RANDY MONTGOMERY

[Global Lessons and Local Challenges](#) Springer Nature

When you think of astrology, you may think of the horoscope section in your local paper, or of Nancy Reagan's consultations with an astrologer in the White House in the 1980s. Yet almost every religion uses some form of astrology: some way of thinking about the sun, moon, stars, and planets and how they hold significance for human lives on earth. *Astrology and Cosmology in the World's Religions* offers an accessible overview of the astrologies of the world's religions, placing them into context within theories of how the wider universe came into being and operates. Campion traces beliefs about the heavens among peoples ranging from ancient Egypt and China, to Australia and Polynesia, and India and the Islamic world. Addressing each religion in a separate chapter, Campion outlines how, by observing the celestial bodies, people have engaged with the divine, managed the future, and attempted to understand events here on earth. This fascinating text offers a unique way to delve into comparative religions and will also appeal to those intrigued by New Age topics.

Anarchists and the Anticolonial Imagination John Wiley & Sons

#1 NEW YORK TIMES BESTSELLER • "Is it as good as *Red Dragon* and *Silence of the Lambs*? No . . . this one is better."—Stephen King, *The New York Times* Book Review You remember Hannibal Lecter: gentleman, genius, cannibal. Seven years have passed since Dr. Lecter escaped from custody. And for seven years he's been at large, free to savor the scents, the essences, of an unguarded world. But intruders have entered Dr. Lecter's world, piercing his new identity, sensing the evil that surrounds him. For the multimillionaire Hannibal left maimed, for a corrupt Italian policeman, and for FBI agent Clarice Starling, who once stood before Lecter and who has never been the same, the final hunt for Hannibal Lecter has begun. All of them, in their separate ways, want to find Dr. Lecter. And all three will get their wish. But only one will live long enough to savor the reward. . . . Praise for Hannibal "Interested in getting the hell scared out of you? Buy this book on a Friday . . . lock all doors and windows. And by Monday , you might just be able to sleep without a night-light."—*Newsday* "Strap yourself in for one heck of a ride. . . . It'll scare your socks off."—*Denver Post* "A stunner . . . writing in language as bright and precise as a surgeon's scalpel, Harris has created a world as mysterious as Hannibal's memory palace and as disturbing as a Goya painting. This is one book you don't want to read alone at night."—*The Atlanta Journal-Constitution* "Relentless . . . endlessly terrifying . . . 486 fast-paced pages, in which every respite is but a prelude to further furious action . . . Hannibal begins with a murderous paroxysm that leaves the reader breathless. . . . Hannibal speaks to the imagination, to the feelings, to the passions, to exalted senses and to debased ones. Harris's voice will be heard for a while."—*Los Angeles Times* "A pleasurable sense of dread."—*The Wall Street Journal* "Enormously satisfying . . . a smashing good time, turning the pages for thrills, chills, horror and finally, a bracing, deliciously wicked slap in the face . . . perhaps the very best the thriller/horror genre is capable of producing."—*San Diego Union-Tribune*

[The Crimson Fairy Book](#) Humana Press

The Singularity. It is the era of the posthuman. Artificial intelligences have surpassed the limits of human intellect. Biotechnological beings have rendered people all but extinct. Molecular nanotechnology runs rampant, replicating and reprogramming at will. Contact with extraterrestrial life grows more imminent with each new day. Struggling to survive and thrive in this accelerated world are three generations of the Macx clan: Manfred, an entrepreneur dealing in intelligence amplification technology whose mind is divided between his physical environment and the Internet; his daughter, Amber, on the run from her domineering mother, seeking her fortune in the outer system as an indentured astronaut; and Sirhan, Amber's son, who finds his destiny linked to the fate

of all of humanity. For something is systematically dismantling the nine planets of the solar system. Something beyond human comprehension. Something that has no use for biological life in any form...

