Social Transformation in Post-conflict

Nepal AuthorHouse

Fully revised, this directory contains details of over 700 organizations that are looking for voluntary help from all types of people for all types of work. The book covers short, medium and long term

residential possibilities in Europe and around the world in addition to non-residential opportunities in the UK.

Nepal Studies in the UK, Conversations with Practitioners

Leadership in Business

The impact of COVID-19 on local jobs and workers dwarfs those of the 2008 global financial crisis. The 2020 edition of Job Creation and Local Economic Development considers the short-term impacts on local labour markets as well as the longer-term

implications for local development.

If your popularity and products reach worldwide, that is quite a significant demonstration that you have reached the pinnacle of success. Many elements, including communication, marketing, transportation, and so on, are helpful in gaining such a goal. But an interesting, curious, and obvious case study is that when Buddha was born 2,500 years ago,

aspects of business like communication, transportation, and marketing were not very well developed in comparison with nowadays. How could Lord Buddha and his disciples be successful in spreading Buddhism worldwide? If you want to succeed in your business, read this book. A project of bees can be completed through the mutual work of the queen and worker bees. A queen bee never needs to motivate, inspire, force, or punish the other bees. Humans are more educated than bees, and bosses in business seek to provide training, inspiration, and facilities but workers still do not work. Why? If you want to succeed in your business, read this book. According to the World Health Organization, by the year 2020, depressive illness will become the number-two disease in the world, outpacing diabetes, cancer, arthritis, and so on. Depressive disease is universal and has been prevalent in society since time immemorial. The Hindu Vedas are the oldest holy book in the world. They were written about three thousand years ago, and every logical statement made within them is nowadays proven in science. How do the Vedas explain mind management

for success and becoming mentally healthy? If you want to succeed in your business, read this book.

If current world population trends were to continue, human numbers could more than double to 13 billion people by the end of this century. Given humanity's consumerist trends, with resulting global warming and the overall impact on vulnerable biodiversity and habitat, this would be ecologically disastrous! No Vacancy is that rare chronicle of sobering optimism in a world more accustomed to thinking about population as a dilemma with little hope of positive change. Family planning expert Bob Gillespie and renowned global ecologist, author and film director Michael Tobias journeyed the world in search of answers. This book reveals an exquisite window on

remarkable events occurring in country after country where Tobias and Gillespie discovered changes that have resulted in smaller family sizes and the empowerment of women and children, while creating critical pathways towards ecological sustainability. From Iran, Mexico, Ghana and Nigeria, to countries across Western Europe, as well as the U.S., India, and Indonesia, No Vacancy paints an emotional, at times provocative, portrait of a global transformation; a fertility transition that may well prove to be one of the most important-and timely-ingredients in humanity's survival and the continuation of life on Earth. Book jacket.

Organisation and Finance of International Labour Migration in Nepal Routledge

Grow your start-up into a global influence with real-world impact Scaling Global Change provides social entrepreneurs with the strong organizational foundation they need to change the world. Through the story of Room to Read, one of the fastest-growing nonprofits in the last 18 years, this book features clear, real-world lessons for growing a non-profit or social enterprise, with special insight into girls'

education and literacy programming in lower-income countries. By outlining theories of program, operational, and system-level change, the discussion delves into the meat of the entrepreneurial spirit and applies it directly to everyday strategic decisions. The book begins with an overview of essential communication, vision, and execution fundamentals, and then dives into a discussion of metrics, monitoring, planning, leadership, and more. Clear guidance on internal operations, fundraising, team building, management, and other central topics provides a roadmap for new and experienced leaders, while further exploration of influence, strategy, and government funding relates the wisdom of experience from the perspective of a successful organization. Cross the chasm from start-up to mature organization with worldwide impact Gain insight into the theoretical and practical underpinnings of nonprofit success Adopt new perspectives on effectiveness, excellence, and influence Translate ideas into action in a way that will change the world Social entrepreneurship has taken off more than ever, and the market is

crowded with optimistic leaders wanting to change the world. How do you differentiate your organization from the pack? How can you stand out, stand up, and make a real impact? These lessons are gained through experience and building a strong organizational culture; Room to Read has treaded this path and found itself at the heights of success. With *Scaling Global Change*, you reap the benefit of experiential lessons while applying them to the success of your own organization. **All Royalties from the sale of *Scaling Global Change* will be donated directly to Room To Read**
[Official Journal of the A.A.L.](#) Routledge
 This book is a detailed account of how hierarchy has been maintained historically by the Nepali state, affirming the uniqueness of a caste-based social order by bringing outsiders, especially ethnic groups and religious minorities, into the caste fold. Focusing on the contemporary state of Dalits, the community that was and is put at the bottom of a very hierarchical social order in Nepal, the author argues that the traditional caste-based social order is still prevalent in the “new” Nepal even after the recent socio-

political and constitutional changes. Illustrated by scientifically employed and interpreted data mainly in the three sectors of education, politics and employment, the book postulates that people who were and are born into the “high caste” still have more access to the resources and opportunities available in society in comparison with those born into the “lower” caste. It further argues that although reservation policies are in place to address social exclusion, these could not bring expected outcomes mainly due to the lack of engagement, if not ignorance, of both dominant groups and the community in the margin. The absence of clarity among political actors on the positive discrimination and affirmative actions has contributed to backtracking the recently created space in line with “inclusive Nepal”.

