Ageism

KLEIN DWAYNE

Ageism MIT Press
Ageing without
Ageism? contributes to
the essential and
timely discussion of
age, ageism,
population ageing, and
public policy. It
demonstrates the
breadth of the
challenges posed by
these issues by
covering a wide range
of policy areas: from

health care to old-age
support, from
democratic
participation to
education, and from
family to fiscal policy.
With contributions from
21 authors the
discussion bridges the
gap between academia
and public life by
putting in dialogue
fresh philosophical
analysis and specific
new policy proposals. It
approaches familiar
issues like age
discrimination, justice
between age groups,

and democratic participation across the ages from novel perspectives.

Ageism in Work and Employment

Cambridge University Press

This title was first published in 2001. This collection of essays on the the subject of ageism in work and employment arose out of the international conference held at Stirling University in July 1996. The book addresses various topics within this issue including the problem and its causes; the experience and practice of age discrimination in employment; and remedies and prospects.

Contemporary Perspectives on Ageism Rutgers University Press

This open access book provides a comprehensive perspective on the concept of ageism, its origins, the manifestation and consequences of ageism, as well as ways to respond to and research ageism. The book represents a collaborative effort of researchers from over 20 countries and a variety of disciplines, including, psychology, sociology, gerontology, geriatrics, pharmacology, law, geography, design, engineering, policy and media studies. The contributors have collaborated to produce a truly stimulating and educating book on ageism which brings a clear overview of the state of the art in the field. The book serves

as a catalyst to generate research, policy and public interest in the field of ageism and to reconstruct the image of old age and will be of interest to researchers and students in gerontology and geriatrics.

Aging, Ageism, and Society MIT Press

This anthology contributes to creating awareness on how digital ageism operates in relation to the widely spread symbolic representations of old and young age around digital technologies, the (lack of) representation of diverse older individuals in the design, development, and marketing of digital technologies and in the actual algorithms and

datasets that constitute them. It also shows how individuals and institutions deal with digital ageism in everyday life. In the past decades, digital technologies permeated most aspects of everyday life. With a focus on how age is represented and experienced in relation to digital technologies leading to digital ageism, digitalisation's reinforcement of spirals of exclusion and loss of autonomy of some collectives is explored, when it could be natural for a great part of society and represent a sort of improvement. The book addresses social science students and scholars interested in everyday digital technologies, society and the power

struggles about it, providing insights from different parts of the globe. By using different methods and touching upon different aspects of digital ageism and how it plays out in contemporary connected data societies, this volume will raise awareness, challenge power, initiate discussions and spur further research into this field. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution 4.0 license. [Age On Together](#) Routledge Current findings on the origins and effects of ageism, as well as ways to reduce it. *Ageing Without Ageism?* Celadon

Books

This book promotes an understanding of ageism, discrimination and mistreatment of older adult workers, incorporating an international human rights perspective. The impact of ageism on the mistreatment of older adult workers has not to date been examined in depth through the lens of international human rights instruments, nor has discrimination against older adults in the workplace been framed as a form of elder abuse for research and policy making purposes. This book presents a multi-disciplinary exploration of these themes as they affect work and retirement of older adults. It reflects the view that older people who choose to work

into old age should be able to do so in enabling work environments that promote dignity and are free of abuse. The contributing authors come from many disciplines, including law, psychology, social work, business, and international affairs. Many are members of the International Network for the Prevention of Elder Abuse (INPEA), a non-governmental organization with consultative status at the United Nations, and have devoted their professional careers to increase awareness and understanding of elder abuse in order to prevent it. The editors hope that broadening the framework within which elder abuse in the workplace is understood will

stimulate further research, policy and program development to address this troubling social problem.

Ageism at Work

McGraw-Hill Education (UK)

Winner of the MLA Prize for Independent Scholars and the APA's Florence L. Denmark Award for Contributions to Women and Aging
When the term "ageism" was coined in 1969, many problems of exclusion seemed resolved by government programs like Social Security and Medicare. As people live longer lives, today's great demotions of older people cut deeper into their self-worth and human relations, beyond the reach of law or public policy. In

