Pale Blue Dot Random  
House  
Through 140 drawings,  
thought experiments,  
recipes, activist

instructions, gardening  
ideas, insurgences and  
personal revolutions,  
artists who spend their  
lives thinking outside  
the box guide you to a  
new worldview; where  
you and the planet are  
one. Everything here is  
new. We invite you to  
rip out pages, to hang  
them up at home, to

draw and scribble, to cook, to meditate, to take the book to your nearest green space. Featuring Olafur Eliasson, Etel Adnan, Alexis Pauline Gumbs, Jane Fonda & Swoon, Judy Chicago, Black Quantum Futurism Collective, Vivienne Westwood, Cauleen Smith, Marina Abramovic, Karrabing Film Collective, and many more.

*Earth* Little, Brown  
Do you wonder if humans are the only beings who wonder if they are alone in the universe? Our sun is a star. In the night sky are all kinds of stars, and orbiting those stars are planets like the ones in our own solar system. Could those planets have life like we do on Earth? Planet Earth is not too big, not too small, not

too hot, and not too cold. It's just right. Our very own Goldilocks planet . . . . Follow a young girl as she explores these questions in this gorgeous book about the wondrous search for another Goldilocks planet.

140 Artists' Ideas for Planet Earth John Wiley & Sons

"An exciting revision of this innovative text, 'Earth: portrait of a planet', third edition, emphasizes active student learning with a new chapter format, interactive media, and the power and insight of Google Earth."--Back cover.

The World Without Us Penguin

A lighthearted nonfiction picture book about the formation and history of the Earth--told from the

perspective of the Earth itself! "Hi, I'm Earth! But you can call me Planet Awesome." Prepare to learn all about Earth from the point-of-view of Earth herself! In this funny yet informative book, filled to the brim with kid-friendly facts, readers will discover key moments in Earth's life, from her childhood more than four billion years ago all the way up to present day. Beloved children's book author Stacy McAnulty helps Earth tell her story, and award-winning illustrator David Litchfield brings the words to life. The book includes back matter with even more interesting tidbits. This title has Common Core connections.

Planet Earth Activity Book Running Press

Kids

Hailed by The New York Times for writing "with wonderful clarity about science . . . that effortlessly teaches as it zips along," nationally bestselling author Robert M. Hazen offers a radical new approach to Earth history in this intertwined tale of the planet's living and nonliving spheres. With an astrobiologist's imagination, a historian's perspective, and a naturalist's eye, Hazen calls upon twenty-first-century discoveries that have revolutionized geology and enabled scientists to envision Earth's many iterations in vivid detail—from the mile-high lava tides of its infancy to the early organisms responsible for more than two-thirds of the mineral

varieties beneath our feet. Lucid, controversial, and on the cutting edge of its field, *The Story of Earth* is popular science of the highest order. "A sweeping rip-roaring yarn of immense scope, from the birth of the elements in the stars to meditations on the future habitability of our world." -*Science* "A fascinating story." -Bill McKibben

Earth Albert Whitman & Company

This new edition will only enhance its success. It has been thoroughly revised to ensure current coverage of all major topics, especially earthquakes (including the disaster in Haiti in 2010), volcanoes, and climate change. The drawn art represents the state of the art and

is both pedagogically innovative and a feast for the eyes. The Google Earth exercises provide virtual field trips to the entire world.

W. W. Norton

The most successful and controversial Cuban Science Fiction writer of all time, Yoss (aka José Miguel Sánchez Gómez) is known for his acerbic portraits of the island under Communism. In his bestselling *A Planet for Rent*, Yoss pays homage to Ray Bradbury's *The Martian Chronicles* and 334 by Thomas M. Disch. A critique of Cuba in the nineties, after the fall of the Soviet Union and the dissolution of the

Warsaw Pact, *A Planet for Rent* marks the debut in English of an astonishingly brave and imaginative Latin American voice. Praise for Yoss "One of the most prestigious science fiction authors of the island." —On Cuba Magazine "A gifted and daring writer." —David Iaconangelo "José Miguel Sánchez [Yoss] is Cuba's most decorated science fiction author, who has cultivated the most prestige for this genre in the mainstream, and the only person of all the Island's residents who lives by his pen." —Cuenta Regresiva Born José Miguel Sánchez Gómez, Yoss assumed his pen name in 1988, when he won the Premio David Award in the science fiction category for

