The Canterville Ghost. Mit Materialien Uitgeverij De Boeck Secundair onderwijs
 We live in the age of speed. We strain to be more efficient, to cram more into each minute, each hour, each day. Since the Industrial Revolution shifted the world into high gear, the cult of speed has pushed us to a breaking point. Consider these facts: Americans on average spend seventy-two minutes of every day behind the wheel of a car, a typical business executive now loses sixty-eight hours a year to being put on hold, and American adults currently devote on average a mere half hour per week to making love. Living on the edge of exhaustion, we are constantly reminded by our bodies and minds that the pace of life is spinning out of control. In Praise of Slowness traces the history of our increasingly breathless relationship with time and tackles the consequences of living in this accelerated culture of our own creation. Why are we always in such a rush? What is the cure for time sickness? Is it possible, or even desirable, to slow down? Realizing the price we pay for unrelenting speed, people all over the world are reclaiming their time and slowing down the pace -- and living happier, healthier, and more productive lives as a result. A Slow revolution is taking place. Here you will find no Luddite calls to overthrow technology and seek a preindustrial utopia. This is a modern revolution, championed by cell-phone using, e-mailing lovers of sanity. The Slow philosophy can be summed up in a single word -- balance. People are discovering energy and efficiency where they may have been least expected -- in slowing down. In this engaging and entertaining exploration, award-winning journalist and rehabilitated speedaholic Carl Honoré details our perennial love affair with efficiency and speed in a perfect blend of anecdotal reportage, history, and intellectual inquiry. In Praise of Slowness is the first comprehensive look at the worldwide Slow movements making their way into the mainstream -- in offices, factories, neighborhoods, kitchens, hospitals, concert halls, bedrooms, gyms, and schools. Defining a movement that is here to stay, this spirited manifesto will make you completely rethink your relationship with time.

 CLiC-it 2015 is held in Trento on December 3-4 2015, hosted and locally organized by Fondazione Bruno Kessler (FBK), one of the most important Italian research centers for what concerns CL. The organization of the conference is the result of a fruitful conjoint effort of different research groups (Università di Torino, Università di Roma Tor Vergata and FBK) showing the nationwide spreading of CL in Italy. As in the first edition, the main aim of the event is at establishing a reference forum on CL, covering all the aspects needed to describe the multi-faceted and cross-disciplinary reality of the involved research topics and of the Italian community working in this area. Indeed the spirit of CLiC-it is inclusive, in order to build a scenario as much as possible comprehensive of the complexity of language phenomena and approaches to address them, bringing together researchers and scholars with different competences and skills and working on different aspects according to different perspectives. The large number of

researchers that have decided to present their work at CLiC-it and the number of directions here investigated are proof of the maturity of our community and a promising indication of its vitality. We received a total of 64 paper submissions, out of which 52 have been accepted to appear in the Conference Proceedings, which are available online and on the OpenEdition platform. Overall, we collected 129 authors from 15 countries.

Jerome Klapka Jerome was an English writer and humourist, best known for the comic travelogue Three Men in a Boat. Other works include the essay collections Idle Thoughts of an Idle Fellow and Second Thoughts of an Idle Fellow; Three Men on the Bummel, a sequel to Three Men in a Boat, and several other novels. Jerome sat right down to write Three Men during a Boat as soon because the couple returned from their honeymoon. Within the novel, his wife was replaced by his longtime friends George Wingrave (George) and Carl Hentschel (Harris). This allowed him to make comic (and non-sentimental) situations which were nonetheless intertwined with the history of the Thames region. The book, published in 1889, became a moment success and has never been out of print. Its popularity was such the amount of registered Thames boats went up one-half within the year following its publication, and it contributed significantly to the Thames becoming a tourist attraction. In its first twenty years alone, the book sold over 1,000,000 copies worldwide. It's been adapted to films, TV and radio shows, stage plays, and a musical. Its literary genre influenced many humourists and satirists in England et al. With the financial security that the sales of the book provided, Jerome was ready to dedicate all of his time to writing. He wrote variety of plays, essays, and novels, but was never ready to recapture the success of Three Men during a Boat. In 1892, he was chosen by Robert Barr to edit The Idler (over Rudyard Kipling). The magazine was an illustrated satirical