Ending Ageism, or How Not to Shoot Old People, award-winning writer and cultural critic Margaret Morganroth Gullette confronts the offenders: the ways people aging past midlife are portrayed in the media, by adult offspring; the esthetics and politics of representation in photography, film, and theater; and the incitement to commit suicide for those with early signs of “dementia.” In this original and important book, Gullette presents evidence of pervasive age-related assaults in contemporary societies and their chronic affects. The sudden onset of age-related shaming can occur anywhere—the shove in the street, the cold shoulder at the party,

the deaf ear at the meeting, the shut-out by the personnel office or the obtuseness of a government. Turning intimate suffering into public grievances, Ending Ageism, Or How Not to Shoot Old People effectively and beautifully argues that overcoming ageism is the next imperative social movement of our time. About the cover image: This elegant, dignified figure--Leda Machado, a Cuban old enough to have seen the Revolution--once the center of a vast photo mural, is now a fragment on a ruined wall. Ageism tears down the structures that all humans need to age well; to end it, a symbol of resilience offers us all brisk blue-sky energy. “Leda Antonia Machado” from “Wrinkles of the City,

2012." Piotr Trybalski / Trybalski.com. Courtesy of the artist. A Declaration of Grievances "A Declaration of Grievances" was written by Margaret Morganroth Gullette and is excerpted from her book *Ending Ageism, or How Not to Shoot Old People* (2017, Rutgers University Press). Ageism Taylor & Francis

It is amazing to realize that much of the Western medical community is in a love/hate relationship with the economics of medicine. Quality-Adjusted Life Years (QALYs) is one of the primary methods of guiding many medical decision-makers in the allocation of limited medical resources.

Herein lies the problem

of medicine and economics. It seems that deciding who will receive limited medical resources is a task filled with moral and ethical difficulties, even for those depending on the information obtained from QALY calculations. These moral and ethical difficulties are beyond the scope of sound bites that tout the benefits of universal health care, affordable insurance, or the safety of the free-market economy. The breadth of the difficulty is found in the widespread disagreement concerning how the health-care system should be distributed or fixed, since most will agree that there is a problem with distributing medical

resources. It seemed obvious that some difficult decisions will need to be made that few are both willing and able to make. This difficulty is particularly true in decisions about health-care allocation, and that is where QALYs have been found useful and problematic. Limiting medical care for the elderly based upon their age did not occur until the mid-twentieth century possibly because the elderly held a unique position of respect in the Western community. It is no longer the case that the elderly are given a unique position of respect and dignity. Rather, it seems that with the increased use of QALY calculations, the elderly are in danger of receiving less medical care than

they are warranted. It is imperative that Christians respond to the ethical implications of significant models of resource allocation that currently assist decision-makers in the allocation process, such as QALYs.

Ageism Wipf and Stock Publishers

In this updated edition, Palmore provides a comprehensive review of many different forms of ageism including the interesting notion of positive ageism, which projects onto the elderly as a group traditional virtues like wisdom and thrift. He discusses both the individual and social influences on attitudes toward the aged; analyzes institutional patterns of ageism; and explores ways to used to reduce the impact of ageism on

the elderly. This book is a valuable resource and text for students and professionals interested in the sociology of aging in our society. OLD COPY: Erdman Palmore has studied prejudice and discrimination toward older people in various ways throughout his distinguished career. Since publication of his ground breaking first edition, 10 years ago, there has been a growing interest and acceleration of research on the topic of ageism. In nontechnical language, Palmore provides a comprehensive review of the many different forms of ageism, including positive ageism, discusses the individual and social influences on ageism, analyzes institutional patterns, and explores

methods that could be used to reduce ageism. This book is a valuable resource and text for students and professionals interested in the problems and opportunities of aging in our society. Useful educational tools include: A revised Appendix of the Facts on Aging Quizzes, as well as a totally new Appendix of Abstracts of recent publications on ageism.

Ageism World Health Organization
Learn more about age discrimination and how it affects us all The Encyclopedia of Ageism is a comprehensive review of over 125 aspects of ageism, alphabetically arranged for easy access. Written by 60 experts, the book examines topics such

as anti-aging, stereotypes, and the media—with numerous references for further information. You'll find an alphabetical list of the entries, a detailed index, and a list of the entries categorized by subject, to help you find what you need fast. This resource will increase your awareness about the many facets of ageism and provide you with a wealth of concepts, theories, and facts about ageism. This important resource exposes the many faces of dehumanization through the elder neglect and prejudice that results from today's worldwide youth-oriented culture. The Encyclopedia of Ageism will help you recognize ageism when you encounter it and

avoid it in your own thinking and actions. The book is a valuable guide for anyone working with older people and for older people themselves. With the Encyclopedia of Ageism, you will be able to identify personal, cultural, and institutional sources of ageism, such as: age denial age inequality/stratification sexuality scapegoating abuse the disengagement theory and so much more! This eye-opening reference shows how discrimination against elders can have consequences to the aged, the youth, the economy, and society as a whole. The Encyclopedia of Ageism promotes a future where the human rights of older persons are preserved

and aging is considered a positive stage in the cycle of life. With this book, you will find strategies for reducing ageism, changing perceptions, and enhancing the quality of life for senior citizens and—someday—yourself.

