Seen and Unseen: Visual Cultures of Imperialism A&C Black
 This book demonstrates that both Western and Russian soft power are corrupting the traditions of Eastern Europe. To combat perceived Russian aggression, Eastern Europe must embrace Western institutions and philosophy, thus destroying its own traditional culture.

Johns Hopkins University Press

Why Men Rebel was first published in 1970 after a decade of political violence across the world. Forty years later, serious conflicts continue in Africa, Asia and the Middle East. Ted Robert Gurr reintroduces us to his landmark work, putting it in context with the research it influenced as well as world events. *Why Men Rebel* remains highly relevant to today's violent and unstable world with its holistic, people-based understanding of the causes of political protest and rebellion. With its close eye on the politics of group identity, this book provides new insight into contemporary security challenges.

In recent years much attention has been paid to the ways Muslims are represented and how they are representing themselves visually. This book offers a number of new perspectives on visual cultures and representations of Muslims. *Cultural Studies* Kingston, Jamaica : University of the West Indies Press

Cultural Imperialism and Exact Sciences considers how, in the opening years of the twentieth century, German physicists and astronomers came to staff major research and teaching institutions in Argentina, the South Pacific, and China. It follows German influence at these institutions over the next thirty years. The analysis, based on public and private archives in eight countries, examines how exact sciences having little practical utility inter- acted with explicitly imperialist strategies. This book provides a major reexamination of the process of cultural imperialism in several of its most dramatic settings.

Essay from the year 2004 in the subject Communications - Intercultural Communication, grade: High Distinction, Macquarie University (Centre for International Communication), course: Cross-cultural communication, 11 entries in the bibliography, language: English, abstract: The relationships between Phuong, Alden Pyle and Thomas Fowler in "The Quiet American" might be observed in terms of cultural imperialism (Alden Pyle seems to want to change Phuong and Vietnam). What cultural and social factors seem to influence the attitudes, behaviour and reactions of each character? Could they be read as models for the cultural traits, outlooks and expectations of Americans, British and Vietnamese people? This essay shall answer the above questions by analysing the following points: Firstly, the definitions of

cultural imperialism are examined. Secondly, the question of whether culture is a natural phenomenon or constructed by humans is discussed. Thirdly, the phenomenon of believing in cultural superiority (by particular cultures) is analysed. In further parts, strategies of suppressed cultures to avoid their annihilation are described and the question of whether specific types (as the movie's characters) can be representative for their cultures is answered. Finally, in the conclusion of this paper the results are summarised and discussed. Many definitions of cultural imperialism exist. The term is difficult to describe due to its reference to the two other abstract concepts of "culture" and "imperialism". Tomlinson (1991, p. 2) sees cultural imperialism as a critical discourse which represents another (non Western) culture in dominant Western cultural terms. Tomlinson identifies four ways to discuss cultural imperialism: Cultural imperialism can be discussed as media imperialism, as a discourse of nationality, as a critique of global capitalism or, finally, as a critique of modernity itself (Tomlinson, 1991, p. 19-28). For Kottak (1999, p. 234) cultural imperialism describes the spread of a particular culture at the expense of other cultures. In his definition, Kottak not only focuses on media effects but includes explicitly economic and political forces. Thus, Kottak's definition includes all types of effects which advance one culture. Sreberny-Mohammadi (1997, p. 50) criticises the term "cultural imperialism" because it reduces "culture" to the products of the culture industries and - often described also as "media imperialism" - only focuses on the impact of modern media or multinational corporations. All theoretical problems related to this term shall not be discussed here but it is obvious that cultural imperialism has different meanings in different (academic and non academic) discourses.

The Athletic Crusade is the first book to systematically analyze the role of sports in the expansion of U.S. empire from the 1890s through World War II. Gerald R. Gems details how white, Anglo-Saxon Protestant males set the standard for inclusion within American society, transferred that standard to foreign territories, and subtly used American sports to instill allegedly desirable racial, moral, and commercial virtues in colonial subjects. In the realm of such expansion, sports provided a less harsh, less militaristic means of instilling belief in a dominant system's values and principles than more overt methods such as war. The process of change, however, had unexpected consequences as subordinate groups adapted or even rejected American overtures. Sport became a means for nonwhites to challenge whiteness, Social Darwinism, and cultural hegemony by establishing their own physical prowess, claiming a measure of esteem, and creating a greater sense of national identity. Gems shows the direct influence of sports in Hawaii, the Philippines, Puerto Rico, Cuba, and the Dominican Republic and explores their comparatively minimal influence in countries such as China and Japan. Amid increasing globalization, The Athletic Crusade offers a welcome perspective on how the United States has attempted to spread its influence in the past and the implications for the future of indigenous and other societies.

