*George A. Kubler and the Shape of Art  
History* John Wiley & Sons

Offers a comprehensive perspective on knowledge production in the field of sociology. Moreover, it is a tribute to the scope of Merton's work and the influence Merton has had on the work and life of sociologists around the world. This is

reflected in each of the 12 chapters by internationally acclaimed scholars witnessing the range of fields Merton has contributed to as well as the personal impact he has had on sociologists. This approach is in itself a tribute to Merton: an analysis of knowledge production through a contextualized review of an author's life-work – a quintessentially "Mertonian" enterprise.

An illuminating intellectual biography of a pioneering and singular figure in American art history. Art historian George A. Kubler (1912–1996) was a foundational scholar of ancient American art and archaeology as well as Spanish and Portuguese architecture. During over five decades at Yale University, he published seventeen books that included innovative monographs, major works of synthesis, and an influential theoretical treatise. In this biography, Thomas F. Reese analyzes the early formation, broad career, and writings of Kubler, casting nuanced light on the origins and development of his thinking. Notable in Reese's discussion and contextualization of Kubler's writings is a revealing history and analysis of his Shape of Time—a

book so influential to students, scholars, artists, and curious readers in multiple disciplines that it has been continuously in print since 1962. Reese reveals how pivotal its ideas were in Kubler's own thinking: rather than focusing on problems of form as an ordering principle, he increasingly came to sequence works by how they communicate meaning. The author demonstrates how Kubler, who professed to have little interest in theory, devoted himself to the craft of art history, discovering and charting the rules that guided the propagation of structure and significance through time. [Integrating Racial Justice Into Your High-School Biology Classroom](#) Springer Science & Business Media  
Co-published with University Council for

Educational Administration (UCEA), this textbook prepares aspiring educational leaders for the important and challenging task of supporting instruction in their schools. *Instructional Leadership in the Content Areas* equips leaders—who might not have content backgrounds that align with those of the teachers they supervise—with research-based practices and knowledge specific to a range of subject areas. Presenting over 20 problems-based cases at the elementary, middle, and high school levels and across seven areas of content, this book deepens knowledge of exemplary instruction, improves feedback dialogues, and helps leaders work effectively alongside teachers and instructional specialists. Rich with activities, resources, and discussion

questions, this casebook provides a broad overview of instructional leadership and the tools for school leaders to improve and support classroom practices across all content areas in intentional ways that support career-long professional growth. Case facilitation notes are available here: [www.routledge.com/9781138578845](http://www.routledge.com/9781138578845)

A “compelling and shocking account” of a brutal campaign of repression in Latin America, based on interviews and previously secret documents (The Miami Herald). Throughout the 1970s, six Latin American governments, led by Chile, formed a military alliance called Operation Condor to carry out kidnappings, torture, and political assassinations across three continents. It

was an early “war on terror” initially encouraged by the CIA—which later backfired on the United States. Hailed by Foreign Affairs as “remarkable” and “a major contribution to the historical record,” *The Condor Years* uncovers the unsettling facts about the secret US relationship with the dictators who created this terrorist organization. Written by award-winning journalist John Dinges and updated to include later developments in the prosecution of Pinochet, the book is a chilling yet dispassionately told history of one of Latin America’s darkest eras. Dinges, himself interrogated in a Chilean torture camp, interviewed participants on both sides and examined thousands of previously secret documents to take the reader inside this underground world of

military operatives and diplomats, right-wing spies and left-wing revolutionaries. “Scrupulous, well-documented.” —The Washington Post “Nobody knows what went wrong inside Chile like John Dinges.” —Seymour Hersh

The papers published in this volume reflect the latest developments that have taken place in the field of the teaching applications of text corpora, with a special emphasis on their use in the foreign language classroom. The book is divided into three main sections. The first section sets the scene for what this collection of essays aims to be. It deals with the issue of what corpus linguistics can do not only for the understanding of the nature of language itself but also for so fundamental and miraculous a matter such as language learning and language acquisition. The second section tackles the issues of corpus design and corpus exploitation and provides the reader with a great variety of evidence in favour of corpora exploitation for the building of a

successful teaching environment. The final section deals with practical applications of corpora in the foreign language classroom.

