**Starting Out** New In Chess

The Caro-Kann is one of the most popular responses to 1 e4. Black stakes a claim to the central squares and seeks free development for all his pieces. While solid, it is by no means a drawing weapon - the resulting positions generally contain at least a degree of imbalance and the critical lines lead to sharp positions with chances for both sides. Many new approaches for both sides have been developed in recent years, and a good understanding of these ideas is vital for anyone looking to handle either side of the Caro with success.

There are hundreds of opening books available, full of deep analysis, but many of them fail to explain the reasons for choosing one computer line over another. And how top players distinguish between good and bad opening lines remains a mystery to most of the chess world. Grandmaster Opening Preparation addresses such questions as how to balance computer preparation with human considerations, along with a wealth of practical advice on how to go about building the opening repertoire which is right for you. The book also provides an in-depth treatment of the evolution in understanding of Isolated Queen's Pawn positions, which will enable the reader to become more effective in a multitude of openings, with either colour.

The Panov-Botvinnik Attack is an aggressive and ambitious way of meeting the popular Caro-Kann Defence. White develops rapidly and attacks the centre, putting immediate pressure on Black's position. In this book, International Master and chess coach Lorin D'Costa takes an in-depth look at the Panov-Botvinnik Attack and also the closely related 2 c4 variation. Using illustrative games, D'Costa highlights the typical plans and tactics for both sides, presents repertoire options for White and provides answers to all the key questions.

[Kramnik: Move by Move](#) New In Chess

• One of the world's greatest chess players reveals the secrets of how he plans his play • Packed with invaluable information on how to mobilise your forces, avoid threats and win the game • Illustrated with a wealth of annotated examples from the author's own games The legendary Anatoly Karpov has won over 250 Grandmaster tournaments, many more than any other player in chess history, and his games are characterised by his gradually and patiently pushing an opponent back to the wall, before finally finishing him off with a deadly blow. In this unique book, aimed at ordinary club players, Karpov gives a wealth of tips on how to incorporate this dramatic style of play into your own repertoire, through careful planning and evaluation of positions: looking at the fire-power of your forces, being aware of threats to your own king and how to safeguard it, and careful control of open lines. As he says himself: 'Finding the right plan is the key to success'. Warmly and accessibly written, but with Karpov's usual air of authority, this book makes you feel like you are spending an evening with the man himself, and will help you to absorb a little bit of the Karpov magic.

*Caro Kann Defence: Advance Variation and Gambit System* Everyman Chess

The Caro-Kann is one of the most important and popular responses to 1.e4. World champions Botvinnik, Petrosian, Karpov and Anand have played this reliable chess opening in many of their games. Present-day elite players such as Hikaru Nakamura and Fabiano Caruana are proving that the 'drawish' reputation of the Caro-Kann no longer holds in modern chess. Victor Bologan presents a complete Caro-Kann repertoire for Black that is much more than just a lucidly explained and highly playable set of responses. In many lines Bologan provides – as he has done in his other recent major chess opening books for New In Chess – two options to handle the Black position. Bologan's explanations are accessible for a wide range of players and he provides the reader with a thorough grounding in the strategic and tactical motifs. During his research, Bologan has found many new ideas and resources. After reading and studying this book you are bound win many exciting games with Bologan's Caro-Kann!

This book tackles fundamental questions such as: 'How should pawns be used to fight for the centre?' and 'How does the central pawn formation affect planning for both sides?' These issues are central to understanding chess. Marovic discusses central pawn-structures and their impact on play both in the centre and on the wings. He begins by surveying how the pawn's role in controlling the centre has been developed over the last 150 years, and how this has led to the refinement of concepts such as the 'dynamic' backward pawn and the positional exchange sacrifice. The bulk of the book is devoted to discussions of the main type of centre: Open Centre; Closed/Blocked Centre; Fixed Centre; and in particular the Mobile/Dynamic Centre.

**Opening for Black According to Karpov** Lulu.com

Gone are the days when the Caro-Kann was adopted only with a view to playing for a draw. The 1980s saw a great resurgence of interest in the defence at all levels, and, while the Caro-Kann justly retained its reputation as Black's most solid response to 1 e4, the development of new ideas in both attack and defence has created a thoroughly modern and dynamic opening system suitable for players of all temperaments. This revised and updated second edition provides a comprehensive review of current theory and, with over 60 complete games, illustrates the practical application of the key tactical and strategical ideas.

*Winning Pawn Structures* Batsford Books

The Caro-Kann Defence has a justified reputation for reliability, making it an attractive choice for players with a preference for positional play.

However in recent years many new dangerous ideas have been discovered for White which makes a study of the theoretical main lines imperative for competitive players. In this first volume, former world champion Anatoly Karpov, a life-long adherent of the Caro-Kann, undertakes a detailed examination of Classical Systems against the Caro-Kann which commence 1 e4 c6 2 d4 d5 3 Nc3, and also the Advance Variation 3 e5. With this approach, precision and good timing is vital and can promise Black a successful defence, counter-chances and even a strategical advantage.

