Proceedings of ICAEES 2014, Volume 2 Springer

"The assessment builds on the work of the Livestock, Environment and Development (LEAD) Initiative"--Pref.

Proceedings of the International Conference on Soft Computing Systems Tata McGraw-Hill Education

This book is written in very simple manner and is very easy to understand. It describes the theory with examples step by step. It contains the description of writing these steps in programs in very easy and understandable manner. The book gives full understanding of each theoretical topic and easy implementation in programming. This book will help the students in Self-Learning of Data structures and in understanding how these concepts are implemented in programs. This book is useful for any level of students. It covers the syllabus of B.E., B.Tech, DOEACC Society, IGNOU. *From Microstructures to Reliability* Springer

The book is a collection of high-quality peer-reviewed research papers presented in Proceedings of International Conference on Artificial Intelligence and Evolutionary Algorithms in Engineering Systems (ICAEEES 2014) held at Noorul Islam Centre for Higher Education, Kumaracoil, India. These research papers provide the latest developments in the broad area of use of artificial intelligence and evolutionary algorithms in engineering systems. The book discusses wide variety of industrial, engineering and scientific applications of the emerging techniques. It presents invited papers from the inventors/originators of new applications and advanced technologies.

Proceedings of ICICA 2019 Springer

Now in its second edition, D.S. Malik brings his proven approach to C++ programming to the CS2 course. Clearly written with the student in mind, this text focuses on Data Structures and includes advanced topics in C++ such as Linked Lists and the Standard Template Library (STL). The text features abundant visual diagrams, examples, and extended Programming Examples, all of which serve to illuminate difficult concepts. Complete programming code and clear display of syntax, explanation, and example are used throughout the text, and each chapter concludes with a robust exercise set. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Tata McGraw-Hill Education

'Few people know more about India's financial system than Dr Y.V. Reddy. And even fewer have the authority that he commands.' - Raghuram Rajan, former RBI governor 'If America had a central bank chief like Y.V. Reddy, the US economy would not have been in such a mess.' - Joseph Stiglitz, economist and Columbia University professor 'One among the brightest intellectuals living in India today...the most eminent central banker of the last decade across the world.' - P. Chidambaram, former Union finance minister 'How did India manage to beat the odds? [It was] largely the result of the sound management and foresight of one man: Yaga Venugopal Reddy.' - Arvind Panagariya, vice-chairman of the Niti Aayog 'I have high regard for him for two reasons. First, his complete integrity. There are very few civil servants like him who are not self-centered. He does not want to please any bureaucrat or minister. Second, his devotion to work. Intellectually, he is very open.' - Bimal Jalan, former RBI governor 'Unlike Alan Greenspan, who didn't believe it was his job to even point out bubbles, much less try to deflate them, Mr Reddy saw his job as making sure Indian banks did not get too caught up in the bubble mentality.' - Joe Nocera, American journalist and author 'Dr Reddy is of a generation that believed public service was the

highest calling.' - Karina Robinson, editor, The Banker magazine A journalist once asked Y.V. Reddy, 'Governor, how independent is the RBI?' 'I am very independent,' Reddy replied. 'The RBI has full autonomy. I have the permission of my finance minister to tell you that.' Reddy may have put it lightly but it is a theme he deals with at length in *Advice and Dissent*. Spanning a long career in public service which began with his joining the IAS in 1964, he writes about decision making at several levels. In his dealings, he was firm, unafraid to speak his mind, but avoided open discord. In a book that appeals to the lay reader and the finance specialist alike, Reddy gives an account of the debate and thinking behind some landmark events, and some remarkable initiatives of his own, whose benefits reached the man on the street. Reading between the lines, one recognizes controversies on key policy decisions which reverberate even now. This book provides a ringside view of the licence permit raj, drought, bonded labour, draconian forex controls, the balance of payments crisis, liberalisation, high finance, and the emergence of India as a key player in the global economy. He also shares his experience of working closely with some of the architects of India's economic change: Manmohan Singh, Bimal Jalan, C. Rangarajan, Yashwant Sinha, Jaswant Singh and P. Chidambaram. He also worked closely with extraordinary leaders like N.T. Rama Rao, as described in a memorable chapter. As governor of the RBI from 2003 to 2008 he presided over a period of high growth, low inflation, a stable rupee and ample foreign exchange reserves -- a far cry from the 1991 crisis he lived through and describes in vivid detail, when the country had to mortgage its gold to meet its debt obligations. He is credited with saving the Indian banking system from the sub-prime and liquidity crisis of 2008 that erupted shortly after his term at RBI ended. Dr Reddy provides insight into post-crisis reflection undertaken by several global institutions on the international monetary system and financial architecture. In addition, he describes the development of the Fourteenth Finance Commission report, which he chaired, and is considered a game changer. Leavened with his irrepressible sense of humour, *Advice and Dissent* is a warm, engaging account of a life that moves easily from his career in the districts as a young IAS officer to the higher echelons of policy making, in a trajectory that follows change in the country itself.

