One of Britain's greatest cultural achievements of the late 20th century was the establishment of British designer fashion. Robert O'Byrne explores this phenomenon from the mid-'70s, when designer fashion scarcely existed in Britain, to the new millennium, by which time London ranked alongside Paris, New York, and Milan as a world-class fashion capital. The book describes and

illustrates all the key players and influences of British fashion in the period: not only the designers but also the music, the clubs, the parties, the amazing dressing-up tradition, and London itself. The language of fashion is visual, and this sumptuous book reflects that with evocative photographs by Norman Parkinson, David Bailey, Patrick Lichfield, Barry Lategan, and others, including iconic images such as the young Princess of Wales, Katherine Hamnett at 10 Downing Street wearing her "60 percent don't want Pershing" T-shirt, Margaret Thatcher in Aquascutum, and other rare shots from the designers' own archives.

Maps are inherently unnatural. Projecting three-dimensional realities onto two-dimensional surfaces, they are abstractions that capture someone's idea of what matters within a particular place; they require selections and omissions. These very characteristics, however, give maps their importance for understanding how humans have interacted with the natural world, and give historical maps, especially, the power to provide rich insights into the relationship between humans and nature over time. That is just what is achieved in *Mapping Nature* across the Americas.

Illustrated throughout, the essays in this book argue for greater analysis of historical maps in the field of environmental history, and for greater attention within the field of the history of cartography to the cultural constructions of nature contained within maps. This volume thus provides the first in-depth and interdisciplinary investigation of the relationship between maps and environmental knowledge in the Americas—including, for example, stories of indigenous cartography in Mexico, the allegorical presence of palm trees in maps of Argentina, the systemic mapping of US forests, and the scientific platting of Canada's remote

lands.

Lifting the lid on medical services in the British capital, London Call-Out is entertaining yet informative. It provides a revealing look at the work of a sessional GP and examines the dynamics of a night-shift team in a major city.

The City on the

Thames A&C Black

"Taking 60 of the city's most fascinating and most infamous murders from the nineteenth and twentieth centuries, David Long visits the scene of each crime and tells the story of what happened to whom, at whose hands, and -- where known -- why. Hot on the heels of Jack the Ripper and Lord Lucan we stalk

the dimly lit alleyways of Whitechapel and the well-heeled streets of Belgravia; Ruth Ellis takes us to a pub in Hampstead and Alexander Litvinenko's assassins to a sushi bar in Piccadilly. Less well-known murderers haunt bridges and tube stations, hotels and theatres, but more often than not ordinary-looking roads and buildings whose gruesome past is almost forgotten. We find out what drove people to dark and violent acts, how crimes were discovered and mysteries solved. Above all, we track the evolution of a city whose underworld has always had a strange power to frighten and yet entertain. Featuring maps and photos to help you plan

your own murder walk, Murderous London is the perfect guide to the city's shadiest, most enigmatic haunts"--Publisher's description.

This beautifully photographed guide to more than 100 of London's finest food experiences, shops, services, and trends is a must-have addition

to every food lover's bookshelf. A Foodie's Guide to London will quickly become an indispensable handbook for anyone who visits the capital with culinary inclinations. Author Cara Frost-Sharratt takes readers on a gastronomic tour around London, searching out the best bakers, butchers, cheesemongers, chocolatiers, delicatessens, fishmongers, food halls, farmers' markets, grocers, wine merchants, and world food stores, visiting famous names and uncovering hidden gems. Maps at the beginning of every chapter help you find your way to your chosen attraction, with stunning color photographs of the

food and people involved. Whether you're looking for freshly baked bread, exquisite chocolates, or exotic fare from across the globe, London has it all, and this book presents the best of the delights on offer.

The London Stock Exchange Lume Books Benjamin Franklin secretly loved London and in the decade before the outbreak of the American Revolution, thousands of his fellow colonists flocked to the city. This book recreates the city's hey day as the centre of an empire that encompassed North America and the West Indies.