*How to Play the English Opening* Gambit Publications

The Caro-Kann is renowned as a top-tier chess defence to 1.e4, and Lars Schandorff's Grandmaster Repertoire book on this opening received rave reviews. As GM Zenon Franco Ocampos put it, "I cannot imagine a better way of converting into a Caro-Kann player." A decade later, Schandorff is back with a completely new repertoire which improves on his previous work in every way. Playing the Caro-Kann offers a complete repertoire for Black after 1.e4 c6, based on 2.d4 d5 followed by 3.e5 Bf5 or 3.Nc3 dxe4 4.Nxe4 Nf6 5.Nxf6+ exf6. With cutting-edge analysis, thorough explanations of

positional motifs and instructively annotated illustrative games, this book is essential reading for anyone with an interest in the Caro-Kann.

Grandmaster Secrets- The Caro-Kann Batsford Books

Based on the powerful Caro-Kann, a favorite weapon of great players, you'll learn how to come right out of the gate and defend against 1.d4, the most popular first move in chess. This is a great beginners book because readers need to learn just one strong opening system, and it can be used to combat all of Whites 1.d4 openings. You'll learn every option and strategy White can throw on the board, the correct plan to combat them all, and how to seize the initiative and take control of the game. Up-to-date analysis includes examples from world-class games. Includes more than 350 diagrams and clear explanations. 300 pages

Chess Duels Simon and Schuster

The Caro-Kann is a rare beast among chess openings. While respected as a sound and safe way to start the game, it also avoids symmetry or simplification. This allows Black many ways to keep the game unbalanced and play for a win. Two Norwegian opening experts provide a set of options that take full advantage of this flexibility. In the main line, you are given a choice between the 4...Bf5 and the 5...exf6 systems - but both strictly in their modern dynamic forms! In the latter, Hansen is a world-leading authority, with a wealth of experience to explain the typical mistakes White makes when facing this deceptively tricky line. By studying his material, you will be well ahead of the game in this rapidly-evolving system. For instance, the critical improvements over the Duda-Carlsen game in 2020 were already in Hansen's files from two years earlier. The other recommended systems for Black are also aggressive and very much the '21st-century Caro-Kann'. It's 3...c5 against the Advance, in which Hansen is also an outstanding specialist. The Panov Attack is answered with ...g6 lines - strategically ideal, and nowadays backed up by amazing modern computer analysis. Against the Two Knights, we are offered an ...exf6 option as well as the ...Bg4 approach. The repertoire is completed with good sensible recommendations against almost every other conceivable move White can throw at the Caro-Kann. This extremely up-to-date book has an innovative structure, with 'lessons', model games and theory 'magnifiers'. Sverre Johnsen is a chess analyst, researcher, organizer, trainer and writer from Norway. He is co-author of Win with the London System and Win with the Stonewall Dutch, two of the best-selling openings books of recent years. Grandmaster Torbjorn Ringdal Hansen is also from Norway. He is one of the founders of the chess retail business Sjakkhuset and works full-time as a chess trainer. He was the first coach of Magnus Carlsen (in 1999) and currently works with several grandmasters.

The Extreme Caro-Kann New In Chess

Alexey Bezgodov presents an unusual idea for White against the ever popular Caro-Kann Defence. The Russian Grandmaster and chess opening expert advocates a very early deviation, the annoying and little explored 3.f3!? This move may look unimpressive at first sight, but it considerably complicates life for Caro-Kann players, as it makes Black's main problem bigger: the development of his bishop on c8. Small wonder that an increasing number of strong grandmasters, such as Vassily Ivanchuk, Alexander Morozevich and Judit Polgar, have incorporated this move in their repertoire. After 3.f3!? the bishop on c8 has nowhere to go, and Black will often struggle to avoid enduring problems. White's chances to obtain an advantage are substantial, as Bezgodov shows in this fascinating new chapter in modern chess opening theory, packed with original analysis and clear explanations. ,

*The Caro-Kann Revisited* - Quality Chess

The Caro-Kann Defence, long renowned for being a solid and reliable defence against 1.e4, is undergoing a renaissance at the moment. In addition to being a mainstay in the repertoires of a recent World Champion (Viswanathan Anand) and a 2018 World Championship candidate (Ding Liren), it is being flooded with new and creative ideas from a range of other top players, notably Anand's Indian Olympiad teammates Vidit and Adhiban. The pawn structures in this opening leave considerable room for individual interpretation. This book is written for the Black side, though new ideas for White are suggested and old ones occasionally improved. It contains not only the author's personal take on how to deal with all major White tries after 1.e4 c6, but also a range of alternatives for Black- to cater for different types of Caro-Kann player. This repertoire builds on the existing state of theory, taking it in novel, exciting and decidedly modern directions, while not forgetting about the opening's sound strategic underpinnings.