Essay from the year 2006 in the subject Economics - International Economic Relations, grade: 1,3, University of Leipzig, 5 entries in the bibliography, language: English, abstract: Films can be seen as cultural products. To understand international trade of these cultural products it is necessary to reveal how industries and markets operate and evolve, furthermore analyzing the influence of industry structure, government policies and global economic conditions. International trade allows expanding markets to become certainly larger than the domestic one, as a result the consumer has the possibility to choose within a greater variety of goods and to take advantage from lower prices. Films are part of each culture. But still, films are products, first of all produced and sold in intention to make profits. What are films? Why do we speak from US Cultural imperialism? What can be regarded as cultural diversity? Which debates and agreements should be focused on when analyzing international trade of films? And finally, why do the U.S. dominate that industry? Which economic factors play a major role in this case? How sustainable is the U.S.? That sounds interesting? These and more questions will be answered within that economic essay.

An examination of the cultural evolution of the Jamaican people after the explosive uprising at Morant Bay in 1865. For the first time, the specific methods used by British imperial legislators to inculcate order, control and identity in the local society are described and analysed. The authors compellingly and convincingly demonstrate that Great Britain deliberately built a new society in Jamaica founded on principles of Victorian Christian morality and British Imperial ideology. This resulted in a sustained attack on everything that was perceived to be of African origin and the glorification of Christian piety, Victorian mores, and a Eurocentric idealized family life and social hierarchies. This well-written and meticulously researched book will be invaluable for students of the period and those interested in Jamaican history and/or imperial history

Philanthropy and Cultural Imperialism is intended as a source book on the origins, workings, and consequences of modern general-purpose foundations. The text encompasses the activities of foundations--principally Carnegie, Rockefeller, and Ford--in the production of culture and the formation of public policy. Particular attention is given to the policies of the big foundations in the fields of education and social science research. The authors write from the perspectives of history, sociology, comparative education, and educational policy studies. Their chapters are based on original research. While the contributors do not share a uniform ideological framework, they do have in common a structural point of view--they examine foundations with regard to

their functioning in society. They analyze the implications of foundations' organizational characteristics, modus operandi, and substantive decisions for social control or social change. A distinguishing feature of Philanthropy and Cultural Imperialism is its systematic, critical analysis of the sociopolitical consequences of these powerful institutions. A central thesis is that foundations like Carnegie, Rockefeller, and Ford have a corrosive influence on a democratic society; they represent relatively unregulated and unaccountable concentrations of power and wealth which buy talent, promote causes, and, in effect, establish an agenda of what merits society's attention.

A landmark work from the author of *Orientalism* that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

Begins to fill the gaping lacuna of imperialism in the standard histories of the US by exploring how US expansion has influenced people of other cultures. The 26 essays focus mostly on Africa and African Americans, but also consider the Philippines, Native Americans, Cuba, Latin America, and Disneyworld in Tokyo. They explore the racial and gender dimensions, the ideologies that buttress imperialism, resistance, and other facets. Annotation copyright by Book News, Inc., Portland, OR

A critical cultural materialist introduction to the study of global entertainment media. In *Global Entertainment Media*, Tanner Mirrlees undertakes an analysis of the ownership, production, distribution, marketing, exhibition and consumption of global films and television shows, with an eye to political economy and cultural studies. Among other topics, Mirrlees examines: Paradigms of global entertainment media such as cultural imperialism and cultural globalization. The business of entertainment media: the structure of capitalist culture/creative industries (financers, producers, distributors and exhibitors) and trends in the global political economy of entertainment media. The "governance" of global entertainment media: state and inter-state media and cultural policies and regulations that govern the production, distribution and exhibition of entertainment media and enable or impede its cross-border flow. The new international division of cultural labor (NICL): the cross-border production of entertainment by cultural workers in asymmetrically interdependent media capitals, and economic and cultural concerns surrounding runaway productions and co-productions. The economic motivations and textual design features of globally popular entertainment forms such as blockbuster event films, TV formats, globalized lifestyle brands and synergistic media. The cross-cultural reception and effects of TV shows and films. The World Wide Web, digitization and convergence culture.

An Introduction Cultural ImperialismA Critical Introduction

Moving beyond notions of cultural imperialism, this book furthers our understanding of the implications of global media culture and politics in the 1990s. Leading scholars from a range of fields bring

different perspectives to bear on the role of the state, the range of culture beyond the media, the contribution of international organizations, and the potential for resistance and alternatives. They reflect on the New World International Communications Order' as delineated since the 1970s, and examine its changing nature. Throughout, they connect analysis of the flows and forces which form the world media and communications with the fundamental themes of social science, and illuminate the ways in which underlying questions of inequality, power and control reappear within new media environments.

For more than thirty years, The Institute for Cultural Research (ICR) led the field in stimulating debate and examining ideas within the humanities. Among the Institute's active followers was J. D. Salinger, Robert Graves, Nobel Laureate Doris Lessing, and many others from all walks of life. During its long and distinguished service, ICR published dozens of papers on cultural and cross-cultural themes. Written by scientists, scholars, novelists, musicians, and an array of others, these papers formed a unique resource that is as relevant today as it was decades ago. In the years since ICR ceased formal activities, The Idries Shah Foundation has continued the spirit of its work, and have republished the full range of original monographs.