**Ageism and
Mistreatment of
Older Workers**

Springer Publishing
Company

Age discrimination is a highly topical issue in all industrialised societies, against a background of concerns about shortening working lives and ageing populations in the future. Based upon detailed research, and adopting an interdisciplinary approach, this unique study traces the

history of the age discrimination debate in Britain and the USA since the 1930s. It critically analyses the concepts of ageism in social relations and age discrimination in employment. Case-studies on generational equity and health care rationing by age are followed by an analysis of the British government's initiatives against age discrimination in employment. The book then traces the history of the debate on health status and old age, addressing the question of whether working capacity has improved sufficiently to justify calls to delay retirement and extend working lives. It concludes with a detailed examination of the origins and subsequent working of

the USA's 1967 Age Discrimination in Employment Act. Global report on ageism Routledge

Let's face it: almost everyone fears growing older. We worry about losing our looks, our health, our jobs, our self-esteem—and being supplanted in work and love by younger people. It feels like the natural, inevitable consequence of the passing years, But what if it's not? What if nearly everything that we think of as the "natural" process of aging is anything but? In *Agewise*, renowned cultural critic Margaret Morganroth Gullette reveals that much of what we dread about aging is actually the result of ageism—which we can, and should, battle as strongly as we do

racism, sexism, and other forms of bigotry. Drawing on provocative and under-reported evidence from biomedicine, literature, economics, and personal stories, Gullette probes the ageism that drives discontent with our bodies, our selves, and our accomplishments—and makes us easy prey for marketers who want to sell us an illusory vision of youthful perfection. Even worse, rampant ageism causes society to discount, and at times completely discard, the wisdom and experience acquired by people over the course of adulthood. The costs—both collective and personal—of this culture of decline are almost incalculable, diminishing our

workforce, robbing younger people of hope for a decent later life, and eroding the satisfactions and sense of productivity that should animate our later years. Once we open our eyes to the pervasiveness of ageism, however, we can begin to fight it—and Gullette lays out ambitious plans for the whole life course, from teaching children anti-ageism to fortifying the social safety nets, and thus finally making possible the real pleasures and opportunities promised by the new longevity. A bracing, controversial call to arms, *Agewise* will surprise, enlighten, and, perhaps most important, bring hope to readers of all ages.

Age Discrimination

Rowman & Littlefield
Current research and

theory from a range of disciplines on ageism, discussing issues from elder abuse to age discrimination against workers, revised and updated. People commonly use age to categorize and stereotype others—even though those who stereotype the elderly are eventually bound to become elderly themselves. Ageism is found cross-culturally, but it is especially prevalent in the United States, where most people regard growing older with depression, fear, and anxiety. Older people in the United States are stigmatized and marginalized, with often devastating consequences. This volume collects the latest theory and research on prejudice against older people,

offering perspectives from psychology, nursing, medicine, social work, and other fields. The second edition has been completely updated, with new or extensively revised contributions. The contributors, all experts in their fields, consider issues that range from elder abuse to age discrimination against workers. There has been a relative dearth of research on ageism, perhaps because age prejudice is still considered socially acceptable. This book is still the only one that examines ageism in such detail, from such diverse scholarly perspectives. The contributors discuss the origins and effects of ageism and offer suggestions for how to reduce ageism

as the wave of baby boomers heads for old age. Contributors Yoav S. Bergman, Ehud Bodner, Jennifer Barbour, Piers Bayl-Smith, Daphne Blunt Bugental, Maria Clara P. de Paula Couto, Susan T. Fiske, Jeff Greenberg, Barbara Griffin, Jessica A. Hehman, Peter Helm, Sarah H. Kagan, Molly Maxfield, Lynn McDonald, Mary Chase Mize, Joann M. Montepare, Todd D. Nelson, Michael S. North, Amanda Rumsey, Jeff Schimel, Laura Shannonhouse, Dirk Wentura, Susan Krauss Whitbourne *Learning to be Old* University of Toronto Press
Why do we still tolerate stereotypes and discrimination based on age? This bold account of the history

and present-day realities of ageism by a nationally recognized gerontologist and speaker uncovers ageism's roots, impact, and how each of us can create a new reality of elderhood. *Ageism Unmasked* shifts the lens, enabling us to see that we tolerate, and sometimes actively promote, attitudes and behaviors toward differently aged people that we would reject and condemn if applied to any other group. It peels back the layers to expose how cultural norms and unconscious prejudices have seeped into our lives, silently shaping our treatment of others based on their age and our own misconceptions about aging—and about ourselves. Offering an all-inclusive approach,

