Crossing Central Europe Cambridge University Press  
The Encyclopedia of Caves and Karst Science contains 350 alphabetically arranged entries. The topics include cave and karst geoscience, cave archaeology and human use of caves, art in caves, hydrology and groundwater, cave and karst history, and conservation and management. The Encyclopedia is extensively illustrated with photographs, maps, diagrams, and tables, and has thematic content lists and a comprehensive index to facilitate searching and browsing.

The Primeiro Comando do Capital (PCC) is a Sao Paulo prison gang that since the 1990s has expanded into the most powerful criminal network in Brazil. Karina Biondi's rich ethnography of the PCC is uniquely informed by her insider-outsider status. Prior to his acquittal, Biondi's husband was incarcerated in a PCC-dominated prison for several years. During the period of Biondi's intense and intimate visits with her husband and her extensive fieldwork in prisons and on the streets of Sao Paulo, the PCC effectively controlled more than 90 percent of Sao Paulo's 147 prison facilities. Available for the first time in English, Biondi's riveting portrait of the PCC illuminates how the organization operates inside and outside of prison, creatively elaborating on a decentered, non-hierarchical, and far-reaching command system. This system challenges both the police forces against which the

PCC has declared war and the methods and analytic concepts traditionally employed by social scientists concerned with crime, incarceration, and policing. Biondi posits that the PCC embodies a "politics of transcendence," a group identity that is braided together with, but also autonomous from, its decentralized parts. Biondi also situates the PCC in relation to redemocratization and rampant socioeconomic inequality in Brazil, as well as to counter-state movements, crime, and punishment in the Americas.

The Anthropocene is a major new concept in the Earth sciences and this book examines the effects on geomorphology within this period. Drawing examples from many different global environments, this comprehensive volume demonstrates that human impact on landforms and land-forming processes is profound, due to various driving forces, including: use of fire; extinction of fauna; development of agriculture, urbanisation, and globalisation; and new methods of harnessing energy. The book explores the ways in which future climate change due to anthropogenic causes may further magnify effects on geomorphology, with respect to future hazards such as floods and landslides, the state of the cryosphere, and sea level. The book concludes with a consideration of the ways in which landforms are now being managed and protected. Covering all major aspects of geomorphology, this book is ideal for undergraduate and graduate students studying geomorphology, environmental science and physical geography, and for all researchers of geomorphology.

Biomedical Natural Language Processing is a comprehensive tour through the classic and current work in the field. It discusses all subjects from both a rule-based and a machine learning approach, and also describes each subject from the perspective of both biological science and clinical medicine. The intended audience is readers who already have a background in natural language processing, but a clear introduction makes it accessible to readers from the fields of bioinformatics and computational biology, as well. The book is suitable as a reference, as well as a text for advanced courses in biomedical natural language processing and text mining.

You bring such scandal to my house. In the domain of Bernarda Alba, a daughter who disobeys is no longer a daughter. Forced to live under their mother's tight grip as they mourn their father's death, can five sisters survive when young Adela dares for passion and freedom? Olivier Award-winner Harriet Walter (Succession) plays the formidable matriarch, guarding her reputation against the rising tide of her family's desires in this pitch-black drama exploring the consequences of oppressing women, in Alice Birch's radical new version of Federico García Lorca's modern masterpiece. This edition published to coincide with the world premiere at the National Theatre, London, in November 2023.

[The House of Bernarda Alba](#) New York Review of Books

This account provides the first comprehensive coverage of the insect and other arthropod pests in the urban environment worldwide. Presented is a brief description, biology, and detailed

information on the development, habits, and distribution of urban and public health pests. There are 570 illustrations to accompany some of the major pest species. The format is designed to serve as a ready-reference and to provide basic information on orders, families, and species. The species coverage is international and based on distribution in domestic and peridomestic habitats. The references are extensive and international, and cover key papers on species and groups. The introductory chapters overview the urban ecosystem and its key ecological components, and a review of the pests status and modern control strategies. The book will serve as a professional training manual, and handbook for the pest control professionals, regulatory officials, and urban entomologists. It is organized alphabetically throughout.

Le tragedie e le vicissitudini della nostra emigrazione che in questo libro Umberto Ursetta riporta alla nostra memoria, sono un monito contro la smemoratezza del nostro tempo. La mancanza di memoria è all'origine dei tanti episodi di razzismo, di odio e di xenofobia nei confronti di chi sbarca sulle nostre coste. È innegabile che stiamo vivendo un momento caratterizzato da una pericolosa regressione culturale che rischia di far precipitare la società in comportamenti sempre più disumanizzanti. Bisogna fare argine a questa deriva regressiva, e un modo per farlo è raccontare la nostra emigrazione che ha avuto una grande importanza nella storia italiana contemporanea.