Approaches to Specialised Discourse in Higher Education and Professional Contexts Routledge

Mentoring demonstrably increases the retention of undergraduate and graduate students and is moreover invaluable in shaping and nurturing academic careers. With the increasing diversification of the student body and of faculty ranks, there's a clear need for culturally responsive mentoring across these dimensions. Recognizing the low priority that academia has generally given to extending the practice of mentoring - let alone providing mentoring for Black, indigenous, and people of color (BIPOC)

and first generation students - this book offers a proven and holistic model of mentoring practice, developed in the field of psychology, that not only helps mentees navigate their studies and the academy but provides them with an understanding of the systemic and racist barriers they will encounter, validates their cultural roots and contributions, and attends to their personal development. Further recognizing the demands that mentoring places on already busy faculty, the model addresses ways of distributing the work, inviting White and BIPOC faculty to participate, developing mentees' capacities to mentor those that follow them, building a network of mentoring across generations, and adopting group mentoring. Intentionally planned and

implemented, the model becomes self-perpetuating, building an intergenerational cadre of mentors who can meet the growing and continuing needs of the BIPOC community. Opening with a review of the salient research on effective mentoring, and chapters that offer minority students' views on what has worked for them, as well as reflections by faculty mentors, the core of the book describes the Freedom Train model developed by the godfather of Black psychology, Dr. Joseph White, setting out the principles and processes that inform the Multiracial / Multiethnic / Multicultural (M3) Mentoring Model that evolved from it, and offers an example of group mentoring. While addressed principally to faculty interested in undertaking mentoring, and supporting

minoritized students and faculty, the book also addresses Deans and Chairs and how they can create Freedom Train communities and networks by changing the cultural climate of their institutions, providing support, and modifying faculty evaluations and rewards that will in turn contribute to student retention as well as creative and productive scholarship and research. This is a timely and inspiring book for anyone in the academy concerned with the success of BIPOC students and invigorating their department's or school's scholarship. *Research Anthology on Bilingual and Multilingual Education* Cengage Learning *Perspectives on Language Assessment Literacy* describes how the elements of language assessment literacy can help teachers gather information about when

and how to assess learners, and about using the appropriate assessment tools to interpret results in a fair way. It provides highlights from past and current research, descriptions of assessment processes that enhance LAL, case studies from classrooms, and suggestions for professional dialogue and collaboration. This book will help to foster continuous learning, empower learners and teachers and make them more confident in their assessment tasks, and reassure decision makers that what is going on in assessment meets international benchmarks and standards. It addresses issues like concepts and challenges of assessment, the impacts of reflective feedback on assessment, the ontogenetic nature of assessment literacy, the reliability of classroom-

based assessment, and interfaces between teaching and assessment. It fills this gap in the literature by addressing the current status and future challenges of language assessment literacy. This book will be of great interest for academics, researchers, and post-graduate students in the fields of language assessment literacy and English language teaching.

Revue Canadienne Des Langues Vivantes Central European University Press

There are three major myths of human nature: humans are divided into biological races; humans are naturally aggressive; and men and women are truly different in behavior, desires, and wiring. In an engaging and wide-ranging narrative, Agustín Fuentes counters

these pervasive and pernicious myths about human behavior. Tackling misconceptions about what race, aggression, and sex really mean for humans, Fuentes incorporates an accessible understanding of culture, genetics, and evolution, requiring us to dispose of notions of “nature or nurture.” Presenting scientific evidence from diverse fields—including anthropology, biology, and psychology—Fuentes devises a myth-busting toolkit to dismantle persistent fallacies about the validity of biological races, the innateness of aggression and violence, and the nature of monogamy and differences between the sexes. A final chapter plus an appendix provide a set of take-home points on how readers can myth-bust on their own. Accessible,

compelling, and original, this book is a rich and nuanced account of how nature, culture, experience, and choice interact to influence human behavior.