Dr. Tracey Gendron reveals the biases behind our false understanding of aging, sharing powerful opportunities for personal growth along with strategies to help create an anti-ageist society. *Ageism Unmasked* will help readers let go of our desperate need to stay young... exposing how we personally, systematically, structurally, and institutionally stigmatize being old. *Ageism Unmasked* will help readers appreciate both the challenges and opportunities of how we all age... showing how ageism is prejudice towards both younger and older people. *Ageism Unmasked* will help readers reset our expectations for

getting old... providing the tools to anticipate and experience elderhood as a time of renewed meaning and purpose, empowering each of us to create our own definition of successful aging.

Ageism Unmasked continues Dr. Gendron's transformative work inspiring people of all ages to embrace aging as our universal and lifelong process of developing over time — biologically, psychologically, socially, and spiritually.

Age, Discrimination and Society Celadon Books

Population aging is occurring worldwide. Reports of abuse and neglect of older men and women are also evident on a global basis. While much of the work on

identification, treatment and prevention of abuse of older persons has been within the family setting, it cannot be separated from the broader experience of growing old in contemporary society. Time and time again, issues around legislation, policy and practice collide with human rights, societal attitudes and stereotypes. Raising awareness of the link among aging, ageism and abuse, is one goal of this book and a necessary first step in the battle to eliminate abuse and neglect of older persons. But awareness is not enough, action needs to be taken to develop, case finding procedures and remedial and preventive policies and

programs that are elder-friendly both in intent and in the way that they are implemented. This book offers a thought-provoking examination of selected current policies and programs that have been developed within the health, social services and criminal justice systems. It highlights the special issues and vulnerabilities of older women, older men and persons from the LGTB community. It also features a unique approach to reaching young people through an educational program that shapes attitudes and behavior via graphic art. Clear, straightforward writing style - reader does not have to contend with murky theories and obscure references
Practical approach -

readers can relate to the examples that are provided of situations in which abuse and neglect has or can occur

Encyclopedia of Ageism Steerforth
Ageism: Past, Present, and Future presents perspectives for understanding ageism and puts ageism in the context of specific social institutions. McNamara and Williamson uniquely provide a number of complementary ways to understand ageism, including social and psychological theories of ageism, economic development, ageism as frame or lens, and ageism at the intersection of various social categories such as gender and race. They then put ageism in the context of mass media, health care,

employment, and public policy. This short text is an ideal addition to courses on sociology of aging, social policy, and social problems.

Age Friendly St. Paul : West

The well-known idiom about death and taxes being the two certainties in life may require a revision with a potential third certainty—old age.

Barring the unexpected or the unthinkable, people nowadays can expect to grow old with life expectancies increasing due to medical and scientific advances. Hence, old age is a timely and compelling subject that affects us all. But it can be a mixed blessing.

We know of old people struggling with health issues or financial woes. In that sense, old age, like death and

taxes, is not a comfortable topic. Yet, the Bible portrays God as having a high view of the aged. Utilizing a biblical hermeneutics of ageism, we can read Scripture to extract important lessons and principles not only as an encouragement to older readers but as a guide for younger readers in relating to senior members of the faith. Since aging is a global phenomenon, the personal points of view of the old people themselves living in Asia assume equal importance with those living in the West, particularly America. In fact, can we not all learn from each other, adopting good ideas from our global neighbors to strengthen our own lives and relationships?

Contemporary

Perspectives on

Ageism Springer
 Discussing some of the key sociological and social policy concepts of the last decade, age, ageism, and age discrimination, this book examines the profound demographic changes in the Western world, especially the increasing number of older people in societies, have given rise to academic and policy interest in issues related to age and ageing..

Overcoming Ageism (HBR Women at Work Series) Harvard Business Press

Ageism is prevalent in a great deal of current scholarship in the social sciences as scholars fault youth for being delinquent or politically apathetic. Researchers ignore

young people's actual voices, despite their leadership in recent global uprisings, some of which unseated entrenched dictators. Neoliberalism must be exposed in its focus on youth sub-cultures and styles rather than economic barriers caused by growing inequality and rising youth unemployment rates. Ageism in Youth Studies also discusses the debate about "Generation We or Me" and if Millennials are narcissistic. Resources about global youth studies are included, along with the results of the author's surveys and interviews with over 4,000 young people from 88 countries.
