*Education Groups for Men
Who Batter* Routledge
This book clearly
elucidates many of the
key issues found in the

disparate literature on
sex-based differences in
health and illness. It
provides primary care
clinicians with a practical,
up-to-date source of
information that can lead

to optimal, targeted care for women. Among the topics examined in this comprehensive volume are treating and preventing osteoporosis, diabetes, cervical cancer, eating disorders, and more.

[Linking the Circles of Compassion for Prevention and Intervention](#) Oxford

University Press

In an Abusive State puts forth a powerful argument: that the feminist campaign to stop sexual violence has entered into a

problematic alliance with the neoliberal state. Kristin Bumiller chronicles the evolution of this alliance by examining the history of the anti-violence campaign, the production of cultural images about sexual violence, professional discourses on intimate violence, and the everyday lives of battered women. She also scrutinizes the rhetoric of high-profile rape trials and the expansion of feminist concerns about sexual violence into the international human-

rights arena. In the process, Bumiller reveals how the feminist fight against sexual violence has been shaped over recent decades by dramatic shifts in welfare policies, incarceration rates, and the surveillance role of social-service bureaucracies. Drawing on archival research, individual case studies, testimonies of rape victims, and interviews with battered women, Bumiller raises fundamental concerns about the construction of sexual violence as a social

problem. She describes how placing the issue of sexual violence on the public agenda has polarized gender- and race-based interests. She contends that as the social welfare state has intensified regulation and control, the availability of services for battered women and rape victims has become increasingly linked to their status as victims and their ability to recognize their problems in medical and psychological terms. Bumiller suggests that to counteract these

tendencies, sexual violence should primarily be addressed in the context of communities and in terms of its links to social disadvantage. In an Abusive State is an impassioned call for feminists to reflect on how the co-optation of their movement by the neoliberal state creates the potential to inadvertently harm impoverished women and support punitive and racially based crime control efforts. Intimate Terrorism, Violent Resistance, and

Situational Couple Violence Amer Psychological Assn Stalking has moved from being a novel area for study to become a core area of concern for mental health professionals, lawyers and other members of the criminal justice system. It has emerged as a significant social problem which not only commands considerable public attention but is now, in many jurisdictions, a specific form of criminal offence. This new edition brings the reader

completely up-to-date with the explosion in published research and clinical studies in the field, and covers new issues such as cyberstalking, stalking health professionals, stalking in the workplace, female stalkers, juvenile stalkers, stalking celebrities, evaluating risk in the stalking situation, as well as exploring changes to the legal status of the behaviour. Illustrated with case studies throughout, this is the definitive guide and reference for anyone with professional,

academic or other interests in this complex behaviour.

Domestic and Family Violence SAGE

Publications

Domestic violence is a major public health concern, affecting millions worldwide. It is underreported, often devastating and sometimes ends in murder. In *Toxic Couples: The Psychology of Domestic Violence*, Anna Motz integrates psychological and criminological data with clinical illustrations and

discussion of current high-profile cases. She examines the complex manifestations and multiple causes of intimate partner violence. Motz disentangles the roles played by those involved and examines the addictive nature of these damaging partnerships. The book describes various forms of abuse, including physical, sexual and emotional, and analyses how intimate partner violence can escalate to murder. She explores important factors including: the role of

addiction; homelessness and vulnerability; the intergenerational transmission of abuse; sadomasochistic relationships; honour-based violence. The book emphasizes the significance of female- as well as male-perpetrated violence and outlines the powerful impact on the children of abusive parents, extending the clinical awareness of professionals working with those affected. Toxic Couples: The Psychology of Domestic Violence is ideal for clinicians working

with the victims and perpetrators of intimate partner violence, for students of psychology, gender studies and social care courses and for anyone interested in the psychological forces behind violence in relationships.]
Violence at Work
Routledge
This book discusses causes and precursors of violence, explores the psychological characteristics of perpetrators of violence, and describes and evaluates potential

responses to it.
The Batterer as Parent
Cambridge University Press
Violence against women is one factor in the growing wave of alarm about violence in American society. High-profile cases such as the O.J. Simpson trial call attention to the thousands of lesser-known but no less tragic situations in which women's lives are shattered by beatings or sexual assault. The search for solutions has highlighted not only what we know about violence