*Timshel*. Together with his peculiar pseudonym, the author's aesthetic of an impetuous rocker has allowed him to stand out amongst his fellow Cuban writers. Earning a degree in Biology in 1991, he went on to graduate from the first ever course on Narrative Techniques at the Onelio Jorge Cardoso Center of Literary Training, in the year 1999. Today, Yoss writes both realistic and science fiction works. Alongside these novels, the author produces essays, Praise for, and compilations, and actively promotes the Cuban science fiction literary workshops, *Espiral* and *Espacio Abierto*. When he isn't translating, David Frye teaches Latin American culture and society at

the University of Michigan. Translations include *First New Chronicle and Good Government* by Guaman Poma de Ayala (Peru, 1615); *The Mangy Parrot* by José Joaquín Fernandez de Lizardi (Mexico, 1816), for which he received a National Endowment for the Arts Fellowship; *Writing across Cultures: Narrative Transculturation in Latin America* by Ángel Rama (Uruguay, 1982), and several Cuban and Spanish novels and poems.

Earth Hour Usborne Books

Fascinating activity book for children to explore the wonders of our planet. The puzzles and activities in this book will take you to the furthest corners of the Earth. You'll spot wildlife in the Amazon

Rainforest and find a wonderful array of corals in the Great Barrier Reef to colour in. You'll discover the highest mountains on all the world's continents and identify volcanoes around the Pacific Ocean in the Ring of Fire. And when you come to reunite a herd of elephants on the African savanna, you'll learn why these amazing creatures are rather like gardeners. The Life and Death of Planet Earth W.W. Norton & Company Move to another planet? Sounds interesting! In our imaginary spaceship, let's check out the planets in our solar system. Mercury is closest, but it has no air, and it's either sizzling hot or bitterly cold. The atmosphere on Venus is poisonous;

plus, human beings would cook there. Mars might work, but you'd always have to be in a protective shelter. And if you got to the outer planets, you couldn't even land as they are mostly made of gas! Our home planet is looking good. Why is Earth so comfortable for plants, animals, and people? As Robert E. Wells explains, it's because of our just-right position from the sun, marvelous atmosphere, and abundant water. Our planet is very special and perfect for us, and that's why we must do all we can to keep Earth healthy.

Earth. The Final Frontier Contrary to popular belief, Earth is not an insignificant blip on the universe's radar. Our world proves anything but average in Guillermo Gonzalez and Jay W. Richards' *The Privileged Planet: How Our Place in the Cosmos Is Designed for Discovery*. But what exactly does Earth bring to the table? How does it prove its worth among numerous planets and constellations in the vastness of the Milky Way? In *The Privileged Planet*, you'll learn about the world's life-sustaining capabilities, water and its miraculous makeup, protection by the

planetary giants, and how our planet came into existence in the first place. How to Build a Habitable Planet W. W. Norton & Company  
This new stand-alone edition of *Geotours Workbook* contains nineteen active-learning tours that take students on virtual field trips to see outstanding examples of geology around the world. *A Planet for Rent* HarperCollins UK  
"Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books."—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it

accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human

race. "Takes readers far beyond *Cosmos* . . . Sagan sees humanity's future in the stars."—Chicago Tribune

**Planet Earth Is Blue**  
Time

Ten profiles of amazing young environmental activists. Each child is captured in a portrait, their achievements described, and filled out with photos. Ends with tips for kids to make a difference.

*The Planet in a Pebble*  
Macmillan

"Every pebble has many stories to tell. Its particular atoms, its crystals, its minerals, its grains, its textures, its strata, its tiny fossils bear evidence to a history that stretches back billions of years."-  
-Book flap.

*The Ultimate Book of Planet Earth* Twirl  
Click flashlights, light

lanterns, and get ready to turn electric lights out to celebrate Earth Hour! Wherever you are, you can help our planet. Kids around the world use electric energy to do all kinds of things--adults do, too! From cleaning the clothes we play in, to lighting up our dinner tables, to keeping us warm and toasty when the weather is cold, electricity is a huge part of our lives. Unfortunately, it can also have a big impact on our planet. Earth Hour--a worldwide movement in support of energy conservation and sustainability--takes place each March and is sponsored by the World Wildlife Fund for Nature (WWF). During Earth Hour, individuals, communities, and businesses in more

than 7,000 cities turn off nonessential electric lights for one hour. Across each continent--from the Eiffel Tower to the Great Wall of China to the Statue of Liberty--one small act reminds all of us of our enormous impact on planet Earth.

#### The Story of Earth Crown

Join fifty inspiring and extraordinary environmental crusaders working to save our planet and see how you can make a difference just like them. Kids across the globe will be moved by the passion of these amazing eco-warriors who have dedicated their lives to making our world a better place. Alongside dynamic illustrations and entertaining biographical

information, you'll find practical tips that anyone can do to help save the earth. Every one of us can make a difference, and, together as an Earth Squad, we can change the world.
