Mostly a compilation of superstition and folklore, the book was taken very seriously at the time it was written in the 15th century and became a kind of spiritual law book used by judges

Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara's older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she'd traveled too far, if there was still a way home. "Beautiful and propulsive . . . *The Malleus Maleficarum* Greenwood Publishing Group

The world economy in which we are living poses challenges that lead to a realization that 'more of the same' will be difficult to sustain. This provides an illustration that, in order to create new or modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote

interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations.

With the newly inaugurated US Presidential Administration signing several orders to mitigate discrimination and racism within the United States government, attentions globally are once again brought to the Black Lives Matter campaign, and its message. Discrimination in business contexts, social interactions, and educational institutions remains a concern for leaders today. The empowerment of marginalized communities has been rapidly spreading through societies, thanks to the platforms that social media now offer. The Research Anthology on Empowering Marginalized Communities and Mitigating Racism and Discrimination is a three-volume, hand-selected compilation of the highest quality research on the empowerment of marginalized communities that have been experiencing ongoing discrimination. To shed light on the underpinnings of disparities between marginalized groups and overreaching society, this text explores social justice applications and practices and the changes being made or pushed for around the globe that promote equality, fair treatment, and inclusivity. This book is ideal for sociologists, teachers, activists, practitioners, managers,

administrators, policymakers, government officials, researchers, academicians, and students working in fields such as gender studies, race studies, social justice, behavioral studies, history, sociology, anthropology, psychology, law, as well as anyone interested in the current practices and advances in mitigating racism and discrimination in society.
