Escape 9-5, Live Anywhere, and Join the New Rich The 4-Hour Body An Uncommon Guide to Rapid Fat-Loss, Incredible Sex, and Becoming Superhuman
 #1 NEW YORK TIMES BESTSELLER • The game-changing author of Tribe of Mentors teaches you how to reach your peak physical potential with minimum effort. "A practical crash course in how to reinvent yourself."—Kevin Kelly, *Wired* Is it possible to reach your genetic potential in 6 months? Sleep 2 hours per day and perform better than on 8 hours? Lose more fat than a marathoner by bingeing? Indeed, and much more. The 4-Hour Body is the result of an obsessive quest, spanning more than a decade, to hack the human body using data science. It contains the collective wisdom of hundreds of elite athletes, dozens of MDs, and thousands of hours of jaw-dropping personal experimentation. From Olympic training centers to black-market laboratories, from Silicon Valley to South Africa, Tim Ferriss fixated on one life-changing question: For all things physical, what are the tiniest changes that produce the biggest results? Thousands of tests later, this book contains the answers for both men and women. It's the wisdom Tim used to gain 34 pounds of muscle in 28 days, without steroids, and in four hours of total gym time. From the gym to the bedroom, it's all here, and it all works. You will learn (in less than 30 minutes each): • How to lose those last 5-10 pounds (or 100+ pounds) with odd combinations of food and safe chemical cocktails • How to prevent fat gain while bingeing over the weekend or the holidays • How to sleep 2 hours per day and feel fully rested • How to produce 15-minute female orgasms • How to triple testosterone and double sperm count • How to go from running 5 kilometers to 50 kilometers in 12 weeks • How to reverse "permanent" injuries • How to pay for a beach vacation with one hospital visit And that's just the tip of the iceberg. There are more than 50 topics covered, all with real-world experiments, many including more than 200 test subjects. You don't need better genetics or more exercise. You need immediate results that compel you to continue. That's exactly what The 4-Hour Body delivers.

 If you want to build muscle and lose fat easily, effectively, and rapidly...and if you'd like to rid yourself of all kinds of bad advice and habits that are making getting into great shape much harder than it should be...then you need to read this book. Let me ask you a question. Do any of the following claims sound familiar? "I have bad genetics—I just can't build muscle or lose fat easily." "You have to work your abs more to get a six-pack." "When doing cardio, you want your heart rate in the 'fat burning zone.'" "Don't eat carbohydrates—they make you fat." "Don't eat at night if you

want to lose weight." "If you wait too long in between meals, your body goes into 'starvation mode' and you will mess up your metabolism." "I'm overweight because I have a slow metabolism." "You've probably heard one or more of these statements before, and the sad truth is lies like these have ruined many people's fitness ambitions. Thanks to the overwhelming amount of fitness pseudo-science and lies being pushed on us every day by bogus magazines and self-styled "gurus," it's becoming harder and harder to get in shape. Muscle Myths was written to debunk the most commonplace and harmful gimmicks, fads, myths, and misinformation in the health and fitness industry. And unlike other books that just offer endless opinions, the advice in this book is backed up by over 300 citations of scientific literature, and real-world results. Make no mistake: this isn't a book about exercise and diet theory. This book is full of practical, results-driven advice that will help you reach your fitness goals easier and faster. Here are just some of the things you'll learn in this book: Why you don't have to completely cut out carbs or fat, or eat weird combinations of food to lose weight. The truth about supplements and why 99% of them are a complete waste of money (and the few that are actually scientifically proven to work). The truth about the effects of fasting and the "starvation mode" myth. Yup, it's a myth, and you may even want to incorporate some fasting into your meal schedule. Why eating a substantial amount of carbohydrates every day won't make you fat as some "experts" claim, but why going low-carb can be beneficial for some. The scientific secrets of getting a six-pack. Forget 6-minute gimmicks, doing endless crunches, and hours of grueling cardio—it's actually pretty easy when you know what you're doing. Training and diet methods that will completely shatter any perceived "genetic barriers" that you think are holding you back from building muscle or losing weight. What you need to know about alcohol and its effects on your fat loss and muscle growth. (Hint: It's not nearly as bad as some people claim, and you don't have to totally abstain if you know what you're doing!) And much more. This book will save you the money, time, and frustration of falling into the traps of misleading diets, workout programs, and products, and teach you how to finally start seeing real results with your diet and exercise. SPECIAL BONUS FOR READERS! With this book you'll also get a free 52-page bonus report from the author called "Muscle Meals: 15 Recipes for Building Muscle, Getting Lean, and Staying Healthy." In this free bonus report, you'll find 15 fast, healthy, and tasty meals that will help you build muscle or lose weight, regardless of your current skills. Scroll up and click the "Buy" button now to learn the no-BS truth of how to look good and feel great without having to endure tortuously restrictive diets or long, grueling exercise routines.
