Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the

characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the

difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese

into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about

Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

Here we will firstly learn how to pronounce each initials and finals, and then we

practice many common words with those combinations of initial and final and tone which are called Pinyin. Learning Chinese is fun. Here in this book, we provide 300 commonly used Chinese characters to help you learn Chinese. Most of the differences between grammar in Mandarin and English play to simplicity on the Mandarin side. While someone learning English might have to become familiar with verb conjugation, non-countable nouns, changes to adverbs, and other concepts that can be difficult to grasp, Mandarin doesn't present as many grammar pitfalls. In Mandarin, nouns have no plural state, and verb conjugation can be done by adding a couple of words. We also provide 116 commonly used Chinese phrases to help you express yourself freely in different occasions.

"The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. Remembering Simplified Hanzi covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are

best learned at an early stage." "Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.