against women but also what we do not know. How can we achieve the best understanding of this problem and its complex ramifications? What research efforts will yield the greatest benefit? What are the questions that must be answered? *Understanding Violence Against Women* presents a comprehensive overview of current knowledge and identifies four areas with the greatest potential return from a research investment by increasing the understanding of and

responding to domestic violence and rape: What interventions are designed to do, whom they are reaching, and how to reach the many victims who do not seek help. Factors that put people at risk of violence and that precipitate violence, including characteristics of offenders. The scope of domestic violence and sexual assault in America and its consequences to individuals, families, and society, including costs. How to structure the study of violence against

women to yield more useful knowledge. Despite the news coverage and talk shows, the real fundamental nature of violence against women remains unexplored and often misunderstood. *Understanding Violence Against Women* provides direction for increasing knowledge that can help ameliorate this national problem. *A Typology of Domestic Violence* Policy Press In this volume, the authors present an overview of the innovative work taking place in

relation to domestic violence and child protection. This book looks at new prevention initiatives and how interventions for children exposed to domestic violence have been developed. It shows how services for abusive fathers have evolved and provides discussion and critique of a number of new initiatives in the field of interagency risk assessment. With international perspectives and examples drawn from social care, health care and voluntary sectors, this

book brings together established ideas with recent thinking to provide an authoritative summary of current domestic violence and child protection practice. As a valuable source of guidance on how to work safely with children living with domestic violence, this is a key reference for social workers, health professionals and policy makers.

The Future of Batterer Programs Psychology of Women Book

The Routledge Handbook of Gender and Violence

provides both a comprehensive and authoritative state-of-the-art overview of the latest research in the field of gender and violence. Each of the 23 specially commissioned chapters develops and summarises their key issue or debate including rape, stalking, online harassment, domestic abuse, FGM, trafficking and prostitution in relation to gender and violence. They study violence against women, but also look at male victims and perpetrators as well as gay, lesbian

and transgender violence. The interdisciplinary nature of the subject area is highlighted, with authors spanning criminology, social policy, sociology, geography, health, media and law, alongside activists and members of statutory and third sector organisations. The diversity of perspectives all highlight that gendered violence is both an age-old and continuing social problem. By drawing together leading scholars this handbook provides an up-to-the-minute snapshot of

current scholarship as well as signposting several fruitful avenues for future research. This book is both an invaluable resource for scholars and an indispensable teaching tool for use in the classroom and will be of interest to students, academics, social workers and other professionals working to end gender-based violence. *Men's Experiences of Violence in Intimate Relationships* Purdue University Press
Noblit and Hare propose a method - meta-

ethnography - for synthesizing from qualitative, interpretive studies. They show that ethnographies themselves are interpretive acts, and demonstrate that by translating metaphors and key concepts between ethnographic studies, it is possible to develop a broader interpretive synthesis. *Restorative Justice and Family Violence* Springer
Nature
Decriminalizing Domestic Violence asks the crucial, yet often overlooked, question of why and how

the criminal legal system became the primary response to intimate partner violence in the United States. It introduces readers, both new and well versed in the subject, to the ways in which the criminal legal system harms rather than helps those who are subjected to abuse and violence in their homes and communities, and shares how it drives, rather than deters, intimate partner violence. The book examines how social, legal, and financial resources are diverted

into a criminal legal apparatus that is often unable to deliver justice or safety to victims or to prevent intimate partner violence in the first place. Envisioned for both courses and research topics in domestic violence, family violence, gender and law, and sociology of law, the book challenges readers to understand intimate partner violence not solely, or even primarily, as a criminal law concern but as an economic, public health, community, and human rights

problem. It also argues that only by viewing intimate partner violence through these lenses can we develop a balanced policy agenda for addressing it. At a moment when we are examining our national addiction to punishment, Decriminalizing Domestic Violence offers a thoughtful, pragmatic roadmap to real reform. **The Domestic Assault of Women** Wiley-Blackwell
The state is increasingly experienced as both intrusive and neglectful,

particularly by those living in poverty, leading to loss of trust and widespread feelings of alienation and disconnection. Against this tense background, this innovative book argues that child protection policies and practices have become part of the problem, rather than ensuring children's well-being and safety. Building on the ideas in the best-selling *Re-imagining child protection* and drawing together a wide range of social theorists and disciplines, the book: •

