Differential Equation (PDE for short) is an equation that contains the independent variables x_1, \dots, x_n , the dependent variable or the unknown function u and its partial derivatives up to some order. It has the form where F is a given function and $u_{x_j} = \partial u / \partial x_j$, $u_{x_i x_j} = \partial^2 u / \partial x_i \partial x_j$; $i, j = 1, \dots, n$ are the partial derivatives of u .