monthly catering to gentlemen (who, following the theme of the publication, appreciated idleness). In 1893, he founded To-Day, but had to withdraw from both publications due to financial difficulties and a libel suit. Jerome's play Biarritz had a run of two months at the Prince of Wales Theatre between April and June 1896. In 1898, a brief stay in Germany inspired Three Men on the Bummel, the sequel to 3 Men during a Boat, reintroducing an equivalent characters within the setting of a far off bicycle tour. The book was nonetheless unable to capture the life-force and historic roots of its predecessor, and it enjoyed only a light success. In 1902, he published the novel Paul Kever, which is widely considered autobiographical. His 1908 play The Passing of the Third Floor Back introduced a more sombre and non secular Jerome. The most character was played by one among the leading actors of the time, Johnston Forbes-Robertson, and therefore the play was an incredible commercial success. It had been twice made into film, in 1918 and in 1935. However, the play was condemned by critics - Beerbohm described it as "vilely stupid" and as written by a "tenth-rate writer"

This book looks at the foundations of school self-evaluation from a scientific as from a practical perspective. Planning concepts, restructuring of education systems, organizational theory on schools, evaluation methodology and models of school effectiveness and school improvement are discussed as contributing to the overall conceptualization of school self-evaluation. A broad range of approaches is presented and methodological requirements are discussed. School self-evaluation contains controversial issues that reflect tension between the need for objectivity in a context that is permeated by values and potential conflicts of interests. Similar tensions may be seen to exist with respect to the static and "reductionist" aspects of available data collection procedures in a complex and dynamic situation and the appeal for external accountability on the one hand and improvement oriented self-reflection on the other. The mission of the book is to clarify these tensions and offer ways to deal with them in practical applications. The school effectiveness knowledge base is offered as a substantive educational frame of references that serves an important function in selecting relevant factors for data collection and the use of the evaluation results.

In Praise of Slowness Cambridge English

"Simplicity, as I understand it, is the range of solutions living organisms have found, despite the complexity of natural processes, to enable the brain to prepare an action and plan for the consequences of it. These solutions are simplifying principles that enable the processing of information or situations, by taking into account past experience and anticipating the future. They are neither caricatures, shortcuts, or summaries. They are new ways of asking questions, sometimes at the cost of occasional detours, in order to achieve faster, more elegant, more effective actions." A. B. As Alain Berthoz demonstrates in this profoundly original book, simplicity is never easy; it requires suppressing, selecting, connecting, thinking, in order to then act in the best way possible. And what if we, in turn, are inspired by the living world to process the complexity that surrounds us? Alain Berthoz is professor at the Collège de France where he is co-director of the Laboratoire de physiologie de la perception et de l'action. [Laboratory for the physiology of perception and action]. He is a member of the French Academy of Sciences, and is the author of *Le Sens du mouvement* [The Brain's Sense of Movement] and *La Décision* [Emotion and Reason].

This is the story of the carefully planned resurgence of the State Bank of India (SBI) from a laid-back incumbent under threat from private players to a customer-oriented competitive organization that has outperformed rivals despite several constraints. The leadership at SBI succeeded in reshaping perspectives and profitability at the bank, which employs a staggering 200,000 people, not withstanding salary restrictions and regulatory bottlenecks. While the primary thrust was on changing employee attitude towards their own organization and, of course, its customers, the transformation exercise was broad-based encompassing fundamental changes in technology, processes and business-mix alike. In about three years beginning 2006, SBI not only defended its own lair against the siege of younger, leaner, meaner rivals but actually took the battle to the attacker's domains. SBI's size and setting make the story an inspiring example to other organizations, particularly in the public sector. Written in a fluid and engaging style, and backed by facts, figures, analysis and anecdotes, the book challenges several stereotypes and dogmas common in today's management circles.
