waves are capable of passing through the earth from one side to another with no loss of field strength as Tesla showed in one of his experiments. Traveling faster than the speed of light (superluminal), Scalar Waves are not electromagnetic but composed of pure zero point energy. They also have the potential to be used as a power source. Nickola Tesla's Scalar Waves - what are Scalar Waves ... There are two types of scalar waves: the electric scalar waves

and magnetic scalar wave. The top of the antenna where the metal ball is has the strongest electric strength and so exit the electric scalar waves (Tesla Waves).