In the schools of today, English learners are the fastest-growing segment of the student population. As such, it is increasingly imperative to educate these students properly, while still practicing inclusion for overall student success. The Handbook of Research on Pedagogies and Cultural Considerations for Young English Language Learners is an authoritative research publication on research-based, theoretical frameworks and best practices for teaching young English language learners. Featuring exhaustive coverage on a variety of

topics and perspectives such as co-teaching, inclusion, and social awareness, this publication is ideally designed for academicians, researchers, and students seeking current research on the examination of how diverse backgrounds, cultures, and experiences contribute to curriculum and pedagogy for bilingual young learners.

Instructional Leadership in the Content Areas Routledge

This helpful resource includes a Video Manual to help you recall and consider both cultural and lexical information presented in the video program. Video activities in the Workbook cover cultural, country-focused footage from the corresponding chapter in the text, while video activities in the Lab Manual cover the linguistic and thematic portions. This

streamlined system features practice in structures and vocabulary, abundant listening comprehension practice with dialogues, simulated conversation, and pronunciation practice. The Workbook also features ♦A repasar♦ self-tests at the end of each chapter that allow you to assess your mastery of the targeted structures and vocabulary. Also available on iLrn: Heinle Learning Center.

In spite of the fact that APOS Theory has been used extensively in numerous scholarly publications, in the design of textbooks, and in teaching practice, there is no single references that contains all the relevant information about its components, and provides guidance about its application. The goal of this book is to present the main

elements of APOS theory. It should be useful for researchers who work with, or would like to learn more about, this theoretical approach, people who are interested in the way which mathematical conceptions are constructed according to this theory, Mathematics Education researchers, graduate students in Mathematics Education, and Mathematics instructors.

Golosa Vanderbilt University Press  
Approaches to Specialised Discourse in Higher Education and Professional Contexts brings together a number of studies by various authors in the

common field of languages for specific purposes (LSP). This area faces a major challenging need to work with both specialised content and language, a complex combination which can be discouraging to many a language teacher from a traditional philological background. In the introduction to this volume, Dr. Martin Hewings asks how these teachers, as mere onlookers on specialist areas in higher education and the professions, are successfully to teach students communication skills. The answer is most probably contained in no single approach or scope, but rather in a multiple probing of methods aimed at the empirical observation and analysis of language use in the specific contexts in which they are housed. The studies presented herein illustrate such a multi-

fold scenario, analysing and sharing significant findings on discourse across academic disciplines and professional areas. The authors not only evince the importance of the various methodologies adopted, but also, in their role as teachers and researchers, demonstrate the significance of working as integrated members in the fields they teach. Clearly reflected in this volume is the natural adaptation of LSP research, pushing beyond theory, to filter into classroom developments and professional interactions. The fact that these papers have been selected from the fourth conference by the European Association of Languages for Specific Purposes (AELFE), held in Spain (October, 2005), indicates that the LSP community tends to look into the blend of practice and

research as a key exponent for successful learning integration. Because the linguist is also the LSP practitioner, or vice versa, the enquiries that conduct these chapters are commonly addressed, either implicitly or openly, by students and teachers alike. For readers who would like to learn or know more about communicative strategies and methodological approaches in different specialisms, this book may be a valuable resource.

This book anchors the social studies as the central unifying force for young children. Teachers use the inquiry process to foster child development of social skills and citizenship ideals in their first classroom experiences. Curriculum is built starting with children's natural curiosity to foster literacy in all its form—speaking, listening, reading,

writing. Along the way, young children acquire knowledge and academic skills in civics, economics, geography and history. Shown throughout are ways to promote social learning, self-concept development, social skills and citizenship behaviors. Featured here are individually appropriate and culturally relevant developmental practices. Considered are the importance of family collaboration and funds of knowledge children bring to early care and education. Contributors to this edition bring expertise from bilingual, early education, literacy, special education and the social studies. Beginning with citizenship and community building the authors consider all aspects of teaching young children leading to a progression of capacity to engage civically in school and

community.
