 Analysis of North African revolt against
 authoritarianism, known as the 'Arab
 Spring', embraced reductionist
 explanations such as the social media,
 youth unemployment and citizens'
 agitations to regain dignity in societies
 humiliated by oppressive regimes. This
 book illustrates that reductionist
 approaches can only elucidate some
 symptoms of a social problem while
 leaving unexplained the economic and
 political structures which contributed to it.
 One outcome of quiescence, resource-
 based ethnic and sectarian conflicts and

faulty development paradigm is deepened
 inequality and a wedge between winners
 and losers or affluence, wealth and power
 vis-à-vis poverty and hunger among
 humiliated jobless and hope-less masses.
 The book blends theories of development
 and transition to explain the complex
 factors which contributed to North
 Africans' revolt against authoritarianism
 and its long-term consequences for
 political development in the Arab World.
 This timely book is of great interest to
 researchers and students in Development
 Studies, Economics and Middle Eastern
 Studies as well as policy makers and
 democracy, human rights and social
 justice activists in the Arab world.

**The heterogeneity of
 neuropsychiatric disorders** Springer
 These days, it is easy to be cynical about
 democracy. Even though there are more

democratic societies now (119 and
 counting) than ever before, skeptics can
 point to low turnouts in national elections,
 the degree to which money corrupts the
 process, and the difficulties of mass
 participation in complex systems as just a
 few reasons why the system is flawed. The
 Occupy movement in 2011 proved that
 there is an emphatic dissatisfaction with
 the current state of affairs, particularly
 with the economy, but, ultimately, it failed
 to produce any coherent vision for social
 change. So what should progressives be
 working toward? What should the
 economic vision be for the 21st century?
 After Occupy boldly argues that
 democracy should not just be a feature of
 political institutions, but of economic
 institutions as well. In fact, despite the
 importance of the economy in democratic
 societies, there is very little about it that is

democratic. Questioning whether the lack of democracy in the economy might be unjust, Tom Malleson scrutinizes workplaces, the market, and financial and investment institutions to consider the pros and cons of democratizing each. He considers examples of successful efforts toward economic democracy enacted across the globe, from worker cooperatives in Spain to credit unions and participatory budgeting measures in Brazil and questions the feasibility of expanding each. The book offers the first comprehensive and radical vision for democracy in the economy, but it is far from utopian. Ultimately, After Occupy offers possibility, demonstrating in a remarkably tangible way that when political democracy evolves to include economic democracy, our societies will have a chance of meaningful equality for all.

Education, Learning, Training OUP Oxford

Learn how to provide dental care to any patient, regardless of existing medical conditions. Little and Falace's *Dental Management of the Medically Compromised Patient*, 9th Edition, has been thoroughly revised to give you the information you need to assess common problems, and make safe and healthy dental management decisions. The new addition includes expanded coverage of women's health issues and introduces a process for developing a medical-risk source. Also, each chapter features vivid illustrations and well-organized tables to give you in-depth details and overall summaries to help you get to the root of your future patients' needs. Logical organization of conditions makes it easy for you to understand and follow the material as you prepare to treat patients. Standardized assessment process helps you to ascertain the severity and stability of common medical disorders. Dental management summary table summarizes important factors for consideration in the dental management of medically compromised patients. Over 400 color images provide a visual guide and highlight key information. Dental management box in each chapter allows you to locate key information for evaluating a medically compromised patient. NEW! Thoroughly revised content provides you with the most current, evidence-based information you need to make dental management decisions. NEW! Evidence-based process for creating a medical-risk score enables you to determine whether the benefit of treatment outweighs the risk of a complication. NEW! Expanded coverage of

women's health issues addresses issues specific to women that can impact dental management.

Edeo (Educational Video Online Courses) is one of the pioneering online Courses Creators. We provide Contents and Solutions, online, offline, in Classroom presentation or online lessons, group assignments or personal learning management. We welcome Teachers to join our group and marketing networks (more than 1 million users in our networks and social media, YouTube, Udemy, Amazon, iBook, Teachlr, Google Books, Rakuten Kobo etc.) for: - developing and publishing books, teaching materials - creating and marketing online Video - Hosting online live courses Our Publications including: KDP: Amazon Kindle Books, ebook and Paperback. Udemy: Online Video Courses hosted in Udemy, lifetime access. Quiz: Online Quiz, auto grading and explanations, hosted on Udemy, lifetime access. Skype: Online Live Course via Skype. YouTube: YouTube Live broadcasting. Topics Covering: covering from Kindergarten, YCT (Youth Chinese Test), HSK (Chinese Proficiency Test), IGCSE Chinese, A1, A2 Chinese, IB Chinese, SAT Chinese, AP Chinese, IB Chinese, etc. This is our past 25 years painstaking efforts based on our firsthand experience to teach foreigners. "Share with You What We Know Best" is our Slogan. We start with LEGOO Mandarin and now expand the system into other topics: Bahasa Malaysia, IT eCommerce, Accounting and Finance, Tai Chi Fitness and Qi Gong. You can learn anytime anywhere!

