Discovering the Humanities Prentice Hall "How did art critics come to speak of light and dark as, respectively, "high in value" and "low in value." In this book, Henry Sayre traces the origins of this usage in one of art history's most famous and racially charged paintings, Manet's Olympia. Masterfully researched and argued, this bold study reveals the extraordinary weight of history and politics that Manet's painting bears, and the presence of slavery at modernism's roots. Sayre shows that it was Émile Zola who introduced a new "law of values" to art criticism in an 1867 essay on Manet. Unpacking the intricate contexts of Zola's essay and of several related paintings of Manet, Sayre argues that Zola's use of the economic metaphor of "value" was doubly coded. On the one hand, it was a feint that deflected attention away from Olympia's actual subject and toward the painting's formal qualities. On the other, Sayre argues, "value" for Zola was a trope for the political economy of slavery and the Second Empire's complicity in the ongoing slave trade in the Americas. Value in Art is a surprising and necessary intervention in our understanding of modern art's emergence in relation to issues of race"--

Sayre, literary scholar and art historian, demonstrates that Williams' work, heavily influenced by painters and photographers of the Stieglitz circle, is actually founded in the visual dimension of the printed word and must be approached as both graphic design and the representation of visual experience itself. He traces Williams' preoccupation with a visual order of poetry from his early work to the sophisticated replacement of painting by words in Paterson, Book Five and Pictures from Brueghel. Shows how Williams came to

conceive of the poem as a visual order within which the disarray of the American scene could be composed. He advances a substantially new conception of Williams, forcing readers to reconsider their views. ISBN 0-252-01059-0 : \$12.95.

Since its initial publication, *Writing about Writing* has empowered tens of thousands of students to investigate assumptions about writing and to explore how writing works. It does so by making writing itself the subject of inquiry. Unique to Wardle and Downs' approach, the text presents "threshold concepts" about writing--central ideas that writers need to understand in order to progress. As they come to a deeper understanding of these threshold concepts, students are able to transfer their understanding to any writing situation they encounter. This new edition has been refined and improved based on input from instructors using the text. Now with more explicit instruction to support academic writers, a new Part One explains the value of investigating writing, introduces threshold concepts and the notion of transfer, details the elements of genre and rhetorical reading, and offers a guide for conducting writing studies research at a level appropriate for undergraduates. The readings chapters have been updated and streamlined, and as in past editions they are supported with introductions, scaffolded questions, and activities. An extensive Instructor's Manual by teacher-trainer Matt Bryan provides support for teaching with a writing-about-writing approach.
