Lees' Loss Prevention in the Process Industries Hazard
Identification, Assessment and Control

Lees' Loss Prevention in the Process Industries Hazard
Identification, Assessment and Control Butterworth-Heinemann
[Lees' Loss Prevention in the Process Industries](#) Butterworth-
Heinemann

Safety in the process industries is critical for those who work with
chemicals and hazardous substances or processes. The field of
loss prevention is, and continues to be, of supreme importance to
countless companies, municipalities and governments around the
world, and Lees' is a detailed reference to defending against
hazards. Recognized as the standard work for chemical and

process engineering safety professionals, it provides the most
complete collection of information on the theory, practice, design
elements, equipment, regulations and laws covering the field of
process safety. An entire library of alternative books (and cross-
referencing systems) would be needed to replace or improve
upon it, but everything of importance to safety professionals,
engineers and managers can be found in this all-encompassing
three volume reference instead. The process safety encyclopedia,
trusted worldwide for over 30 years Now available in print and
online, to aid searchability and portability Over 3,600 print pages
cover the full scope of process safety and loss prevention,
compiling theory, practice, standards, legislation, case studies
and lessons learned in one resource as opposed to multiple
sources

Hazard Identification, Assessment and Control