1. The OPSC General Studies I Preliminary Examination is a complete study guide 2. The book is divided into 8 main Sections 3. Solved Papers and 5 Crack Sets for practice 4. Easy to understand Language and Student friendly content for easy learning Odisha Public Service Commission has recently released a notification announcing 392 vacancies for Group A and Group B posts under Odisha Civil Services. Interested candidates must have a bachelors' degree from the recognized institutions. The revised edition of OPSC General Studies I Preliminary Examination serves as complete study guide for those who are appearing for the examination. The book is divided into 8 Main Sections under which each section either divided into Sub Section or Chapters for the complete preparation. Apart from all the

theoretical studies, this book also focuses on the practice portion of candidates by providing Solved Papers and 5 Crack Sets for practice to get exact idea paper the pattern. Providing a complete coverage of the latest syllabus of OPSC Paper I, this book helps to score best in the upcoming OPSC prelims 2021. TOC Solved Papers (2019-2015), HISTORY OF INDIA AND INDIAN NATIONAL MOVEMENT, GEOGRAPHY, INDIAN POLITY AND GOVERNANCE, INDIAN ECONOMY, ENVIRONMENTAL ECOLOGY, SCIENCE, GENERAL KNOWLEDGE, ODISHA: ABOUT THE STATE, 5 crack sets.

IB Mandarin Chinese B (Ab Initio) Vocabulary 2022 Edition 普通话/IBDP CRC Press

IB Mandarin Chinese B (Ab Initio) is for beginners, for example, students whose first language is English but have a little experience in learning Chinese or have no experience. It is only available in Standard Level. By referring HSK (version 2009 and the latest version 2021), we edited a series of Chinese Vocabulary for those who are studying Chinese or preparing international examinations, such as IB, SAT, AP, IGCSE, GCSE Chinese. Combining our 26 years' experience in Teaching and editing our own materials, here is the "LIFE SAVING" book called by many students for their exams. The book give a quick revision for your coming exam! Thanks for your support for us creating better contents for you! It takes our years' painful effort to edit. Grab it!

The Death Penalty Academic Conferences Limited

Um erfolgreich forschend lernen zu können, müssen Schülerinnen und Schüler bestimmte Handlungsweisen erlernen und einüben. In einer Prä-Post-Studie zum Strategielernen wurden das hypothesengeleitete Experimentieren und die Control-of-Variables-Strategie zunächst vermittelt. Danach sollten diese Strategien in zwei Experimentierumgebungen, unterstützt durch z.B. Prompts, angewandt werden. Da sowohl reale Experimente als auch Computersimulationen zum Strategielernen eingesetzt werden können, wurden vier Treatmentgruppen (real-real, real-virtuell, virtuell-real, virtuell-virtuell) miteinander verglichen. Neben Kontrollvariablen wie kognitive Fähigkeiten und Motivation wurden prä-post das Fachwissen, Wissen zum Experimentieren und Wissen zum Strategieinsatz gemessen. Während des Experimentierens wurden die Schülerinnen und Schüler (8. Klasse, Gymnasium, NRW) beobachtet, um herauszufinden, inwiefern sich das Arbeiten mit realen und virtuellen Experimenten unterscheidet und inwiefern

diese Unterschiede eventuelle Unterschiede im Lernzuwachs erklären können. Die Ergebnisse zeigen, dass trotz sehr unterschiedlichen Arbeitens mit realen und virtuellen Experimenten alle Treatmentgruppen deutliche Lernzuwächse aufzeigen.

Rock Engineering and Rock Mechanics: Structures in and on Rock Masses Elsevier Health Sciences

No one can deny the significance attributed to the issue of reconciling work and private life by contemporary society, the EU and other international organisations. Its relevance is evident in the multifaceted nature of this topic and the need for each party to the employment contract to strike a proper balance between professional and personal responsibilities, based on the assumption that people can successfully harmonise their work with life. Following on from these considerations, this volume provides a detailed analysis of work-life balance and its regulation in a number of EU countries, emphasizing the consequences that the current economic crisis has brought about in this field.

