*The Complete Story* CRC  
Press

American road racing  
began just after World  
War II and quickly  
blossomed into a  
movement. The Sports  
Car Club of America

(SCCA) and the United  
States Auto Club (USAC),  
clubs that became fierce  
rivals in the 1950s and  
1960s, were the principal  
race promoters. Race  
tracks popped up  
everywhere, at first on  
city streets, then at  
airports and U.S. Air Force  
bases, and finally at  
purpose-built circuits like  
Road America and Laguna  
Seca. Although most of the  
cars that competed in  
American road racing  
were built in Europe, an  
underground movement

sprang up of "special builders" who constructed their racers in home garages and small-town machine shops. Some were so homely and slow that only the builders could love them. Others trounced every Ferrari in sight and are now on the wish lists of wealthy collectors the world over. Vintage American Road Racing Cars 1950-1970 is the first book devoted exclusively to American road racing cars of all types and sizes. Hundreds of race cars built in America have

never before been mentioned in print, and this book chronicles those and other cars with vintage and modern photography, specifications, memorabilia, and the stories and characters behind each car. About the Author Harold Pace's writing and photography has appeared in such magazines as Automobile Quarterly, Class & Sportscar, Excellence, Sports Car International, Vintage Racecar Journal, and others. He lives in Weatherford, Texas. Mark

Brinker is a vintage race car enthusiast who has raced at the Monterey Historics. He is a doctor with three published medical textbooks and 70+ published scientific papers. He hails from Houston, Texas.

Veloce Publishing Ltd

The story of Alfa Romeo's legendary, four-times Le Mans winning, Modello 8C 2300 of 1931 to 1934 told in definitive detail by expert Angela Cherrett.

### The Development and Racing History

Krause Publications

From a five-year-old girl racing 60mph micro-midgits in South Africa, to a Formula One driver in the British Championship during her first full year of racing in the UK, and on

to becoming the first and only woman ever to win a Formula One race, Desiré Wilson was a winner bested by very few of her male rivals. But single-seater racing was just the start of Desiré's ascent in motorsport. She won two FIA World Championship Sports Car Endurance races in 1980, and went on to compete in well over 120 types of race car at more than 100 race tracks around the world. Always competitive, she earned a reputation for an intense, no-nonsense approach to racing, shrugging off the

media glamour to focus on the hard grind of staying competitive in one of the world's toughest sporting arenas. Moving to the male-dominated world of North American racing, Desiré became a pioneer for women racing in the harsh world of Indy Cars, facing discrimination, financial problems, and other obstacles ranging from tragedy to farce. Her career is unique in the world of racing, encompassing everything from club racing to Formula One and World

Championship sports cars, to the evil monsters of the IndyCar World Series – the world's fastest race cars. Hers is a story of hardships, fun, tragedy, perseverance, injury, and the amazing behind-the-scenes world masked by the public face and glamour of racing. It tells, too, of the consequences of politics and discrimination in the male world of professional auto racing.

*A to Z of Sports Cars, 1945-1990* Veloce Publishing Ltd  
This book shows

executive, project, program, and portfolio managers how ethical behavior can ensure that an organization has proper governance. Improper governance and unethical behavior have led to such well-known financial disasters as Enron and Madoff Investments. The book arms managers with two important tools: Small Sins Allowed (SSA) and Line of Impunity (Lol), which together can be the foundation for renewed and vigorous corporate governance. SSA is a

powerful tool that helps managers establish a level above which adherence to ethical standards is expected. Lol aids managers in identifying ethical fault lines that may exist in a company and helps to keep unethical behavior in check.

This is the only book that completely lists accurate technical data for all cars imported into the U.S. market from 1946-2000. With many imports approaching the antique

status, this book will be a big seller across all generations of car enthusiasts. From the grandiose European carriages of the late Forties to the hot, little Asian imports of the Nineties, every car to grace American roadways from across the Atlantic and Pacific is carefully referenced in this book. &#xA0;&#xA0;Foreign car devotees will appreciate the attention given to capturing precise data on Appearance and Equipment, Vehicle I.D. Numbers, Specification

Charts, Engine Data, Chassis, Technical Data, Options and Historical Information. &#xA0;&#xA0;Collectors, restorers and car buffs will love this key book from noted automotive authors, James Flammang and Mike Covello. Alfa Romeo Giulia Spider

