 An eco-spiritual search for light and life

in a world inching towards dystopia Gift In Green, written originally in Malayalam, is a tantalizingly unconventional narrative that explores, on multiple levels, the pain and poetry that eventuate from the disruption of the intimate relationship between a people and their life-world, using water (the 'water-life' of the people of Aathi) as the overarching metaphor that mirrors the degradation of the society. Between the polarities of attachment and abandonment, darkness and light, predatory progress and the sheer will to survive, unfolds the saga of a people confronted by the behemoth of progress driven by Kumaran, who seeks to abandon water-life, threatening its very existence. But such is the author's faith in the resilience of life and nature and

her belief in the futility of trying to control something as fluid and eternal as water-life that what promises to be the end is also the hope of a new beginning. This is the first instance in Indian literary history of a novel in a regional language being translated and published concurrently in English.

Alexandria Ocasio-Cortez may seem like she came from nowhere, but the movement that propelled her to office - and to global political stardom - has been building for 30 years. *We've Got People* is the story of that movement, which first exploded into public view with the largely forgotten presidential run of the Rev. Jesse Jackson, a campaign that came dangerously close to winning. With the party and the nation at a crossroads, this timely and original book offers new insight into how we've gotten where we are - and where we're headed.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as *Auto Repair For Dummies*, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups

and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