Pan-Islamic Connections Logos Verlag Berlin GmbH

Counterterrorism: Reassessing the Policy Response promotes a more nuanced understanding of the effectiveness of current counterterrorism practices and the need for reform. It challenges government, media, and academic accounts that exaggerate terrorist threats, particularly in comparison to other threats such as organized crime. Author BenoGomis r *Edeo & Legoo Mandarin Publications Lists 2021 June Issue* Routledge

In Education, Learning, Training: Critical Issues for Development, renowned scholars and practitioners examine shifts in global education policy and practice over the last 50 years.

ICEL2013-Proceedings of the 8th International Conference on e-Learning SAGE

The fifth edition of this highly praised study charts and explains the progress that continues to be made towards the goal of worldwide abolition of the death penalty. The majority of nations have now abolished the death penalty and the number of executions has dropped in almost all countries where abolition has not yet taken place. Emphasising the impact of international human rights principles and evidence of abuse, the authors examine how this has fuelled challenges to the death penalty and they analyse and appraise the likely obstacles, political and cultural, to further abolition. They discuss the cruel realities of the

death penalty and the failure of international standards always to ensure fair trials and to avoid arbitrariness, discrimination and conviction of the innocent: all violations of the right to life. They provide further evidence of the lack of a general deterrent effect; shed new light on the influence and limits of public opinion; and argue that substituting for the death penalty life imprisonment without parole raises many similar human rights concerns. This edition provides a strong intellectual and evidential basis for regarding capital punishment as undeniably cruel, inhuman and degrading. Widely relied upon and fully updated to reflect the current state of affairs worldwide, this is an invaluable resource for all those who study the death penalty and work towards its removal as an international goal.

The Oxford Handbook of Positive Emotion and Psychopathology Legoo Mandarin

From ancient to modern times, sexualised war violence against women was tolerated if not encouraged as a means of reward, propaganda, humiliation, and terror. This was and is in defiance of international laws that have criminalised acts of sexualised war violence since the 18th century. Ad hoc international tribunals have addressed especially war rape since the 15th century. The International Criminal Court (ICC), however, is the first independent, permanent, international criminal court that recognises not only war rape but also sexual slavery and other sexualised crimes as crimes against humanity, war crimes, and acts of genocide in its statute and supporting documents. This book explores how the ICC definitions of rape and forced marriage came about, and addresses the ongoing challenge of how to define war rape and forced marriage in times of armed conflict in a way that adequately reflects women's experiences, as well as the nature of the crimes. In addition to deepening the understanding of the ICC negotiations of war rape and forced marriage, and of the crimes themselves, this volume highlights relevant factors that need to be considered when criminalising acts of sexualised war violence under international law. *Sexualised Crimes, Armed Conflict and the Law* draws on feminist and constructivist theories and offers a comprehensive theoretical and empirical examination of the definition of rape and forced marriage. It presents the latest state of knowledge on the topic and will be of interest to researchers, academics, policymakers, officials and intergovernmental organisations, and students in the fields of post-conflict law and justice, international law, human

rights law, international relations, gender studies, politics, and criminology.

Elastic Optical Networks John Wiley & Sons

A look at how the desire to improve international status affects Russia's and China's foreign policies Deborah Welch Larson and Alexei Shevchenko argue that the desire for world status plays a key role in shaping the foreign policies of China and Russia. Applying social identity theory--the idea that individuals derive part of their identity from larger communities--to nations, they contend that China and Russia have used various modes of emulation, competition, and creativity to gain recognition from other countries and thus validate their respective identities. To make this argument, they analyze numerous cases, including Catherine the Great's attempts to westernize Russia, China's identity crises in the nineteenth century, and both countries' responses to the end of the Cold War. The authors employ a multifaceted method of measuring status, factoring in influence and inclusion in multinational organizations, military clout, and cultural sway, among other considerations. Combined with historical precedent, this socio-psychological approach helps explain current trends in Russian and Chinese foreign policy.

After Occupy Oxford University Press

This book deals with the widespread economic and financial crime issues of corruption, the shadow economy and money laundering. It investigates both the theoretical and practical aspects of these crimes, identifying their effects on economic, social and political life. This book presents these causes and effects with a state of the art review and with recent empirical research. It compares the international and transnational aspects of these economic and financial crimes through discussion and critical analysis. This volume will be of interest to researchers and policy makers working to study and prevent economic and financial crime, white collar crime, and organized crime.