Challenges existing notions of child protection, revealing their limits; • Ensures that the harms children and families experience are explored in a way that acknowledges the social and economic contexts in which they live; • Explains how the protective capacities within families and communities can be mobilised and practices of co-production adopted; • Places ethics and human rights at the centre of everyday conversations and practices. Psychological and Physical

Aggression in Couples
Univ of California Press
Reassesses thirty years of domestic violence research and demonstrates three forms of partner violence, distinctive in their origins, effects, and treatments
Preventing intimate partner violence
Routledge
How can we prevent intimate partner violence (IPV)? And how do we define and measure "success" in preventing it? This book brings together researchers and practitioners from a wide

range of fields to examine innovative strategies and programs for preventing IPV. The authors discuss evaluations of current prevention efforts, paying particular attention to underserved groups, including racial and ethnic minorities, immigrants and refugees. Among the issues addressed are primary prevention programs that target adolescents and young adults, strategies designed to engage men and boys, IPV screening in different settings, the impact of the

criminalization of IPV on minority populations, restorative justice programs, interventions for women who use violence, and innovative shelter programming to prevent re-victimization. The volume concludes by identifying the gaps in knowledge about effective prevention and highlighting the most promising future directions for prevention research and strategies. *How Neoliberalism Appropriated the Feminist Movement Against Sexual Violence* Duke University

Press

This book provides a comprehensive overview of data and emerging trends in research and treatment covering every facet of partner aggression.

Psychological and Criminal Justice

Perspectives Routledge

This classic volume provides a solid foundation for thinking about creative ways in which our society can work to prevent or minimize destructive couple conflict and enhance couples' abilities

to constructively handle their differences. A common thread throughout is that constructive conflict and negotiation are beneficial for relationships. The new introduction provides an overview of how this classic text is still relevant today. Divided into four parts, this book:

*addresses the societal and bio-evolutionary underpinnings of couple conflict; *presents the interpersonal roots of couple conflict and the consequences for individuals and couples;

*discusses what effects couple conflict have on children and how individual differences in children moderate these effects; *outlines policies and programs that address couple conflict; and * concludes with an essay that pulls these four themes together and points to new directions for research and program efforts. This book serves as a supplement in graduate or advanced undergraduate courses on interpersonal relationships, couples and/or family and conflict,

divorce, couples and/or family therapy taught in human development and family studies, clinical or counseling psychology, social work, sociology, and communications and it is also a helpful compendium for researchers and clinicians/counselors interested in couple conflict.

A Handbook for Primary Care National Academies Press
Surveys reveal that domestic abuse is more commonplace among teenagers and young

adults than older populations, yet surprisingly little is written about young men's involvement in it. Reporting on a three-year study based in the UK, this book explores young men's involvement in domestic abuse, whether as victims, perpetrators or witnesses to violent behaviors between adults. Original survey data, focus group material and in-depth biographical interviews are used to make the case for a more thoroughgoing engagement with the

meanings young men come to attribute to violent behavior, include the tendency among many to configure violence within families as "fights" that call for acts of male heroism. The book also highlights the dearth of services interventions for young men prone to domestic abuse, and the challenges of developing responsive practice in this area. Each section of the book highlights further online resources that those looking to conduct research in this area or

apply its insights in practice can draw upon. *Violent Crime* SAGE Listening to Battered Women: A Survivor-Centered Approach to Advocacy. Mental Health, and Justice presents an in-depth, multidisciplinary look at society's responses to domestic violence. Although substantial reforms have been made in the services available to battered women since the 1970s, the book shows how the public and private systems available to victims of domestic

violence are still failing to meet the needs of the women who seek help. Using a feminist perspective, authors Lisa A. Goodman and Deborah Epstein explore and critique the current available services in three different arenas: the domestic violence advocacy community, the mental health profession, and the justice system. *Coercive Control* Springer

Science & Business Media Drawing on cases, Stark identifies the problems with our current approach to domestic violence, outlines the components of coercive control, and then uses this alternate framework to analyse the cases of battered women charged with criminal offenses directed at their abusers.
