The Brown Center on Education Policy conducts research on topics in American education, with a special focus on efforts to improve academic achievement in elementary and secondary schools. The center seeks to inform policymakers at all levels of government, to influence the course of future educational research, and to produce a body of work not only valuable to policymakers and scholars, but also parents, teachers, administrators, taxpayers, school board members, and the general public. This annual report card analyzes the state of American education using the latest measures of student learning, uncovers and explains important trends in achievement test scores, and identifies promising and disappointing educational reforms. Unlike similar reports intended solely for government use, the Brown Center annual report card is written for an audience of parents, teachers, and policymakers.

The "I CAN Learn[R] Pre-Algebra" and "Algebra" computerized curricula are designed to cover mathematics and problem-solving skills for ethnically diverse, inner-city students in grades 6-12. The curricula are designed to equip students with the skills they need to meet district, state, and national math objectives through an interactive software program that teaches pre-algebra and algebra. The "I CAN Learn[R] Pre-Algebra" software program

consists of 131 lessons, and "Algebra" of 181 lessons. The developer describes the curriculum software as meeting National Council of Teachers of Mathematics standards and configurable to meet state and local grade-level expectations. One study of "I CAN Learn[R] Pre-Algebra" and "Algebra" met the What Works Clearinghouse (WWC) evidence standards and five more studies met WWC evidence standards with reservations. The six studies, which included more than 16,600 eighth- and ninth-grade students in middle and high schools in California, Florida, Georgia, and Louisiana, compared the standardized math performance of students who used the "I CAN Learn[R]" system with that of students who used traditional curricula. The "I CAN Learn[R] Pre-Algebra" and "Algebra" curricula were found to have positive effects on math achievement. (Contains 11 tables and 9 footnotes.) [This publication was produced by the What Works Clearinghouse. The following studies are reviewed in this intervention report: (1) Kirby, P. C. (2006, October). "I CAN Learn[R] in Orleans Parish Public Schools effects on LEAP 8th grade math achievement, 2003-2004." (Available from ed-cet, Inc., 2301 Killdeer Street, New Orleans, LA 70122); (2) Kerstyn, C. (2001). "Evaluation of the I CAN Learn[R] mathematics classroom: First year of implementation (2000-2001 school year)." (Available from the Division of Instruction, Hillsborough County Public Schools, 901 East Kennedy Blvd., Tampa, FL 33602); (3) Kerstyn, C. (2002, October). "Evaluation of the I CAN Learn[R] mathematics classroom: Second year of implementation (2001-2002 school year)." (Available from the Division of Instruction, Hillsborough County Public Schools, 901 East Kennedy Blvd., Tampa, FL 33602); (4) Kirby, P. C. (2004,

The Pre-Algebra Doodle Note Book offers your middle school math student the brain benefits of visual note taking all throughout their coursework! The doodle notes include fractions, decimals, integers, percents, geometry, equations, expressions, proportions, probability, graphs, inequalities, the coordinate plane, slope, linear equations, systems, graphing, and more! Each workbook is licensed for only a single student to use. Copying pages is prohibited. What's included: - Over 170 doodle note pages for key concepts in Pre Algebra - Chapter organizer cover pages - Interactive vocabulary review pages for each chapter (doodle-style!) - Bonus pages! - Answer Key & Photo Samples for doodle note concept pages - Teaching Tips & Introductory Pages - 10 different blank templates for any additional notes Each chapter progresses through the lesson topics with guided notes, visual references, and graphic review sheets that follow the brain-based doodle note method.

CHAPTERS: 1: Expressions & Integers 2: Equations & Inequalities 3: Decimals & Factors 4: Fractions 5: Ratios, Proportions, & Percents 6: Geometry 7: Area & Volume 8: Statistics & Probability 9: Formulas & Finance 10: Intro to Algebra Math doodle notes activate both hemispheres of the brain and lead to increased focus and retention! Because of dual coding theory, the student brain can process the new content more easily through the interactive tasks, visual memory triggers, and opportunities to sketch, color, and embellish! This book contains interactive visual note templates. It replaces a notebook (and possibly a textbook,

depending on the way you teach), but does not replace your practice problem set. Although the pages do offer some examples and problems, you will definitely want to supplement with plenty of practice / homework on the side as well. TEACHER REVIEWS: "I could not believe the increase in engagement and understanding my students demonstrated! We love these!" "Perfect for students with Dyslexia, ADHD, or other learning disabilities." "My 8th grade summer school who are mostly boys loved coloring the notes. I'm pleasantly surprised! "Doodling helps my daughter's stress level during math lessons!" "Keeps them extremely focused!" "My students absolutely love the doodle notes, and they feel like they retain more information." "The color coding helps them to make connections." "My students and I are loving the doodle notes. They can't believe that I am telling them that they have to doodle. And they love watching me doodle too. Not only that but I have already seen a major increase in their math scores."
