Uncertainty is certain to be found in structural engineering, making it crucial to structure design. This book covers three competing philosophies behind structural safety and reliability: probabilistic analysis, fuzzy-sets based treatments, and the convex approach. Explaining the theory behind probabilistic analysis, fuzzy-sets based treatments, and the convex approach in detail, alongside their implementation, use and benefits, the book compares and contrasts these methods, enabling the reader to solve problems associated with uncertainty. These uncertainty issues can be seen in the examples of civil engineering structures and the risk of earthquakes, the impact of rough seas on a ship, and the problem of turbulence for aerospace vehicles. Building on the authors' years of

experience in the field, the book is an essential guide to structural uncertainty. Topics covered in the book include properties of materials and their structural deterioration, safety factor and reliability, risk evaluation and loads and their combinations. The book will be of interest to students and professionals in the field of aerospace, civil, mechanical, marine and ocean engineering.

Sadhguru presents a rare glimpse of undiluted truth from discourses given to seekers at the Isha Yoga Center and around the world. A tool of tremendous value in an age imprisoned by materialism and dogma, these dialogues are an essential key to inner exploration of the profound questions of humanity: Who am I? Why are we here? What is the meaning of life? The master speaks with undeniable logic and wisdom that penetrates the deepest realms of our heart and soul

Bestselling author Tony Horwitz tells the electrifying tale of the daring insurrection that put America on the path to bloody war. Plotted in secret, launched in the dark, John Brown's raid on Harpers Ferry was a pivotal moment in U.S. history. But few Americans know the true story of the men and women who launched a desperate strike at the slaveholding South. Now, *Midnight Rising* portrays Brown's uprising in vivid color, revealing a country on the brink of explosive conflict. Brown, the descendant of New England Puritans, saw slavery as a sin against America's founding principles. Unlike most abolitionists, he was willing to take up arms, and in 1859 he prepared for battle at a hideout in Maryland, joined by his teenage daughter, three of his sons, and a guerrilla band that included former slaves and a dashing spy. On October 17, the raiders seized Harpers Ferry, stunning the nation and prompting a counterattack led by Robert E. Lee. After Brown's capture, his defiant eloquence galvanized the North and appalled the South, which

considered Brown a terrorist. The raid also helped elect Abraham Lincoln, who later began to fulfill Brown's dream with the Emancipation Proclamation, a measure he called "a John Brown raid, on a gigantic scale." Tony Horwitz's riveting book travels antebellum America to deliver both a taut historical drama and a telling portrait of a nation divided—a time that still resonates in ours.

A fleeing impala leaps through an open car window. A lion charges around inside a busy rest camp. A hyaena snatches a baby from a tent. A tourist takes a bath in a croc-infested dam... These are just a few of the 101 jaw-dropping sightings, scrapes and encounters in this collection of extraordinary true stories from the roads, camps, picnic sites and walking trails of South Africa's Kruger National Park, as told by the very people who experienced them. There are no game ranger tales here - each and every story happened to an ordinary Kruger visitor doing what over a million tourists do in this spectacular reserve each year." -- Back cover.

Britain, in the mid 21st  
century. A new prime  
minister, Lev Solokov is  
elected. In spite of his  
Russian surname, he is  
the charismatic politician  
who, on the surface,  
appears to be just what  
Britain needs. But he's not  
what Gavin needs. Gavin  
is a Pustoy, a human who,  
among countless others,  
Solokov's researchers has  
declared a soulless,  
subhuman race. Solokov  
joins a dark lineage of  
genocidal tyrants that  
have gone before him. In  
synthesizing his own race  
to persecute others,  
perhaps he has  
succeeded in a horror  
more insidious than any of  
his forebears, especially  
as he appears to have  
done so with both  
overwhelming public  
blessing and  
encouragement. Or at  
least he would have, if not  
for the increasing din of  
the Pustoy protesting  
outside his offices.  
Chosen at random owing

to his position as a  
forefront campaigner for  
the rights of the Pustoy,  
Gavin is framed for a  
crime he didn't commit  
and is forced to go on the  
run, and so Solokov in one  
fell swoop kills any  
budding sympathy the  
people may have had for  
the Pustoy, and would  
appear to have silenced  
one of his loudest  
protestors. Just who are  
the Pustoy of this world?  
The persecutors or the  
persecuted? Will Gavin  
remain a hunted  
scapegoat? Is Solokov  
acting for the greater  
good; are the Pustoy  
really devoid of a soul?  
More importantly, how far  
away is this future, really?  
Phillipe Blenkiron's  
conceptual poetry  
collection demands these  
questions of the reader,  
whilst offering an  
unflinching examination  
of the human psyche,  
exploring the clouded  
moral hues between black  
and white, between right  
and wrong, that exist  
inside all of us. For fans of  
"1984," "Brave New  
World," and other greats  
of dystopian fiction,  
Philippe Blenkiron's debut  
poetry collection is  
shocking, unsettling, and  
closer to real-life than we  
dare admit...

This engaging

introduction to random  
processes provides  
students with the critical  
tools needed to design  
and evaluate engineering  
systems that must  
operate reliably in  
uncertain environments. A  
brief review of probability  
theory and real analysis of  
deterministic functions  
sets the stage for  
understanding random  
processes, whilst the  
underlying measure  
theoretic notions are  
explained in an intuitive,  
straightforward style.  
Students will learn to  
manage the complexity of  
randomness through the  
use of simple classes of  
random processes,  
statistical means and  
correlations, asymptotic  
analysis, sampling, and  
effective algorithms. Key  
topics covered include: •  
Calculus of random  
processes in linear  
systems • Kalman and  
Wiener filtering • Hidden  
Markov models for  
statistical inference • The  
estimation maximization  
(EM) algorithm • An  
introduction to  
martingales and  
concentration inequalities.  
Understanding of the key  
concepts is reinforced  
through over 100 worked  
examples and 300  
thoroughly tested  
homework problems (half  
of which are solved in

detail at the end of the book).

 Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction,

political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.
