## **KOLE BROCK**

**BIOS Instant Notes in Inorganic Chemistry** Garland Science Instant Notes in Molecular Biology, Fourth Edition is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts—an ideal revision checklist—followed by a description of the subject that focuses on core information, with clear, simple diagrams that are easy for students to understand and recall in essays and exams.

*BIOS Instant Notes in Physical Chemistry* Garland Science Instant Notes in Inorganic Chemistry, second edition has been fully updated and new material added on developments in noble-gas chemistry and the synthesis, reactions and characterization of inorganic compounds. New chapters cover the classification of inorganic reaction types concentrating on those useful in synthesis; techniques used in characterizing compounds, including elemental analysis; spectroscopic methods (IR, NMR) and structure determination by X-ray crystallography; and the factors involved in choosing appropriate solvents for synthetic reactions. The new edition continues to provide concise coverage of inorganic chemistry at an undergraduate level, offering easy access to all important areas of inorganic chemistry in a format which is ideal for learning and rapid revision.

### **BIOS Instant Notes in Genetics** Routledge

This book is designed to give students rapid and easy access to key ecological material to assist learning and revision. Key topics such as populations and interactions, ecosystems, population genetics, community patterns and many more are structured into manageable sections, each cross-referenced, to allow easy navigation through the information.

### BIOS Instant Notes in Neuroscience Garland Science

A major update of the highly popular second edition, with changes in the content and organisation that reflect advances in the subject. New and expanded topics include cytoskeleton, molecular motors, bioimaging, biomembranes, cell signalling, protein structure, and enzyme regulation. As with the first two

editions, the third edition of Instant Notes in Biochemistry provides the essential facts of biochemistry with detailed explanations and clear illustrations.

*BIOS Instant Notes in Physiological Psychology* Garland Science Instant Notes in Sport and Exercise Physiology looks at the key topics in exercise physiology and examines how each of the physiological systems responds to acute and chronic exercise. As well as reviewing special topics such as nutrition, altitude, temperature, and ergogenic acids, it assesses the importance of exercise to health and quality of life and considers the importance of exercise to adults, children and the elderly.

### *BIOS Instant Notes in Human Physiology* Taylor & Francis

The new edition of Instant Notes in Molecular Biology has been revised and updated to include information on micro RNAs, RNA inhibition, functional genomics, proteomics, imaging, stem cells and bioinformatics. Written in an accessible style, the book will be a highly useful tool for studying molecular biology.

### *Instant Notes: Ecology, Second Edition* Garland Science

Instant Notes in Ecology provides concise yet comprehensive coverage of ecology at an undergraduate level, providing easy access to the core information in the field. The book covers all the important areas of ecology in a format which is ideal for learning and rapid revision.

### BIOS Instant Notes in Psychology Taylor & Francis

Instant Notes Sport and Exercise Biomechanics provides a comprehensive overview of the key concepts in exercise and sport biomechanics. The kinematics of motion are reviewed in detail, outlining the physics of motion. Mechanical characteristics of motion, the mechanisms of injury, and the analysis of the sport technique provides a source of valuable information.

### **Ecology** Taylor & Francis

*BIOS Instant Notes in Microbiology*, Fourth Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. Each topic begins with a summary of essential facts—an ideal revision checklist—followed by a description of the subject that focuses on core information, with cle

### BIOS Instant Notes in Molecular Biology Ecology

The second edition of Instant Notes in Neuroscience covers

neuroanatomy, cellular and molecular neuroscience, systems neuroscience, behavior, development of the nervous system, learning, memory, and common brain disorders. It gives rapid and easy access to the core of the subject in an affordable and manageable-sized text.

### BIOS Instant Notes in Cognitive Psychology Taylor & Francis

The second edition of Instant Notes in Neuroscience covers neuroanatomy, cellular and molecular neuroscience, systems neuroscience, behavior, development of the nervous system, learning, memory, and common brain disorders. It gives rapid and easy access to the core of the subject in an affordable and manageable-sized text.

### BIOS Instant Notes in Sport and Exercise Physiology Garland Science

Instant Notes in Analytical Chemistry provides students with a thorough comprehension of analytical chemistry and its applications. It supports the learning of principles and practice of analytical procedures and also covers the analytical techniques commonly used in laboratories today.

### BIOS Instant Notes in Microbiology Taylor & Francis

Instant Notes in Mathematics and Statistics for Life Scientists is aimed at undergraduate life science students who need to improve or brush-up their mathematical and statistical skills to a level which will make the quantitative components of most undergraduate biological courses accessible.

Taylor & Francis

*BIOS Instant Notes in Microbiology*, Fourth Edition, is the perfect text for undergraduates looking for a concise introduction to the subject, or a study guide to use before examinations. ### *BIOS Instant Notes in Molecular Biology* Garland Science

The second edition of Instant Notes in Bioinformatics introduced the readers to the themes and terminology of bioinformatics. It is divided into three parts: the first being an introduction to bioinformatics in biology; the second covering the physical, mathematical, statistical and computational basis of bioinformatics, using biological examples wherever possible; the

third describing applications, giving specific detail and including data standards. The applications covered are sequence analysis and annotation, transcriptomics, proteomics, metabolite study, supramolecular organization, systems biology and the integration of-omic data, physiology, image analysis, and text analysis.

**BIOS Instant Notes in Chemistry for Biologists** Garland Science

Instant Notes in Biochemistry, 2/e provides an easy access to the fundamentals in this field. The book is a major update on the very successful first edition with expanded coverage of transcription, RNA processing and protein synthesis and many additional new topics. New illustrations have been added and much of the artwork has been enlarged or redrawn to aid comprehension.

*Instant Notes in Physical Chemistry* Taylor & Francis

Instant Notes in Physical Chemistry introduces the various aspects of physical chemistry in an order that gives the opportunity for continuous reading from front to back. The background to a range of important techniques is incorporated to reflect the wide application of the subject matter. This book provides the key to the understanding and learning of physical chemistry.

Taylor & Francis

Instant Notes in Sport and Exercise Psychology provides concise coverage of sport and exercise psychology at the undergraduate level, and also covers the crucial basic psychology that underpins the subject. It has four main themes: theoretical approaches and research methods sport psychology at both the individual and group level of analysis exercise psychology practical applications including performance enhancement and ethics. Suitable for students in sport and exercise science, sport psychology, sport studies and sports management, it will be useful for coaches and athletes who wish to gain an up-to-date understanding of the key concepts, theories and research in this area.