A Sea of Glass IndyPublish.com

The book explores the fundamental principles, advances in forensic techniques, and its application on forensic DNA analysis. The book is divided into three modules; the first module provides the historical prospect of forensic DNA typing and introduces fundamentals of forensic DNA typing, methodology, and technical advancements, application of STRs, and DNA databases for forensic DNA profile analysis. Module 2 examines the problems and challenges encountered in extracting DNA and generating DNA profiles. It provides information on the methods and the best practices for DNA isolation from forensic biological samples and human remains like ancient DNA, DNA typing of skeletal remains and disaster victim identification, the importance of DNA typing in human trafficking, and various problems associated with capillary electrophoresis. Module 3 emphasizes various technologies that are based on SNPs, STRs namely Y-STR, X-STR, mitochondrial DNA profiling in forensic science. Module 4 explores the application of non-human forensic DNA typing of domestic animals, wildlife forensics, plant DNA fingerprinting, and microbial forensics. The last module discusses new areas and alternative methods in forensic DNA typing, including Next-Generation Sequencing, and its utility in forensic science, oral microbes, and forensic DNA phenotyping. Given its scope, the book is a useful resource in the field of DNA fingerprinting for scientists, forensic experts, and students at the postgraduate level.

Masters Theses in the Pure and Applied Sciences Springer Science & Business Media

Covering a range of skills and systems, this title prepares you for work in technology-filled clinical field. It includes topics such as clinical decision support, clinical documentation, provider order entry systems, system implementation, adoption issues, and more.

Poems Litres

This book is the first to offer a comprehensive selection of Walt Whitman's Civil War poetry and prose with a full commentary on each work. Ed Folsom and Christopher Merrill carry on a dialogue with Whitman (and with each other) as they invite readers to trace how Whitman's writing about the Civil War develops, shifts, and manifests itself in different genres throughout the years of the war. The book offers forty selections of Whitman's war writings, including not only the well-known war poems but also his prose and personal letters. Each are followed by Folsom's critical examination and then by Merrill's afterword, suggesting broader contexts for thinking about the selection. The real democratic reader, Whitman said, "must himself or herself construct indeed the poem, argument, history, metaphysical essay—the text furnishing the hints, the clue, the start or framework," because what is needed for democracy to flourish is "a nation of supple and athletic minds." Folsom and Merrill model this kind of active reading and encourage both seasoned and new readers of Whitman's war writings to enter into the challenging and exhilarating mode of talking back to Whitman, arguing with him, and learning from him.

The Complete Prose Works of Walt Whitman Elsevier Health Sciences

Lang's fairy books were childhood favorites of Tolkien.

Concepts and Environmental Applications of Limnology Univ of California Press

The book is about climate resilience and environmental sustainability approaches, discussing knowledge at global level and the local challenges, presented by authors from various countries. Environmental sustainability is at stake and implications of climate change are clearly visible in most parts of the world. In the times of the prevailing global environmental crisis, this book discusses key issues of climate change and sustainable energy alternatives, waste management and development. It discusses climate change scenario using simulation models in various Asian countries, signatures of climate change in Antarctica, implications in the Indian Ocean and the Indian scenario of REDD+. A special focus has been given on building climate resilience in our agricultural ecosystems and

sustainable agriculture. It discusses the prospects and challenges of renewable energy options including biofuels and energy from wastewaters, explores the technical aspects of eco-friendly bioremediation of pollutants, sustainable solid waste management practices and challenges, carbon footprints of industry, and emphasizes on the significance of combining traditional knowledge with modern technology with novel approaches including involvement of social enterprises and corporate social responsibility to achieve the Sustainable Development Goals. This is an important document for researchers and policy makers working in multidisciplinary fields of sustainability sciences.

