspectives. • Values, attitudes and beliefs. • Listening skills. • Settings. • Bullying and harassment. • Mentoring. The book is ideal for students on counseling skills courses and those using counseling skills in a variety of different environments.

Clinical Supervision and Professional Development of the Substance Abuse Counselor Routledge

This unique text emphasizes the many different techniques needed for successful social work practice. Parts I and II provide knowledge, values, and competencies for effective social work practice, while Parts III through V contain 144 clear and readable descriptions of practice techniques, presented in a handbook

format for convenient accessibility of information.