Robert Bentley,  
Incorporated

After a period of post-war austerity, in 1957 Alfa Romeo decided it was time to re-enter the market for luxury/executive class cars with a new range designed for the growing number and prosperity of potential customers. Thus, the first models in the new 2000 series emerged, followed by the 2600 series in 1962. That they were not hugely

successful, although some 18,540 were manufactured between 1957 and 1966, can be attributed to a number of factors, principally cost. Largely ignored for many years, these cars are now recognized as a significant element in Alfa Romeo's history and this book is a valuable record of their story. Richly illustrated with over 200 colour and black & white photographs, this book introduces the history of the company and its early designs; describes the early Berlina saloon,

Spider convertible and Sprint coupe, and their development into the 2600 series; details the evolution of the 1900-based engine into the 6-cylinder 2600 engine; provides a history of the SZ Sprint Zagato; includes information on prototypes, show specials, specification tables, colour schemes and production numbers and, finally, includes a chapter on owning a 2000 or 2600.

### **Automotive Industries**

Veloce Publishing Ltd  
At the time, little was  
recorded about the  
activities of Alfa Romeo's  
World Championship-  
winning Sports Racing car,  
the Tipo 33. The model  
had a long career, as a  
factory car as well as in  
private hands from 1967  
until 1977. The great  
Italian motor sport  
engineer Carlo Chiti  
designed and ran a  
prolific number of  
different models of this  
Tipo. Unfortunately  
nothing of the history of  
these developments was  
documented at the time,

but the authors have managed, after intense investigation and numerous personal interviews, to uncover much about this marvelous sports prototype. The fruits of their labors abound, manifesting as many previously unseen photographs and the personal recollections of the prime movers in the Tipo 33 s career. If you like Alfas, you'll love this book.

**The Essential Buyer's Guide** Alfa Romeo DOHC Engine High-Performance

Manual

Here is a fact and picture-packed book dedicated solely to the Giulia GT in all its forms including the fabulous lightweight GTA racer. Now an updated, large format third edition which includes over 100 new images and which is limited to 1500 copies.

**Popular Mechanics**

Crowood

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately

welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes

the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

**The Complete Story**

Veloce Publishing Ltd Alfa Romeo 916 GTV and Spider traces the complete story of the Alfa Romeo GTV and Spider models produced between 1994 - 2005, commonly known to enthusiasts by the manufacturer's project code as the 916 series. The 916 models would always be controversial - they replaced the iconic Spider, the best-selling Alfa Romeo sports model of all time, and the brand-establishing Alfetta GTV. Sharing components and a platform with a humble

Fiat hatchback, would the cars ever be considered 'real' Alfa Romeos? The cars were critically acclaimed, and, though they faced tough competition in the late 1990s from the likes of the Audi TT, they remained in production for over a decade. Topics covered include: Full history of the 916 series GTV and Spider models; Design, development and evolution of the models from 1994 - 2005; Participation of the GTV in motorsport; Model variations in depth

through all three facelifts; Previously unpublished production figures, and chassis numbers for the desirable, limited-edition GTV Cup model.

Comprehensively researched guide to the entire lifespan of the 916 series. Will appeal to Alfa Romeo and automotive enthusiasts. The history and design process are examined along with an in-depth guide to each of the model variants produced. The cars' current position in the classic car market is considered. Superbly

illustrated with 240 colour photographs. Robert Foskett is a life-long Italian car enthusiast with a special interest in Alfa Romeo.

*Standard Catalog of Imported Cars, 1946-1990* Launched in 1971, the Alfesud was an all-new departure for Alfa Romeo, both in its design and its execution and became the best-selling model in the history of Alfa Romeo . Originally it was developed with the dual intentions of launching the company into large volume production and

providing a more affordable model than their highly regarded sports cars. However, its story was far from straightforward. Although respected for its technically brilliant design and universally praised for its ride and handling, the model never quite reached its full sales potential and its reputation was marred by problems that could not have been foreseen. With over 240 colour photographs, the book includes a brief history of Alfa Romeo to the end of

the 1960s. The development of the Alfasud's design and the political reasons for building a new factory are given along with the car's reception from both the press and owners. The

evolution of the model from initial prototypes, to the improvements to build quality and performance, including the Giardinetta and Sprint variations are covered as well as Alfasuds in competition. The political and labour

problems, as well as the early quality control issues are discussed. Finally, there are numerous specification tables, performance data, chassis numbers, engine codes and colour charts.