Artificial Intelligence and Evolutionary Algorithms in Engineering Systems Springer

This book is designed for the way we learn and intended for one-semester course in Design and Analysis of Algorithms. This is a very useful guide for graduate and undergraduate students and teachers of computer science. This book provides a coherent and pedagogically sound framework for learning and teaching. Its breadth of coverage insures that algorithms are carefully and comprehensively discussed with figures and tracing of algorithms. Carefully developing topics with sufficient detail, this text enables students to learn about concepts on their own, offering instructors flexibility and allowing them to use the text as lecture reinforcement. Key Features: " Focuses on simple explanations of techniques that can be applied to real-world problems." Presents algorithms with self-explanatory pseudocode." Covers a broad range of algorithms in depth, yet makes their design and analysis accessible to all levels of readers." Includes chapter summary, self-test quiz and exercises at the end of each chapter. Key to quizzes and solutions to exercises are given in appendices.

First International Conference, DMBD 2016, Bali, Indonesia, June 25-30, 2016. Proceedings Springer

"The book covers foundations of natural language processing as also applications such as information retrieval, information extract, text categorization, automatic summarization and machine translation. Linguistic as well as statistical view points are included. Examples and illustrations are drawn from Indian languages. Current state and future directions are indicated."

An Information Access Perspective Association of Scientists, Developers and Faculties (ASDF)

This unique book provides an up-to-date overview of the concepts behind lead-free soldering techniques. Readers will find a description of the physical and mechanical properties of lead-free solders, in addition to lead-free electronics and solder alloys. Additional topics covered include the reliability of lead-free soldering, tin whiskering and electromigration, in addition to emerging technologies and research.

Data Structures: A Pseudocode Approach with C Springer

A guide to building efficient C data structures.

C Programming And Data Structures (for Jntu) Harper Collins

The LNCS volume LNCS 9714 constitutes the refereed proceedings of the International Conference on Data Mining and Big Data, DMBD 2016, held in Bali, Indonesia, in June 2016. The 57 papers presented in this volume were carefully reviewed and selected from 115 submissions. The theme of DMBD 2016 is "Serving Life with Data Science". Data mining refers to the activity of going through big data sets to look for relevant or pertinent information. The papers are organized in 10 cohesive sections covering all major topics of the research and development of data mining and big data and one Workshop on Computational Aspects of Pattern Recognition and Computer Vision.

TEXTBOOK OF FINITE ELEMENT ANALYSIS Disease Control Priorities

This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

Livestock's Long Shadow Springer Nature

The volume presents high quality research papers presented at Second International Conference on Information and Communication Technology for

Intelligent Systems (ICICC 2017). The conference was held during 2–4 August 2017, Pune, India and organized communally by Dr. Vishwanath Karad MIT World Peace University, Pune, India at MIT College of Engineering, Pune and supported by All India Council for Technical Education (AICTE) and Council of Scientific and Industrial Research (CSIR). The volume contains research papers focused on ICT for intelligent computation, communications and audio, and video data processing.