Immersive Journalism World Bank Publications

This publication contributes to new understandings of how heritage operates as a global phenomenon and the transnational heritage discourses that emerge from this process. Taking such a view sees autochthonous and franchised heritage not as separate or opposing elements but as part of the same process of contemporary globalised identity-making, which contributes to the development of newly emergent cosmopolitan identities. The book critically

examines the processes that are involved in the franchising of heritage and its cultural effects. It does so by examining the connections and tensions that emerge from combining autochthonous and franchised heritage in the United Arab Emirates, providing a unique window in to the process of creating hybrid heritage in non-Western contexts. It develops new ideas about how this global phenomenon works, how it might be characterised and how it influences and is itself affected by local forms of heritage. By exploring how autochthonous and franchised heritage is produced in Abu Dhabi in the United Arab Emirates it becomes clear that Western-dominated practices are often challenged and, perhaps more importantly, that new ways of understanding, producing and living with heritage are being articulated in these previously marginal locations. The book offers innovative insights into heritage as a transnational process, exploring how it operates within local, national and international identity concerns and debates. It will appeal to scholars and students interested in critical heritage studies, museums, tourism, cultural studies and Middle Eastern studies.

Vaccinations American Psychiatric Pub
This volume explores the rise of immersive technologies such as virtual reality, augmented reality, and 360 videos in the newsroom and how they affect newsmaking for journalists, news sources, and audiences. As these technologies offer journalists new and exciting opportunities to connect more deeply, emotionally, and presently with their audience, they also introduce unique ethical and practical questions concerning the collection and use of biometric, sensory, and metadata. Contributors analyze this shift from passive consumption to active engagement in order to investigate the positive and negative impacts that immersive technologies can have on journalistic norms, professional ethics, audience engagement, and data protection. Ultimately, this volume highlights both the potential for these technologies to redefine the relationship between news producers and consumers and the potential challenges their integration may pose. Scholars of journalism, communication, science & technology studies, and digital media will find this book particularly useful.

Management and Diversity Emerald Group Publishing

No fewer than 10 new chapters have been added, and the entire book has been restructured to reflect the American Board of Psychiatry and Neurology's Content

Outline for the Certification Examination in Forensic Psychiatry, thus facilitating its use in preparing for certification or maintaining certification.

IB Chinese courses expect students to demonstrate very good abilities of analyzing literature and languages within cultural and social context. The language B Standard Level (SL) and language B Higher Level (HL) courses are language acquisition courses for students with some previous experience of the target language. The International Baccalaureate Diploma Programme is a two-year educational programme primarily aimed at 16-to-19-year-olds in 140 countries around the world. The programme provides an internationally accepted qualification for entry into higher education and is recognized by many universities worldwide. Based on HSK HSK 4-6 Version

2021 (3335 Words), and IB syllabus, we edited new version for IB Chinese A (HL) Grammar 2022. By referring to IB Chinese Syllabus, AP Chinese, SAT Chinese, Cambridge IGCSE Chinese, Edexcel IGCSE Chinese (another two examination board) and HSK (Chicness Proficiency Test), BCT (Business Chinese), combining our 26 years' experience in Teaching and editing our own materials, here is the "LIFE SAVING" book called by many students for their exams. The book give a quick revision for your coming exam! Thanks for your support for us creating better contents for you! It takes our years' painful effort to edit. Grab it!

Economic and Financial Crime Yale University Press

Reviews the science and engineering of high-temperature corrosion and provides guidelines for selecting the best materials for an array of system processes High-temperature corrosion (HTC) is a widespread problem in an array of industries, including power generation, aerospace, automotive, and mineral and chemical processing, to name a few. This book provides engineers, physicists, and chemists with a balanced presentation of all relevant basic science and engineering aspects of high-temperature corrosion. It covers most HTC types, including oxidation, sulfidation, nitridation, molten salts, fuel-ash corrosion, H₂S/H₂ corrosion, molten fluoride/HF corrosion, and carburization. It also provides corrosion data essential for making the appropriate choices of candidate materials for high-temperature service in process conditions. A form of corrosion that does not require the presence of liquids, high-temperature corrosion occurs due to the interaction at high temperatures of gases, liquids, or solids with materials. HTC is a subject of increasing importance in many areas of science and engineering, and students, researchers, and engineers need to be aware of the nature of the processes that occur in high-temperature materials and equipment in common use today, especially in the chemical, gas, petroleum, electric power, metal manufacturing, automotive, and nuclear industries. Provides engineers and scientists with the essential data needed to make the most informed decisions on materials selection Includes up-to-date information accompanied by more than 1,000 references, 80% of which from within the past fifteen years Includes details on systems of critical engineering importance, especially the corrosion induced by low-energy radionuclides Includes practical guidelines for testing and research in HTC, along with both the

European and International Standards for high-temperature corrosion engineering Offering balanced, in-depth coverage of the fundamental science behind and

engineering of HTC, High Temperature Corrosion: Fundamentals and Engineering is a valuable resource for academic researchers, students, and professionals in

the material sciences, solid state physics, solid state chemistry, electrochemistry, metallurgy, and mechanical, chemical, and structural engineers.
