This book presents research on the learning of foreign languages by children aged 6-12 years old in primary school settings. The collection provides a significant and important contribution to this often overlooked domain and aims to provide research-based evidence that might help to inform and develop pedagogical practice. Topics covered in the chapters include the influence of learner characteristics on word retrieval; explicit second language learning and language awareness; meaning construction; narrative oral development; conversational interaction and how it relates to individual variables; first language use; feedback on written

production; intercultural awareness raising and feedback on diagnostic assessment. It will be of interest to undergraduate and graduate students, researchers, teachers and stakeholders who are interested in research on how children learn a second language at primary school.

A fun course to get young children ready to learn in English. Themed units - from 'homes' to 'play time' - teach children letters, colours, numbers and more. Each book covers one term and includes three units. Every unit includes a story, from traditional tales such as Goldilocks, to stories in familiar settings like the classroom. Activities (including songs, stickers, games and matching) help children develop speaking, listening and motor skills alongside early comprehension, reading and writing skills. Each unit encourages learners to build vocabulary by relating content to their experiences - the first steps of critical thinking and active learning.
