Hustle Away Debt Currency
A dynamic, game-changing guide to finding success and fearlessly outsmarting the system
Too often we feel like underdogs fighting a system that stacks the odds against us. We work hard, follow the rules, and dream of a better life. But these days, working harder doesn't always lead to fulfillment. In

fact, according to Gallup research, nearly 90 percent of people feel disconnected from their jobs. So how do you break free from the drudgery and achieve more success on your own terms? You hustle. The secret lies in making manageable tweaks and placing small bets on pursuits that propel you from who you are today to the person you're destined to become. In

Hustle, Neil Patel, Patrick Vlaskovits, and Jonas Koffler--three of the nation's top entrepreneurs and consultants--have teamed up to teach you how to look at work and life through a new lens--one based on discovering projects you enjoy and the people and opportunities that support your talents, growth, income, and happiness. The authors reveal their groundbreaking three-part

framework of Heart, Head, and Habits. Along the way, you will learn to redefine hustle as the optimal path to success using powerful, often counterintuitive, advice, including:

- Why you must own your dreams, not rent dreams from others
- Ways to create your own luck and "POP"
- How to betray yourself to stay true to yourself--and develop your potential
- The four major

career hustles and the path that's best for you More than just an inspirational career guide, Hustle aims to fundamentally transform the way you work and live, and give yourself permission to thrive in today's uncertain world.

10 Think Thrifty Reads of 2023" "This book blew my mind. More importantly, it made financial independence seem achievable. I read Financial Freedom three times, cover-to-cover." —Lifhacker Money is unlimited. Time is not. Become financially independent as fast as possible. In 2010, 24-year old Grant Sabatier woke up to find he had \$2.26 in his bank account. Five years later, he had a net

worth of over \$1.25 million, and CNBC began calling him "the Millennial Millionaire." By age 30, he had reached financial independence. Along the way he uncovered that most of the accepted wisdom about money, work, and retirement is either incorrect, incomplete, or so old-school it's obsolete. Financial Freedom is a step-by-step path to make more money in less time, so you have more time for

the things you love. It challenges the accepted narrative of spending decades working a traditional 9 to 5 job, pinching pennies, and finally earning the right to retirement at age 65, and instead offers readers an alternative: forget everything you've ever learned about money so that you can actually live the life you want. Sabatier offers surprising, counter-intuitive advice on

<p>topics such as how to: *</p> <p>Create profitable side hustles that you can turn into passive income streams or full-time businesses *</p> <p>Save money without giving up what makes you happy *</p> <p>Negotiate more out of your employer than you thought possible *</p> <p>Travel the world for less</p> <p>* Live for free--or better yet, make money on your living situation *</p> <p>Create a simple, money-</p>	<p>making portfolio that only needs minor adjustments *</p> <p>Think creatively--there are so many ways to make money, but we don't see them. But most importantly, Sabatier highlights that, while one's ability to make money is limitless, one's time is not. There's also a limit to how much you can save, but not to how much money you can make. No one should spend precious years working at a</p>	<p>job they dislike or worrying about how to make ends meet. Perhaps the biggest surprise: You need less money to "retire" at age 30 than you do at age 65. Financial Freedom is not merely a laundry list of advice to follow to get rich quick--it's a practical roadmap to living life on one's own terms, as soon as possible.</p> <p>Can't Even Business Plus "A ... new philosophy and ... guide to getting the</p>

Debt is a part of our life now, so give up "Keeping Up With The Jones" because that mentality is just going to keep you in debt. Debt has slowly crept into our lives and it has got to the point where it controls what we do. And sometimes we suddenly find that it controls us. Before debt was usually manageable but as expenses have increased and pay-checks haven't, debt can

sometimes seem like a big heavy block holding us back. As taxes and secondary tax are taking more away and giving less back, problems are starting to arise. Also every new regulation introduced by our unelected and elected officials just so they can keep their jobs puts the price up. And that includes added expenses like fixing your car and doing home repairs, as well as everything

you buy. Now we live in an over regulated society where our quality of life has decreased as our debt levels have increased. So the new regulations have increased our cost of living but done very little for our safety and happiness. At the moment the most expensive expenses are rent and gas for your car as well as electricity, internet and food. So at the end of the week you have nothing

left so it is time to bring out the credit card and that is fatal. The bottomless pit just got deeper. Now this might sound really dumb but the easiest way to control debt is not to take on too much debt at the beginning. And that is very difficult because the bank says you can get this much for a mortgage and our mentality is to try and get the largest mortgage you are allowed. 'Change Your Way Of Thinking.' Do