The Age of Globalization Springer

"The author makes an eloquent plea for marine biodiversity conservation."—Library Journal "Harvell seems to channel the devotion that motivated the Blaschkas."—The Guardian Winner of the 2016 National Outdoor Book Award, Environment Category It started with a glass octopus. Dusty, broken, and all but forgotten, it caught Drew Harvell's eye. Fashioned in intricate detail by the father-son glassmaking team of Leopold and Rudolf Blaschka, the octopus belonged to a menagerie of unusual marine creatures that had been packed away for decades in a storage unit. More than 150 years earlier, the Blaschkas had been captivated by marine invertebrates and spun their likenesses into glass, documenting the life of oceans untouched by climate change and human impacts. Inspired by the Blaschkas' uncanny replicas, Harvell set out in search of their living counterparts. In *A Sea of Glass*, she recounts this journey of a lifetime, taking readers along as she dives beneath the ocean's surface to a rarely seen world, revealing the surprising and unusual biology of some of the most ancient animals on the tree of life. On the way, we glimpse a century of change in our ocean ecosystems and learn which of the living matches for the Blaschkas' creations are, indeed, as fragile as glass. Drew Harvell and the Blaschka menagerie are the subjects of the documentary *Fragile Legacy*, which won the Best Short Film award at the 2015 Blue Ocean Film Festival & Conservation Summit. Learn more about the film and check out the trailer here.

Astrology and Cosmology in the World's Religions Academic Press

Biobanking, an emerging field supported by academia, industry and health administrators alike, is distinctly different today from the practice that once defined it. The science of Biobanking, which initially involved simply storing blood or tissue samples in a freezer, is now a highly sophisticated field of research, and expected to grow exponentially over the next decade or two. This book aims to serve the purpose of further enriching the available literature on Biobanking, by offering unique and more useful collection of ideas for the future. The book outlines the experiences of developing modern Biobanking repositories in different countries, whilst covering specific topics regarding the many aspects of Biobanking. This book will be of interest to a wide range of readers including: academics, students, volunteers and advocates of patients' rights.

Without Prejudice Penguin

Lang's fairy books were childhood favorites of Tolkien.

Searching for the Blaschkas' Fragile Legacy in an Ocean at Risk Wentworth Press

"This volume of measurement instruments in the English language arts is the second one produced by the Research Instruments Project (TRIP), which was designed to collect and evaluate research instruments in language arts, language and language development, literacy, literature, oral language, reading, teacher knowledge/attitudes, and writing. The 160 measurement instruments are arranged alphabetically by category; within each category, measures are listed alphabetically by author. All instruments are cross-referenced by author. The age range indicated is the specific age grouping as stated by the authors or the age of the sample to whom the instrument was administered. The description of the instrument provides the purpose of the instrument, the date of construction, and a physical description of the instrument--often including sample items and administration data (directions, time, scoring procedures, and so forth). The lack of reliability and validity data for instruments is indicated when the information was unavailable. In the case of tables of difficulty, indexes, and so on, the data contained are summarized and the complete data are made available with the test or references cited. (HOD)" -- Google Books viewed January 22, 2021.

Resilience and Risk University of Iowa Press

In this sparkling new work, Benedict Anderson provides a radical recasting of themes from *Imagined Communities*, his classic book on nationalism, through an exploration of fin-de-siecle politics and culture that spans the Caribbean, Imperial Europe and the South China Sea. A jewelled pomegranate packed with nitroglycerine is primed to blow away Manila's 19th-century colonial elite at the climax of *El Filibusterismo*, whose author, the great political novelist Jose Rizal, was executed in 1896 by the Spanish authorities in the Philippines at the age of 35. Anderson explores the impact of avant-garde European literature and politics on Rizal and his contemporary, the pioneering folklorist Isabelo de los Reyes, who was imprisoned in Manila after the violent uprisings of 1896 and later incarcerated, together with Catalan anarchists, in the prison fortress of Montjuich in Barcelona. On his return to the Philippines, by now under American occupation, Isabelo formed the first militant trade unions under the influence of Malatesta and Bakunin. Anderson considers the complex intellectual interactions of these young Filipinos with the new "science" of anthropology in Germany and Austro-Hungary, and with post-Communist experimentalists in Paris, against a background of militant anarchism in Spain, France, Italy and the Americas, Jose Marti's armed uprising in Cuba and anti-imperialist protests in China and Japan. In doing so, he depicts the dense intertwining of anarchist internationalism and radical anti-colonialism. *Under Three Flags* is a brilliantly original work on the explosive history of national independence and global politics.