The Three Little Pigs of London Grove Press A bestselling modern classic—both poignant and funny—about a

boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in

recent years. *Venture Capital* National Geographic For thousands of years, tracking animals meant following footprints. Now satellites, drones, camera traps, cellphone networks, apps and accelerometers allow us to see the natural world like never before. Geographer James Cheshire and designer Oliver Uberti take you to the forefront of this animal-tracking revolution. Meet the scientists gathering wild data - from seals mapping the sea to baboons making decisions, from birds dodging tornadoes to jaguars taking selfies. Join the journeys of sharks, elephants, bumblebees, snowy owls, and a wolf looking for love. Find an armchair, cancel

Each house on Pepys Road, an ordinary street in London, has seen its fair share of first steps and last breaths, and plenty of laughter in between. But each of the street's residents—a rich banker and his shopaholic wife, a soccer prodigy from Senegal, Pakistani shop owners, a dying old woman and her graffiti-artist son—is receiving a menacing postcard with a simple message: "We Want

What You Have." Who is behind this? What do they really want? In [Capital](#), John Lanchester ("an elegant and wonderfully witty writer"—New York Times) delivers a warm and compassionate novel that captures the anxieties of our time—property values going up, fortunes going down, a potential terrorist around every corner—with an unforgettable cast of characters. For as long as people have been migrating to London, so has their music. An essential link to home, music also has the power to shape communities in surprising ways. Black music has been part of London's landscape since the First World War, when the Southern Syncopated Orchestra brought jazz

to the capital. Following the wave of Commonwealth immigration, its sounds and styles took up residence to become the foundation of the city's youth culture. Sounds Like London tells the story of the music and the larger-than-life characters making it, journeying from Soho jazz clubs to Brixton blues parties to King's Cross warehouse raves to the streets of Notting Hill - and onto sound systems everywhere. As well as a journey through the musical history of London, Sounds Like London is about the shaping of a city, and in turn the whole nation, through music. Contributors include Eddy Grant, Osibisa, Russell Henderson, Dizzee Rascal and Trevor Nelson, with an

London is facing the
worst housing crisis in

modern times, with knock-on effects for the rest of the UK. Despite the desperate shortage of housing, tens, perhaps hundreds of thousands of affordable homes are being pulled down, replaced by luxury apartments aimed at foreign investors. In this ideological war, only market solutions to housing - which is a public good - are considered, which paradoxically makes the situation worse, because the market responds to the needs of global capital rather than ordinary people needing homes to live in. In politically uncertain times, the housing crisis has become a key driver creating and fuelling the inequalities of a divided nation. Anna Minton cuts through

the complexities, jargon and spin to give a clear-sighted account of how we got into this mess and how we can get out of it.

In 2001, the London Stock Exchange will be 200 years old, though its origins go back a century before that. This book traces the history of the London Stock Exchange from its beginnings around 1700 to the present day, chronicling the challenges and opportunities it has faced, avoided, or exploited over the years. Throughout, the history seeks to blend an understanding of the London Stock Exchange as an institution with that of

the securities market of which it was - and is - such an important component. One cannot be examined satisfactorily without the other. Without a knowledge of both, for example, the causes of the 'Big Bang' of 1986 would forever remain a mystery. However, the history of the London Stock Exchange is not just worthy of study for what it reveals about the interaction between institution and market. Such was the importance of the London Stock Exchange that its rise to world dominance before 1914, its decline thereafter, and its renaissance from the mid-1980s, explain a great deal about Britain's own economic performance and the working of the international economy.

For the first time a British economic institution of foremost importance is studied throughout its entire history, with regard to the roles played and the constraints under which it operated, and the results evaluated against the background of world economic progress.

Vivia is a hag, one of the last of her race, and can die, visit the underworld and return at will. She has a job she loves-helping London's most vulnerable supernaturals, even if her colleague Malcolm drives her round the bend on a daily basis. Then Malcolm is outed as a zombie and, along with his teenage son

Ben, flees the police. When Malcolm is captured, he is only able to pass on one message before his dead brain degrades completely: 'He killed me.' As Ben remains missing, the police find decades-old corpses hidden near Malcolm's house, and Vivia begins to realise there's a lot more at stake than just a possible zompocalypse...