Not Buy A House You Cannot Afford. There is a very big difference between what the bank says you can afford and what you can afford so don't listen to the bank. Buy the cheapest house you can find in a reasonable part of town and live there. It might not be as good as living in the best part of town and the schools will not be as good and the crime rate will be worse, but then again your debt levels will not

be too high. At the moment if you already have a mortgage and are having problems with debt start selling off your excess stuff on your local auction site. Just to de-clutter and to give you an idea of the prices available when you want to buy more stuff again. And if the house prices in your country are very high think about selling. Now don't do what everybody else does and that is buy

another house. I would go back to renting and leave what money you have left over after paying off your mortgage, in the bank until the house prices drop substantially. And they will, they always do and bank managers and real estate agents will say they don't. I had a real estate agent tell me that selling your house to go back renting was not a good idea as rents were very high and a lot of rental

properties were going off the market. What she said was true but your endgame is to buy a house after the prices come down. That is why you need to de-clutter so you have less material things to carry around. When getting out of debt there are only a few things you have to do. The first one is DO NOT take on any new debt, so that means you have to live within your means. In other words you need to

change your shopping habits. We do not have set items to buy, we only buy what is on special and what has been marked down. That means we only buy meat that has been reduced as it has been sitting in the chiller too long. I try and buy meat that has been reduced twice that way it is closer to half price. Now the other thing you need to do is Make More Money and there are chapters in this book that show you how

to do just that, you just have to try out and find what is a good fit for you. Developer Hegemony Dragonfruit Designs The Federal Trade Commission receives more complaints about rogue debt collecting than about any activity besides identity theft. Dramatically and entertainingly, Bad Paper reveals why. It tells the story of Aaron Siegel, a former banking executive, and

Brandon Wilson, a former armed robber, who become partners and go in quest of "paper"—the uncollected debts that are sold off by banks for pennies on the dollar. As Aaron and Brandon learn, the world of consumer debt collection is an unregulated shadowland where operators often make unwarranted threats and even collect debts that are not theirs. Introducing an unforgettable

cast of strivers and rogues, Jake Halpern chronicles their lives as they manage high-pressure call centers, hunt for paper in Las Vegas casinos, and meet in parked cars to sell the social security numbers and account information of unsuspecting consumers. He also tracks a "package" of debt that is stolen by unscrupulous collectors, leading to a dramatic showdown with guns in a Buffalo corner store. Along

the way, he reveals the human cost of a system that compounds the troubles of hardworking Americans and permits banks to ignore their former customers. The result is a vital exposé that is also a bravura feat of storytelling. Bad Paper John Wiley & Sons The author of the New York Times Bestseller THE \$100 STARTUP, shows how to launch a profitable side hustle in just 27 days. To

some, the idea of quitting their day job to start a business is exhilarating. For others, it's terrifying. After all, a job that produces a steady paycheck can be difficult to give up. But in a time when businesses have so little loyalty to employees that the very notion of "job security" has become a punchline, wouldn't it be great to have an additional source of income to fall back on? And wouldn't it be

great to make that happen without leaving your day job? Enter the Side Hustle. Based on detailed information from hundreds of case studies, Chris Guillebeau provides a step-by-step guide that anyone can use to create and launch a profitable project in less than a month. Designed for the busy and impatient, this plan will have you generating income immediately, without the risk of

throwing yourself head first into the world of entrepreneurship. Whether you just want to make some extra money, or start something that may end up replacing your day job entirely, the side hustle is the new job security. When you generate income from multiple sources, it gives you options, and in today's world, options aren't just nice to have: they're essential. You don't need entrepreneur

<p>al experience to launch a profitable side hustle. You don't need a business degree, know how to code, or be an expert marketer. And you certainly don't need employees or investors. With this book as your guide,</p>	<p>anyone can learn to build a fast track to freedom. <u>Hustle</u> Harriman House Limited Already have a home service business but just scraping by?