Measures for Research and Evaluation in the English Language Arts IDRC

This 25th anniversary edition of the Annual Review of Nursing Research is focused on nursing science in vulnerable populations. Identified as a priority in the nursing discipline, vulnerable populations are discussed in terms of the development of nursing science, diverse approaches in

building the state of the science research, integrating biologic methods in the research, and research in reducing health disparities. Topics include: Measurement issues Prevention of infectious diseases among vulnerable populations Genomics and proteomics methodologies for research Promoting culturally appropriate interventions Community-academic research partnerships with vulnerable populations Vulnerable populations in Thailand: women living with HIV/AIDS As in all volumes of the Annual Reviews, leading nurse researchers provide students, other researchers, and clinicians with the foundations for evidence-based practice and further research.

Prabhat Prakashan

A fascinating record of one of the most famous journeys ever made, providing an accurate historical document as well as an evocative travelogue that conveys Charles Darwin's personal account of the voyage with freshness and immediacy. From the reviews: 'a record of his immediate feelings, the sea-sickness, the triumphs of his palaeontological finds, close shaves with General Rosas and military activity in Patagonia, drinking maté and smoking cigarillos with the Gaucho, the stars glittering over the Andes vivid and expressive...' Janet Browne

Biobanking in the 21st Century Springer

Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) * at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 24 (thesis year 1979) a total of 10,033 theses titles from 26 Canadian and 215 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. While Volume 24 reports these submitted in 1979, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

Sustainable Development at Risk Cambridge University Press

Freshwater Ecology, Second Edition, is a broad, up-to-date treatment of everything from the basic chemical and physical properties of water to advanced unifying concepts of the community ecology and ecosystem relationships as found in continental waters. With 40% new and expanded coverage, this text covers applied and basic aspects of limnology, now with more emphasis on wetlands and reservoirs than in the previous edition. It features 80 new and updated figures, including a section of color plates, and 500 new and updated references. The authors take a synthetic approach to ecological problems, teaching students how to handle the challenges faced by contemporary aquatic scientists. This text is designed for undergraduate students taking courses in *Freshwater Ecology and Limnology*; and introductory graduate students taking courses in *Freshwater Ecology and Limnology*. Expanded revision of Dodds' successful text. New boxed sections provide more advanced material within the introductory, modular format of the first edition. Basic scientific concepts and environmental applications featured throughout. Added coverage of climate change, ecosystem function, hypertrophic habitats and secondary production. Expanded coverage of physical limnology, groundwater and wetland habitats. Expanded coverage of the toxic effects of pharmaceuticals and endocrine disruptors as freshwater pollutants More on aquatic invertebrates, with more images and pictures of a broader range of organisms Expanded coverage of the functional roles of filterer feeding, scraping, and shredding organisms, and a new section on omnivores. Expanded appendix on standard statistical techniques. Supporting website with figures and tables - <http://www.elsevierdirect.com/companion.jsp?ISBN=9780123747242>

History is forged through the travel of ideas across continents—as well as by bombs. *The Age of Globalization* is an account of the unlikely connections that made up late nineteenth-century politics and culture, and in particular between militant anarchists in Europe and the Americas, and anti-imperialist uprisings in Cuba, China and Japan. Told through the complex intellectual interactions of two great Filipino writers—the political novelist José Rizal and the pioneering folklorist Isabelo de los Reyes—*The Age of Globalization* is a brilliantly original work on how global exchanges shaped the nationalist movements of the time.

Or, The Puritan Theocracy in Its Relations to Civil and Religious Liberty Read Books Ltd

Contained herein is a vast collection of Whitman's writing, including vignettes from his childhood, a series of powerful accounts of his work in hospitals during the Civil war, and a large amount of nature writing. Composed in 1881 primarily from sketches, notes, and essays written at various stages of the poet's life from the Civil War onwards, *Specimen Days* is the closest thing Whitman ever published to a traditional autobiography. A wonderful insight into the mind of America's most famous poet, this rare classic will appeal to any collector of Whitman's work and is well deserving of its place atop any bookshelf. Walter "Walt" Whitman was a seminal American poet and journalist. Often hailed as the father of free verse, Whitman is among the most influential poets of the American canon, most famous for his controversial life-long work, *Leaves of Grass*. This rare book is republished here with a new introductory biography of the author.