*The Mind of the Chimpanzee* Cambridge University Press

Digital technologies are spreading rapidly, but digital dividends--

the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1 billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should

countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

World Development Report 2016 Routledge

This volume studies elements of Austro-Hungarian or Central European culture that were common across linguistic, national, and ethnic communities, and shows how some of these commonalities survived or were transformed by the turmoil of the 20th century: two world wars, a major depression between the wars, Stalinism and the Iron Curtain

*The Cambridge Handbook of Corrective Feedback in Second Language Learning and Teaching* Cambridge University Press

As people increasingly migrate to urban settings and more than half of the world's population now lives in cities, it is vital to plan and provide for sustainable and resilient food systems which reflect this challenge. This volume presents experience and evidence-based "state of the art" chapters on the key dimensions of urban food challenges and types of intra- and peri-urban agriculture. The book provides urban planners, local policy makers and urban development practitioners with an overview of crucial aspects of urban food systems based on an up to date review of research results and practical experiences in both

developed and developing countries. By doing so, the international team of authors provides a balanced textbook for students of the growing number of courses on sustainable agriculture, food and urban studies, as well as a solid basis for well-informed policy making, planning and implementation regarding the development of sustainable, resilient and just urban food systems.

Death Wins a Goldfish John Benjamins Publishing Company

This book focuses on difficulties and opportunities in revitalization of old, derelict or abandoned buildings into a library and investigates the transformation of buildings which originally had a different purpose. The publication shows worldwide best practice examples from different types of libraries in historic environments, both urban and rural, while maintaining a focus on sustainability concerning the architecture and interior design.

Stroke Syndromes, 3ed Walter de Gruyter GmbH & Co KG

In some senses, Albania is a living museum of the past. Originally a small herding community in the most inaccessible reaches of the Balkans, the presence of Albanians in southeastern Europe has been documented for over a thousand years. Albanian traditional folk culture, which evolved over centuries of relative isolation, is surprisingly rich. Yet despite recent events this culture remains little known to the Western world. Due to the lasting effects of a half century of Stalinist dictatorship, very few individuals even in Albania know much about their own popular

traditions. The Dictionary of Albanian Religion, Mythology, and Folk Culture makes available for the first time a wealth of knowledge about Albanian popular belief and folk customs. Alphabetical entries shed light on blood feuding, figures of Albanian mythology, religious beliefs, communities, and sects, calendar feasts and rituals, and popular superstitions, as well as birth, marriage, and funeral customs, and sexual mores. This unique volume will stand as the standard reference work on the subject for years to come.

**An Introduction to Flapping Wing Aerodynamics** Springer Science & Business Media

Part of the bestselling saga about childhood friends following different paths by “one of the great novelists of our time” (The New York Times). In the third book in the New York Times–bestselling Neapolitan quartet that inspired the HBO series *My Brilliant Friend*, Elena and Lila have grown into womanhood. Lila married at sixteen and has a young son; she has left her husband and the comforts her marriage brought and now works as a common laborer. Elena has left the neighborhood, earned her college degree, and published a successful novel, all of which has opened the doors to a world of learned interlocutors and richly furnished salons. Both women are pushing against the walls of a prison that would have seen them living a life of misery, ignorance, and submission. They are afloat on the great sea of opportunities that opened up for women during the 1970s. And yet, they are still very much bound to each other in a book that “shows off Ferrante’s strong storytelling ability and will leave readers eager for the final volume of the series” (Library Journal). “One of modern fiction’s richest portraits of a friendship.” —NPR

**The Yellow Woodpecker** Chronicle Books

A novel in the bestselling quartet about two very different women and their complex friendship: “Everyone should read anything with Ferrante’s name on it” (The Boston Globe). The follow-up to *My Brilliant Friend*, *The Story of a New Name* continues the epic New York Times–bestselling literary quartet that has inspired an HBO series, and returns us to the world of Lila and Elena, who grew up together in post-WWII Naples, Italy. In *The Story of a New Name*, Lila has recently married and made her entrée into the family business; Elena, meanwhile, continues her studies and her exploration of the world beyond the neighborhood that she so often finds stifling. Marriage appears to have imprisoned Lila, and the pressure to excel is at times too much for Elena. Yet the two young women share a complex and evolving bond that is central to their emotional lives and a source of strength in the face of life’s challenges. In these Neapolitan Novels, Elena Ferrante, “one of the great novelists of our time” (The New York Times), gives us a poignant and universal story about friendship and belonging, a meditation on love and jealousy, freedom and commitment—at once a masterfully plotted page-turner and an intense, generous-hearted family saga. “Imagine if Jane Austen got angry and you’ll have some idea of how explosive these works are.” —The Australian “Brilliant . . . captivating and insightful . . . the richness of her storytelling is likely to please fans of Sara Gruen and Silvia Avallone.” —Booklist (starred review)