Policies and Practices Arco

If you've been working in a specialized field like supply or logistics, you really yearn to see sample resumes and cover letters of job hunters who have a similar background to yours. These resumes and cover letters were used in real job campaigns, and they speak the language

of supply and logistics. You will gain insights into how to use the specialized language of supply and logistics and actually translate technical concepts of the supply and logistics field into language that can be easily understood.

Reproduction of Inequality and Social Exclusion Routledge

Graph data is powerful, thanks to its ability to model arbitrary relationship between objects and is encountered in a range of real-world applications in fields such as bioinformatics, traffic network, scientific collaboration, world wide web and social networks. Graph data mining is used to discover useful information and knowledge from graph data. The complications of nodes, links and the semi-structure form present challenges in terms of the computation tasks, e.g., node classification, link prediction, and graph classification. In this context, various advanced techniques, including graph embedding and graph neural networks, have recently been proposed to improve the performance of graph data mining. This book provides a state-of-the-art review of graph data mining methods. It addresses a current hot topic--the security

of graph data mining-- and proposes a series of detection methods to identify adversarial samples in graph data. In addition, it introduces readers to graph augmentation and subgraph networks to further enhance the models, i.e., improve their accuracy and robustness. Lastly, the book describes the applications of these advanced techniques in various scenarios, such as traffic networks, social and technical networks, and blockchains. .

International Women's Rights Cases John Wiley & Sons

The last two decades have seen major advances in the legal protection of the human rights of women around the world. A series of international and national court cases has developed an important body of jurisprudence that has been relied on by courts and advocates in many countries to support women's claims for equality and the full enjoyment of human rights and fundamental freedoms. Growing out of a series of judicial colloquia organized by the Commonwealth Secretariat, this compilation brings together a selection of over fifty significant cases from international and national courts. The cases are grouped by theme and

presented in full text or edited format. Together they highlight the way in which courts have used international human rights norms and national constitutional standards to contribute to women's equality. A detailed introduction provides a summary of the significance of the cases and references further material available on women's human rights. Cases decided under United Nations human rights treaties, the European and American Conventions on Human Rights and other international instruments, as well as cases decided by national courts in Asia, Africa, Europe, Australasia, and North America are all included. The compilation will be of interest to all those with an interest in the advancement of the human rights of women especially equality advocates, lawyers and judges, scholars and students.

Emerging Concepts in Nepalese Management Crimson Publishing

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets

the results of human endeavour set in the context of society and culture.

Some Reflections on Nepalese Public Administration and Management PREP Publishing

Leadership in Business AuthorHouse
Direction of Trade Statistics Quarterly, March 2000 Hope Publishing House

The concept of social transformation has been increasingly used to study significant political, socio-economic and cultural changes affected by individuals and groups. This book uses a novel approach from the gender perspective and from bottom up to analyse social transformation in Nepal, a country with a complex traditional structure of caste, class, ethnicity, religion and regional locality and the experience of the ten-year of People's War (1996-2006). Through extensive interviews with women in post-conflict Nepal, this book analyses the intended and unintended impacts of conflict and traces the transformations in women's understandings of themselves and their positions in public life. It raises important questions for the international community about the inevitable victimization of women during mass violence, but it also

identifies positive impacts of armed conflict. The book also discusses how the Maoist insurgency had empowering effects on women. The first study to provide empirical evidence on the relationship between armed conflict and social transformation from gender's perspectives, this book is a major contribution to the field of transitional justice and peacebuilding in post-armed-conflict Nepal. It is of interest to academics researching South Asia, Gender, Peace and Conflict Studies and Development Studies.

