The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

This expansive and practical textbook contains organic chemistry experiments for teaching in the laboratory at the undergraduate level covering a range of functional group transformations and key organic reactions. The editorial team have collected contributions from around the world and standardized them for publication. Each experiment will explore a modern chemistry scenario, such as: sustainable chemistry; application in the pharmaceutical industry; catalysis and material sciences, to name a few. All the experiments will be complemented with a set of questions to challenge the students and a section for the instructors, concerning the results obtained and advice on getting the best outcome from the experiment. A section covering practical aspects with tips and advice for the instructors, together with the results obtained in the laboratory by students, has been compiled for each experiment. Targeted at professors and lecturers in chemistry, this useful text will provide up

to date experiments putting the science into context for the students.

The Instant-Series Presents "Instant Mind Power" How to Train and Sharpen Your Mental Abilities Instantly! System Updating In Progress... Your mind is a superhuman computer. It houses all your cognitive abilities: concentration, memory, awareness, reasoning, perception, etc. It's the command center that controls your entire being. It's your very existence. Your mind is - who you are. MIND = YOU Wouldn't you like to enhance this power of your mind to... - Perform tasks and get things done faster - Memorize and recall things better - Learn anything easily without a sweat - Unleash your natural creative ability - Achieve the kind of success you want The capacity of limitless human potential and what your own mind can do for you are unfathomable. Scientists have proven that the more you use certain areas of your brain - like for learning - increases neural pathways comprised of neuron brain cells to build stronger and newer connections that are the makeup for our intelligence, making it easier to assimilate and process information faster like a supercomputer. Thus, you can upgrade your mind to be

smarter through mental training, mind exercises, and even fun brain games. Within "Instant Mind Power": * How to perform a simple mind hack to process information then retrieve them from your memory bank like a recorded movie scene with every detail intact. * How to rewire your mind with the "mental numbing" technique to suppress your sensitivity to nonessential stimuli to give you unstoppable laser focus. * How to practice channeling your thoughts at an instant snap whenever you need to, so you have mastery control over whatever it is you want your mind to do instead of it controlling you. * How to program your mind through "horizontal mind mapping" to force it to get things done even when it's difficult or don't feel like it. * How to train your brain to its fully optimized-operating mode with a series of mind training so you can increase your mental

abilities to think more clearly and quickly. * Plus, custom practical "how-to" strategies, techniques, applications and exercises on how to sharpen your mind. ...and much more. Your mind is the input correlating to the output of life you will have. Control your mind to conquer your life; and you can achieve the extraordinary. After all - a mind IS a terrible thing to waste. Reconfigure your human-computer hardware to be a superhuman intelligence.
