When Aldous Huxley's *Brave New World* first appeared in 1932, it presented in terms of purest fantasy a society bent on self-destruction. Few of its outraged critics anticipated the onset of another world war with its Holocaust and atomic ruin. In 1948, seeing that the probable shape of his anti-utopia had been altered inevitably by the facts of history, Huxley wrote *Ape and Essence*. In this savage novel, using the form of a film scenario, he transports us to the year 2108. The setting is Los Angeles where a "rediscovery expedition" from New Zealand is trying to make sense of what is left. From chief botanist Alfred Poole we learn, to our dismay, about the twenty-second-century way of life. "It was inevitable that Mr. Huxley should have written this book: one could almost have seen it since Hiroshima is the necessary sequel to *Brave New World*."—Alfred Kazin. "The book has a certain awesome impressiveness; its sheer intractable bitterness cannot but affect the reader."—Time.

Winner of the Pulitzer Prize in Fiction Winner of the William Dean Howells Medal Shortlisted for the Man Booker Prize Over One Year on the New York Times Bestseller List A New York Times Notable Book and a Washington Post, Time, Oprah Magazine, Newsweek, Chicago Tribune, and Kirkus Reviews Best Book of the Year "The best novel ever written about trees, and really just one of the best novels, period." —Ann Patchett *The Overstory*, winner of the 2019 Pulitzer Prize in Fiction, is a sweeping, impassioned work of activism and resistance that is also a stunning evocation of—and paean to—the natural world. From the roots to the crown and back to the seeds, Richard Powers's twelfth novel unfolds in concentric rings of interlocking fables that range from antebellum New York to the late twentieth-century Timber Wars of the Pacific Northwest and beyond. There is a world alongside ours—vast, slow, interconnected, resourceful, magnificently inventive, and almost invisible to us. This is the story of a handful of people who learn how to see that world and who are drawn up into its unfolding catastrophe.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." —Jonathan Yardley, *The Washington Post Book World*

'The Phoenix and the Turtle' is an allegorical poem about the death of ideal love by William Shakespeare. It is widely considered to be one of his most obscure works and has led to many conflicting interpretations. The poem describes a funeral arranged for the deceased Phoenix and Turtledove, respectively emblems of perfection and of devoted love. Some birds are invited, but others excluded. It goes on to state that the love of the birds created a perfect unity which transcended all logic and material fact. It concludes with a prayer for the dead lovers.

If you dabble or delay, you’ll never catch up to the people who got a head start. But a closer look at research on the world’s top performers, from professional athletes to Nobel laureates, shows that early specialization is the exception, not the rule. David Epstein examined the world’s most successful athletes, artists, musicians, inventors, forecasters and scientists. He discovered that in most fields—especially those that are complex and unpredictable—generalists, not specialists, are primed to excel. Generalists often find their path late, and they juggle many interests rather than focusing on one. They’re also more creative, more agile, and able to make connections their more specialized peers can’t see. Provocative, rigorous, and engrossing, *Range* makes a compelling case for actively cultivating inefficiency. Failing a test is the best way to learn. Frequent quitters end up with the most fulfilling careers. The most impactful inventors cross domains rather than deepening their knowledge in a single area. As experts silo themselves further while computers master more of the skills once reserved for highly focused humans, people who think broadly and embrace diverse experiences and perspectives will increasingly thrive.

Written in the middle of a pandemic, this book examines the effect of COVID-19 on regional and global security threats in the first 18 months of the crisis. Throughout history, epidemics have disrupted human civilisations, changed the structure of societies, decided the outcome of wars and prompted incredible technological innovation. Despite massive progress in science, institution-building and cooperation over the past 100 years, COVID-19 has revealed the weaknesses of a world under-prepared for a new disease - that had been widely expected and long overdue! This edited volume brings together leading security experts from Africa, Asia, Europe, the Americas and the Middle East to share their analysis of the COVID-19 outbreak and its impact on major security threats, including the rise of terrorists and criminal networks and global power politics. The book highlights important lessons learnt from all corners of the planet, in particular the need for cross-sectional, regional and international cooperation and solidarity when it comes to facing any transnational security threat that does not respect political boundaries.