Special Hearings Before the Committee on Appropriations, United States Senate, Eighty-eighth Congress, First Session Springer Science & Business Media
Since its establishment as a policy research institute in 1990, the Institute for In- graded Development Studies (IIDS) has been engaged in promoting public awareness and understanding of issues of national importance by undertaking studies and research on contemporary themes. It has been disseminating findings of its studies to policymakers in the public and private sectors and ultimately to the public at large. Water resources is one of

the areas of strong public interest in Nepal. It is considered a potent engine of economic growth. Its optimal use is dependent on, among other things, the cooperation among the riparian countries, especially India and Bangladesh. Water resources development is one of the subjects in which the Institute has been engaged since its beginning by undertaking studies through national professionals and joint studies on the water resources of the Ganges, Brahmaputra and Meghna river basins with policy research institutes from India and Bangladesh. In order to help policymakers to develop long-term perspectives of the need for cooperation for optimal use of water available in the tributaries of the Ganges, the Institute was involved in a major track-two exercise for over five years during the 1990s. The Institute has been undertaking a series of exercises in the form of publication and dissemination of study findings in the field since the early 1990's. In that series, this book is the latest one and is published in collaboration with Springer Science + Business Media BV, Dordrecht, The Netherlands.

Work Your Way Around the World Oxford University Press

Travelling the world is something everyone should do. But a trip of a lifetime does come at a cost, and if you don't want to wait years saving, then *Work your Way Around the World* is the book for you. For summer jobs, volunteering or jobs abroad, *Work Your Way Around the World* is the number one guide for the self-funded world traveller, providing all the information you need to successfully find work abroad. Choose from hundreds of potential job opportunities, from the everyday to the utterly extraordinary: from busking in Paris to marine conservation work in Madagascar. Also includes all the essential, practical advice you need to safely travel the globe, such as work visas, medical information and permits. Find inside: Hundreds of job opportunities across the globe Brand-new chapter offering vital advice on taking a gap year Insightful case studies from travellers who have been there and done it Advice for applying and securing jobs abroad Culture and lifestyle information by country Essential guidance on safe areas to travel - and which places to avoid

Packed with hundreds of irresistible opportunities abroad, *Work Your Way Around the World* is the globetrotter's essential handbook, offering all you need to know to help plan your trip and successfully fund your way around the world.

Working in Asia Routledge

There is a renewed global commitment to 'water for all'. Yet even though women are usually responsible for domestic water provision, their needs and voices continue to be marginalized in the development process. A close analysis of current policy and practice shows that organizations providing improved water supplies to poor communities typically neglect the gendered nature of access to and control over water resources. The resulting gender bias causes inefficiencies and injustices in water provision and reduces the effectiveness of well-meant efforts. This book shows how, in different environmental, historical and cultural contexts, gender has been an important element in water provision. It draws on a wide range of first-hand material, analyzed from different disciplinary perspectives. Case studies include analysis of the role of

water in inhibiting the fight against HIV/AIDS in southern Africa, and the challenges of taking gender into account in large water projects in India and Nepal. [Interview Questions and Answers](#) Springer Nature

In the face of constant change, the nature of business must evolve rapidly if it is to remain relevant to society at large. How then should business change to meet the requirements of the 21st century, in which unbridled globalization and technological advancements are having profound affects on the wellbeing and prosperity of both the people and the planet? The achievement of purpose is the key to successful transformation - not just having a purpose, but making that purpose real at every level of the organization. This is the first book to provide a precise description of how companies can put purpose into practice. Based on a groundbreaking research project undertaken jointly between the Saïd Business School at the University of Oxford and Mars Catalyst, the think tank of Mars Inc., it provides a highly accessible account of how companies should determine and implement their corporate purposes. It outlines why

corporate purpose is so important and how it can both address the major challenges the world faces today and deliver enhanced performance for business. Fourteen detailed case studies illustrate how companies of different sizes, sectors, and geographies have put purpose into practice and their experiences of doing so. These cases give deep insights into the way in which companies can build purposeful businesses, map and shape their ecosystems, identify failures and problems, align management, and create partnerships to deliver their purposes against which they can measure their performance. The achievement of purpose is a very real issue that every responsible leader in business, finance, and business academia must now face. This book will equip executives, managers, investors,

and policymakers with the tools that they require to understand how the notion of corporate purpose should become a corporate reality.

The International Directory of Voluntary Work OECD Publishing

Written by Harvard-trained ex-law firm partner Liz Brown, *Life After Law: Finding Work You Love* with the J.D. You Have provides specific, realistic, and honest advice on alternative careers for lawyers. Unlike generic career guides, *Life After Law* shows lawyers how to reframe their legal experience to their competitive advantage, no matter how long they have been in or out of practice, to find work they truly love. Brown herself moved from a high-powered partnership into an alternative career and draws from this experience, as well as that of dozens of

former practicing attorneys, in the book. She acknowledges that changing careers is hard much harder than it was for most lawyers to get their first legal job after law school but it can ultimately be more fulfilling for many than a life in law. *Life After Law* offers an alternative framework and valuable analytic tools for potential careers to help launch lawyers into new fields and make them attractive hires for non-legal employers.

Labor Relations Weatherhill

This publication provides data on the country and area distribution of countries exports and imports as reported by themselves or by their partners. The quarterly issues cover data for the most recent six quarters and the latest year for about 154 countries and ten quarters and five years for the world and area tables.