Data Mining and Big Data Cengage Learning

This book comprises the proceedings of the International Conference on Transformations in Engineering Education conducted jointly by BVB College of Engineering & Technology, Hubli, India and Indo US Collaboration for Engineering Education (IUCEE). This event is done in collaboration with International Federation of Engineering Education Societies (IFEES), American Society for Engineering Education (ASEE) and Global Engineering Deans' Council (GEDC). The conference is about showcasing the transformational practices in Engineering Education space.

Environmental Issues and Options John Wiley & Sons

The book is a collection of high-quality peer-reviewed research papers presented in Proceedings of International Conference on Artificial Intelligence and Evolutionary Algorithms in Engineering Systems (ICAEEES 2014) held at Noorul Islam Centre for Higher Education, Kumaracoil, India. These research papers provide the latest developments in the broad area of use of artificial intelligence and evolutionary algorithms in engineering systems. The book discusses wide variety of industrial, engineering and scientific applications of the emerging techniques. It presents invited papers from the inventors/originators of new applications and advanced technologies.

Issues and Challenges in Disaster Management Springer

The natural disasters are the killer agents which can/can't be predicted even though we have modern technology. Every year, in one place or another, disasters striking which is devastating the area and surroundings, leading to ecological disruption besides huge loss of life and property. India is vulnerable to cyclones, landslides/avalanches, earthquakes, floods, droughts, forest fires, epidemics, etc. The 5700-km long coast of India, with its dense population is vulnerable to cyclones/low depressions, tsunamis, etc. The 2400-km long rugged Himalayan terrain is vulnerable to landslides, avalanches and earthquakes. India is not only vulnerable to natural disasters, it is also experiencing industrial accidents. The Bhopal Gas tragedy is one of the major man-made disasters in the world. The state of Andhra Pradesh has 970-km long coastline with two major rivers, etc. The conference is conducted in Visakhapatnam, is famous for industries and tourism. Recently, several industrial accidents took place, besides major natural disasters like Hud-Hud, etc. Disaster management shall be implemented from the grass root level in vulnerable areas to improve the capacity building, so as to minimize the losses. The capacity building coupled with technology results in reduction of loss of life and property.

Intelligent Computing and Information and Communication Springer

The two-part, fifth edition of *Advanced Organic Chemistry* has been substantially revised and reorganized for greater clarity. The material has been updated to reflect advances in the field since the previous edition, especially in computational chemistry. Part B describes the most general and useful synthetic reactions, organized on the basis of reaction type. It can stand-alone; together, with Part A: Structure and Mechanisms, the two volumes provide a comprehensive foundation for the study in organic chemistry. Companion websites provide digital models for students and exercise solutions for instructors.

Part B: Reaction and Synthesis Finite Automata and Formal Languages: A Simple Approach

This edited volume on machine learning and big data analytics (Proceedings of ICMLBDA 2021) is intended to be used as a reference book for researchers and practitioners in the disciplines of computer science, electronics and telecommunication, information science, and electrical engineering. Machine learning and Big data analytics represent a key ingredients in the industrial applications for new products and services. Big data analytics applies machine learning for predictions by examining large and varied data sets—i.e., big data—to uncover hidden patterns, unknown correlations, market trends, customer preferences, and other useful information that can help organizations make more informed business decisions.

SocProS 2018, Volume 2 John Wiley & Sons

This book is a collection of peer-reviewed best selected research papers presented at 3rd International Conference on Computer Networks and Inventive Communication Technologies (ICCNCT 2020). The book covers new results in theory, methodology, and applications of computer networks and data communications. It includes original papers on computer networks, network protocols and wireless networks, data communication technologies, and network security. The proceedings of this conference is a valuable resource, dealing with both the important core and the specialized issues in the areas of next generation wireless network design, control, and management, as well as in the areas of protection, assurance, and trust in information security practice. It is a reference for researchers, instructors, students, scientists, engineers, managers, and industry practitioners for advance work in the area.

Artificial Intelligence and Evolutionary Algorithms in Engineering Systems Springer Nature

ICIEMS 2015 is the conference aim is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Engineering Technology, Industrial Engineering, Application Level Security and Management Science. This conference provides opportunities for the delegates to exchange new ideas and application experiences face to face, to establish business or research relations and to find global partners for future collaboration.
