The text progresses to concise instructions for knit garment construction, including coverage of details such as collars, facings, closures, bands and hems, waistline finishes, and pockets within respective chapters on t-shirts, tops and sweaters, dresses, skirts and pants, jackets, activewear, swimwear, and linger. The final chapter covers specialty techniques such as finishing details, embellishments, felting and fabric manipulation. *Sewing with Knits and Stretch Fabrics* provides all the tools to professionally complete the garments and advance the designer's skill and understanding of how to design using the unique properties of knits.

Since the first edition of *Metric Pattern Cutting* was published in 1975 to provide a straightforward introduction to flat pattern cutting, it has become the established textbook on the subject. The fourth edition continues to offer an introduction to the basic principles of pattern cutting, with a range of good basic blocks and examples of their application to garments. The original blocks and many of the pattern adaptations have therefore been retained. However, the great expansion of casual wear, cut in jersey or stretch fabrics, has led to the growth of 'flat cutting' with no darting to create the shape and this edition devotes a whole section to this type of cutting. The sections on computer-aided design and grading have been updated. The size charts of body measurements have been revised, reflecting the changing shape of women's bodies. This fourth edition of *Metric Pattern Cutting for Children's Wear and Babywear* remains the standard text book but has three major improvements. First, the sections have been re-organised to

reflect changes in producing and marketing children's clothes.

Today's popularity of easy-fitting styles and knitted fabrics means that basic 'flat' pattern cutting is used to construct the majority of children's wear and babywear and this type of cutting is therefore emphasised in this new edition. Shaped blocks and garments, cut to fit the body form, are still included, and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes. The book now clearly separates the sections useful to student beginners (Parts One, Two and Three), and also offers more advanced or specialist sections for students who wish to pursue a career in children's wear or for designers working in the different manufacturing sectors of the trade. The second change in this fourth edition is the introduction of colour coding to the sections; this makes it easier to identify specific processes in the book and enhances the illustrations. Finally, the size charts have been revised to reflect the changes in body sizing. The clear division of the boys' and girls' measurements in the charts has been in response to the way clothes are marketed and to co-ordinate with European size charts. 'Plus' charts for heavier children have also been added.
