The Broadview Guide to Writing is a concise yet uncommonly thorough text with a fresh approach to the craft of essay writing. The first part of the book discusses the style and structure of essay writing, and includes a useful discussion of the intangibles involved in the writing process—such as confidence, perseverance, and a willingness to deal with criticism constructively. The second part of the book provides thorough coverage of grammar and usage in a comprehensive reference guide, ranging from the simplest mechanical issues (such as subject-verb agreement) to subtle distinctions between words that have similar meanings. A wide range of examples is included throughout the book. The new edition includes a new sample essay (on the "Sensation" exhibit at the Brooklyn Museum), which is referred to frequently throughout the first section of the text in discussions of style and the writing process. Also included are entirely new sections on the writing conventions of different academic disciplines, and on special difficulties experienced by those whose first language is not English. Areas in which coverage has been significantly expanded include problems with capitalization; the subjunctive and conditional constructions; and the chapter on MLA style and other citation and documentation systems. In more modest ways the book has been updated and revised throughout. Exercises (previously available only in a separate short exercise book), will now also be available through the Broadview adjunct website.

Making Sense in the Humanities : a Student's Guide to Writing and Style Broadview Press

One of the most stressful aspects of the college application process is the essay. Most students worry about what an admissions officer looks for in a writing sample. But that's the wrong way to approach this vital component, says former Ivy League college admissions officer Harry Bauld. At Brown and Columbia, he saw what prospective students often did wrong—and now tells you how to do it right. In this fully revised and updated edition of the classic guide to writing the best essay of your life, Bauld has written an insider's guide to writing an essay that will stand out from the pack. He advises you on how to find your authentic voice, gives you tools and ideas that will spark your imagination, and shows you how to approach themes with originality and panache to make even the most tired topics fresh. He'll tell you straight out what admissions officers aren't looking for: another platitudinous variation on one of the following themes (if you see your initial idea reflected in this list, think again): The trip ("I had to adjust to a whole new way of life.") My favorite things (puppy dogs, freedom, and chocolate chip cookies) The pageant contestant ("I think World Peace is the most important issue facing us today.") The jock ("Through wrestling I have learned to set goals and to work with people.") The autobiography ("Hello, my name is . . .") Tales of my success ("But, finally, when I crossed the finish line . . .") Pet death ("As I watched Buttons's life ebb away, I came to value . . .") Getting into the college of your dreams is tough. The competition is fierce. For more than twenty-five years, *On Writing the College Application Essay* has helped thousands of students improve their chances. Now, let it work for you.

Say Something! Harper Collins

The wise and witty guide to researching and writing a thesis, by the bestselling author of *The Name of the Rose*—now published in English for the first time. Learn the art of the thesis from a giant of Italian literature and philosophy—from choosing a topic to organizing a work schedule to writing the final draft. By the time Umberto Eco published his best-selling novel *The Name of the Rose*, he was one of Italy's most celebrated intellectuals, a distinguished academic, and the author of influential works on semiotics. Some years before that, Eco published a little book for his students, in which he offered useful advice on all the steps involved in researching and writing a thesis. Since then, it has been translated into 17 languages—and is now for the first time presented in English. Eco's approach is anything but dry and academic. He not only offers practical advice but also considers larger questions about the value of the thesis-writing exercise in six different parts: • The Definition and Purpose of a Thesis • Choosing the Topic • Conducting the Research • The Work Plan and the Index Cards • Writing the Thesis • The Final Draft Eco advises students how to avoid “thesis neurosis” and he answers the important question “Must You Read Books?” He reminds students “You are not Proust” and “Write everything that comes into your head, but only in the first draft.” Of course, there was no Internet in 1977, but Eco's index card research system offers important lessons about critical thinking and information curating for students of today who may be burdened by Big Data. Irreverent and often hilarious, *How to Write a Thesis* is unlike any other writing manual and belongs on the bookshelves of students, teachers, writers, and Eco fans everywhere.

The Essential Guide to Writing History Essays is a step-by-step guide to the typical assignments of any undergraduate or master's-level history program in North America. Effective writing is a process of discovery, achieved through the continual act of making choices--what to include or exclude, how to order elements, and which style to choose--each according to the author's goals and the intended audience. The book integrates reading and specialized vocabulary with writing and revision and addresses the evolving nature of digital media while teaching the terms and logic of traditional sources and the reasons for citation as well as the styles. This approach to writing not only helps students produce an effective final product and build from writing simple, short essays to completing a full research thesis, it also teaches students why and how an essay is effective, empowering them to approach new writing challenges with the freedom to find their own voice.

Making Sense Heinle & Heinle Publishers

Designed to help all writers learn to use style as a rhetorical tool, taking into account audience, purpose, context, and occasion, *The Writer's Style* is not only a style guide for a new generation but a new generation of style guide. The book helps writers learn new strategies inductively, by looking at firsthand examples of how they operate rhetorically, as well as deductively, through careful explanations in the text. The work focuses on invention, allowing

writers to develop their own style as they analyze writing from varied genres. In a departure from the deficiency model associated with other commonly used style guides, author Paul Butler encourages writers to see style as a malleable device to use for their own purposes rather than a domain of rules or privilege. He encourages writing instructors to present style as a practical, accessible, and rhetorical tool, working with models that connect to a broad range of writing situations—including traditional texts like essays, newspaper articles, and creative nonfiction as well as digital texts in the form of tweets, Facebook postings, texts, email, visual rhetoric, YouTube videos, and others. Though designed for use in first-year composition courses in which students are learning to write for various audiences, purposes, and contexts, *The Writer's Style* is a richly layered work that will serve anyone considering how style applies to their professional, personal, creative, or academic writing.
